SignStation, the revolutionary, custom designed and installed, educational tool used to teach American Sign Language at a leading school for the deaf for over 5 years is now available in a low cost, easy to use package!

SignStation is a member of the EduStation line of language Labs. SignStation is designed to facilitate instruction, oversight, and analysis on an individual or group basis. Each SignStation comes as a complete turnkey package ready to install.

Each SignStation comes with (1) Teacher station and any number of Student stations. The Teacher station can remotely control, monitor or communicate with individuals, groups or all of the student stations allowing for constant oversight, "face to face" communication and reliable testing.

Each SignStation package comes complete with a prefabricated wiring harness sized to fit your facility, all audio and video components required for one teaching station and a set number of student stations, one multilevel ADA compliant cart for each station, (1) Acousti-control privacy panel for each (2) stations, an easy to follow documentation package, "quick-wire" connection panels, free training*.

SignStation S2- $39,124.00
  Basic SignStation includes (1) teacher station with document camera and (2) student stations.

SignStation S4- $58,436.00
  SignStation with (4) student stations

SignStation S8- $99,011.00
  SignStation with (8) student stations

Pricing includes shipping charges. Additional sizes and custom packages available, call for more information.

*Free training- one full day of training for up to five individuals at Univisions' fabrication and training center in Syracuse NY. Lunch will be provided, all other expenses including travel and lodging will be the responsibility of the purchasing institution. Training to include set-up, installation, operation and preventative maintenance. Other packages including on-site installation and training are available starting at $1,000.00 per day plus expenses.
