National Technical Institute for the Deaf

Tuesday, 6/26/2001 -- 10:00 AM
Location: LBJ [060] 1510

Strand: Using Technology to Support Learning
Type: Formal   **Audience:** All

Summary:

  Due to concomitant etiologies, many deaf and hard-of-hearing students have impaired vision. Following a basic overview of normal vision and refractive error this session will discuss the incidence of impaired vision, particularly Usher Syndrome, among deaf & hard-of-hearing students. This session will then explore techniques & technologies for supporting classroom instruction, from communication to materials. To assist in understanding, participants will have the opportunity to experience various types of vision loss.
