Tuesday, 6/26/2001 -- 11:00 AM
Location: LBJ [060] 3237

Strand: Online and Distance Education

Type: Formal **Audience:** All

Summary:

Videostreaming is fast becoming a viable option for online teaching of deaf and hard-of-hearing students due to the rapid implementation of high-speed Internet access at work, school and home. In spite of many of the obstacles with videostreaming, NTID has successfully implemented video-streamed modules in some of its online courses.
