GETF future goals

Several elements of our proposed strategic plan need an implementing body:

• Developing administrative and academic policies that clarify how RIT develops new international relationships and manages our current relationships.

• Identifying resources and services needed to support faculty and students in international study, research, and work.
GETF future goals

• Identifying strategic focus areas for international collaboration (research, program delivery, recruiting, etc)

Some issues should be addressed regardless of the strategic plan - the GETF has done a good deal of thinking in these areas and is well positioned to keep this momentum going.
