Strand: Using Technology to Support Learning
Type: Formal   **Audience:** All

Summary:

  NTID's High Technology Center for Electronic Publishing and Imaging (HTC) provides on-going access to state-of-the-art graphic media and publishing technology. This presentation tours the HTC and offers it as a model of an industry-funded, centralized facility for cross curricular support of: professional development; research and testing; the publishing and production of teaching materials; and, curriculum development and delivery.
