

# Low Tech / Low Cost Production of Sign Language Dictionaries and Sign Language Teaching Materials

**Project Description:**  
This project aims to develop low-tech, low-cost production methods for sign language dictionaries and teaching materials. The project involves the development of a sign language dictionary and the production of teaching materials for sign language instruction. The project is designed to be accessible to individuals with limited resources and to provide a sustainable model for the production of sign language materials.

**Project Objectives:**  
- To develop a sign language dictionary that is accessible to individuals with limited resources.  
- To produce teaching materials for sign language instruction that are low-cost and easy to use.  
- To provide a sustainable model for the production of sign language materials.

**Project Activities:**  
- Research and development of a sign language dictionary.  
- Production of teaching materials for sign language instruction.  
- Distribution of the dictionary and teaching materials to individuals with limited resources.

This section of the poster features a collage of images and text. The images include people working at computers, printed materials, and other visual elements related to the project. The text provides additional details about the project's progress and outcomes.
