

Trustees Celebrate President's 10th Year at RIT

Eisenhart Elected Athenaeum President

Richard H. Eisenhart, chairman emeritus of the Board of Trustees, was elected chairperson of the Athenaeum at the organization's annual meeting, October 18.

"The Athenaeum got off to a strong start, thanks to an active membership, capable leadership, and a strong commitment from RIT," Eisenhart told the group. "We have great ambitions for this organization." He said he plans to double the organization's membership to about 400 during its second year.

Joining Eisenhart on the Athenaeum's executive committee are Millie Ness, vice chairperson, education; Joe Bagale, vice chairperson, marketing; Marge D'Ambruso, vice chairperson, participation; Ann Dillon, treasurer; and Betty Glasenapp, secretary.

President Rose told the gathering of 250 people that he was pleased by the success and vitality of the "community of learning," and he reaffirmed RIT's commitment to the organization.

"Much of the credit for RIT's advances is due to Dick Eisenhart," Dr. Rose said. "He brings to the Athenaeum the same experience, vision, and strong leadership that has served RIT well for many years."

The Athenaeum is an organization of people age 50 and older who seek intellectual and social stimulation through continued learning. Members draw on their own experiences and talents to plan and carry out educational experiences and social activities. They meet in the newly renovated main hall of the Racquet Club.

"In one year the Athenaeum has achieved national acclaim," said Mark Blazey, dean of Training and Professional Development. "It is a model across the country, and it has worked because of your teamwork and energy."

DR. ROSE CELEBRATES 10 YEARS... President Rose was toasted and roasted Nov. 16 at a celebration in his honor by the Board of Trustees. The serious tributes included a speech by Thomas Gosnell, trustee chairman, and presentation of a painting and photo albums representing the accomplishments of the past 10 years. Past trustee chairmen Bruce Bates, Frank Hutchins, and Dick Eisenhart roasted the president with a slide show review, and Dr. Robert Johnston, dean of the College of Fine and Applied Arts and Rose's former motorcycling companion, rode his Harley into the reception in mock invitation to another cycling adventure. Surprise guests included members of Rose's family, including his mother, Mrs. Bertha Rose, from Brooksville, Fla.

Four New Board Members Join Trustees

Four corporate executives have been elected to RIT's Board of Trustees. Named at the November 17 board meeting were Paul J. Koessler, president and CEO of Greater Buffalo Press; Robert J. Kohler, president of ESL, Inc., a subsidiary of TRW, Inc.; Thomas C. Wilmot, president and CEO of Wilmorite, Inc.; and Genesee Management, Inc.; and Donald A. Zrebiec, vice president, management resources, for Xerox Corp.

A member of the Industry Executives Steering Committee for RIT's Graphic Arts Capital Campaign, Koessler has served as president and CEO of Greater Buffalo Press since 1982. He has been associated with Greater Buffalo Press for 28 years.

A graduate of the University of Detroit with a BS in mathematics, Koessler also completed Harvard University's Advanced Management Program in 1981. A resident of Hamburg, N.Y., he is past president of Printing Industries of America's Western New York chapter, and a director of AAA of Western New York and St. Mary's School for the Deaf, Buffalo.

A 1959 RIT photo sciences graduate, Kohler was appointed president of ESL, Inc., in June 1986. Based in Sunnyvale, Calif., ESL is a leader in the design and development of communications and reconnaissance systems for the U.S. government.

Before joining ESL, Kohler was a vice president for Lockheed Missiles and Space Co. and was with the Central Intelligence Agency for 19 years, serving in a number of positions. He is a Rochester native, now living in Los Gatos, Calif.

Wilmot has held the posts of president and CEO at Wilmorite and Genesee Management since 1970 and 1976, respectively. Wilmorite is a developer/owner of shopping centers and commercial properties; Genesee Management handles day-to-day management of those properties.

Formerly president of Page Holding Corporation, Wilmot is a general or limited partner in many real estate partnerships. He also sits on the boards of University of Rochester/Strong Memorial Hospital and Central Trust Company. A resident of Pittsford, Wilmot holds a BS in civil

engineering from Syracuse University.

As vice president for Xerox's management resources at corporate headquarters in Stamford, Conn., Zrebiec's responsibilities include the development of the corporate management succession program. He joined Xerox in 1963 and held a variety of positions before being named vice president of personnel for the Business Products and Systems Group in 1984. In 1987 he was elected a corporate vice president, assuming his current position.

Zrebiec completed his BA at Syracuse University in 1959 and his MBA in 1961. Past treasurer of the Rochester Downtown Development Corp. and former chairman of the board of Rochester Blue Cross, he resides in Pittsford.

Drop In, Greet Santa

Santa will make at least one appearance at RIT at a holiday party from noon-1 p.m., Thursday, Dec. 8, in the RITreat, College-Alumni Union. The party, which will also feature cookies, cider, and music, is open to all and is sponsored by the Office of Special Events/Union Services.

Tom Carnase, artist, type designer, and president of Carnase, Inc., in New York City, addressed the Imaging Connections conference.

Successful Conference

More than 200 graphic arts professionals attended RIT's "Imaging Connections," Nov. 1-2. The conference was devoted to methods of electronically combining design, photography, and printing into one computerized system.

USA Today, Eastman Kodak Company, Reader's Digest, Mobil Chemical Company, E.I. du Pont, Adolph Coors Company, the U.S. Government Printing Office, Philip Morris USA, Duke University, and Houghton Mifflin Co. were among the participants.

Sponsored by the School of Printing Management and Sciences, the Technical and Education Center for the Graphic Arts, and the Graphic Systems Division of Rockwell International Corporation, Imaging Connections was held in Ingle Auditorium.

Sessions covered such topics as human and process parameters, image creation, image capture, page description language, text processing, font interchange and digitizing type, image processing, data compression and storage, data communications, color electronic prepress, desktop interfaces and standards, output, proofing and the imaging connection, printed electronic images, and educational implications.

Dr. M. Richard Rose and Miles Southworth, director of the School of Printing Management and Sciences, gave opening remarks, and Assistant Professor Frank Cost delivered the conference overview. Other RIT speakers included Dr. E.C. McIrvine, dean of the College of Graphic Arts and Photography; Associate Professor Robert Chung, printing; Professor Richard Zakia, School of Photographic Arts and Sciences; Assistant Professor Chris Comte, School of Computer Science and Technology; Research Associate Milton Pearson, RIT Research Corp.; Professor Joe DeLorenzo, College of Engineering; and Guy Johnson, chairman of applied computer studies, School of Computer Science and Technology.

Consultant Frank Romano was moderator of the conference.

Other speakers included consultant Rob Haines; M.A. Kriss of Eastman Kodak Company; artist and type designer Tom Carnase; Jack Powers, president of Interactive Features; William Davis of the Internal Revenue Service; Edwin J. Smura of Xerox Corp.; Peter Karow of URW; Ken Cloud of Cloud Information Services; Frank Benham, vice president of New Technologies; consultant Warren Rhodes; Dr. Edward Granger of Eastman Kodak Company; and William Lamparter, president of PrintCom Consulting Group.

Exhibit Highlights NTID's YOYO Room

The "YOYO Show" is not a display of children's toys. Instead, the current art show in Switzer Gallery features work by two former student assistants in NTID's "You're On Your Own" (YOYO) Room, a do-it-yourself workshop in which faculty and staff members can make their own classroom visual aids. Caryl Glaab and Sandy Tulett display their work through Dec. 30.

Renowned Typographer Honored by RIT

The man who designed some of the world's most popular typefaces will be honored Dec. 8 by the School of Printing Management and Sciences.

Adrian Frutiger of Arcueil, France, will be the recipient of RIT's 20th Annual Frederic W. Goudy Award. Frutiger's influence is felt every day by people across the globe—his melding of art and technology shows up everywhere the printed word does, said Dr. Mark Guldin, Melbert B. Cary, Jr., Professor of Graphic Arts and coordinator of the Goudy Award.

Frutiger, designer of the Frutiger, Glypha, Icone, Univers, Meridien, and Serifa typefaces, will meet with students from 10 to 11 a.m., Dec. 8, in Webb Auditorium. From 2 to 3 p.m. he and previous Goudy Award recipients, including Alexander Lawson, Melbert B. Cary, Jr.,

Professor Emeritus, will hold a panel discussion—"How the New Technologies Have Affected Contemporary Designs"—in the Neblette Conference Room of the

in the library, and an exhibit of Frutiger's work will be open from 3 to 5 p.m. and 8:30 to 9:30 p.m. in the library.

The Goudy Award ceremony will take place from 6:30 to 7 p.m. in the Fireside Lounge, and Frutiger will be honored at dinner following the ceremony.

The annual Goudy Award is sponsored by the Mary Flagler Cary Charitable Trust to honor the friendship of Melbert B. Cary, Jr., and Frederic W. Goudy, America's most prolific type designer.

Cary was vice president and part owner of Continental Type Founders, through which he marketed a number of Goudy's typefaces. Cary also owned his own press—Press of the Woolly Whale—and a collection of books, which later became the core of RIT's Cary Library.

Frutiger
Frutiger
Frutiger

College of Graphic Arts and Photography.

David Pankow, curator of the Cary Library, will give a talk on the library's growth during the past 20 years at 4 p.m.

Summer Statistics Institute Planned

RIT's Center for Quality and Applied Statistics announces its new Summer Institute for Statistics, to begin in July 1989. The summer program offers the quality professional or aspiring statistician the opportunity to earn a master of science degree in statistics in as few as three summers.

The Summer Institute is ideal for teachers and graduate students with summers off, employees seeking to enhance skills without long absences from the job, and individuals with schedules that do not permit evening classes.

"This is a real break for people who want to earn a master's degree by concentrated effort over a minimum of 18 weeks," says Dr. John Hromi, director of the center.

Two consecutive three-week sessions will be offered each summer and will feature the center's recognized quality experts, as well as international leaders in quality who will serve as guest lecturers. This summer's guest lecturers will be Dr. Fred C. Leone, director emeritus of the American Statistical Association, and Dr. Donald A. Gardiner, industry consultant formerly with Martin Marietta Energy Systems.

This summer's sessions will meet from July 10-29 and July 31-August 19. A full course load would be two classes per session for a total of four each summer.

All courses offered by the Summer Institute are equivalent in content and credit hours to those offered during the regular academic year.

For more information, call Dr. Edward G. Schilling, chairman of Graduate Statistics, at -6129.

Holiday Craft Sale

As the holiday season approaches, many shoppers are confronted by an anxiety-provoking question—what to give the person who has everything. This year that problem has been solved by students in the School for American Craftsmen, who will hold their annual holiday gift sale, 8 a.m.-6 p.m., Dec. 8-10, in the College-Alumni Union.

The traditional holiday event features gifts for even the fussiest recipient. Among the many handcrafted items available at the sale will be blown-glass ornaments, turned wood bowls, ceramic vessels, woven scarves, and jewelry. Styles range from traditional to contemporary, and prices start at around \$3.

The sale is organized by the RIT Community for Craft, a student-run organization that promotes knowledge of crafts at RIT. "We've got over 50 people setting up for the sale this year, so there should be something for everyone's taste," said Katie Wilson, a ceramics and ceramic sculpture student and the group's president.

SIXTEEN YEARS... Trustee E. Kent Damon (left), vice chairman of the RIT Board of Trustees and retired vice president and secretary of Xerox Corp., recently retired as chairman of the RIT Finance Committee. At a Nov. 15 luncheon marking Damon's 16 years as chairman, William Dempsey, vice president, Finance and Administration, presented him with a plaque and silver bowl crafted by Leonard Urso, College of Fine and Applied Arts.

MUMPS Is Rare, but Popular

RIT has been infected with MUMPS! Fortunately, MUMPS is neither a disease nor a computer virus. It is a multi-purpose programming language taught in the biomedical computing program in the College of Science.

RIT is one of only five universities in the nation offering a course in MUMPS, a powerful computer language designed primarily for interactive manipulation of data in large dynamic files such as medical data bases. "We receive many calls from people across the country looking for courses in MUMPS, as well as from companies looking for graduates who know and have worked with it," explains program director Richard Garnham.

MUMPS, which was donated to the College of Science by Digital Equipment Corporation, had its beginnings in the medical field, but other fields are now discovering it. It is applied to virtually every kind of health service, scientific, technological, and corporate data-processing system and is most often used for interactive applications that rely on immediate data retrieval and prompt response.

The biomedical computing program at RIT was established in 1979. It merges the disciplines of clinical science (health care) with computer science.

"To my knowledge," says Garnham, "there is only one other school in the nation offering a bachelor's degree in biomedical computing."

Today, biomedical computing is a growing field with excellent employment opportunities. "There is a continuing demand for computer professionals who can interact

with health care and research specialists and apply their computer skills to every aspect of the health care field," says Garnham.

"The typical starting salary for our students who graduated this past June was \$30,000. There are also excellent co-op opportunities. We never have enough students to fill all the co-op positions available."

RIT biomedical computing graduates consult with health care professionals on computer hardware and software.

Faculty Examine Kennedy Presidency

Another look at John F. Kennedy's presidency will be offered by College of Liberal Arts faculty. "History Roundtable on John F. Kennedy" will be held at 4 p.m., Wednesday, Dec. 7, in room 2214, College of Liberal Arts.

College of Liberal Arts professors will discuss various aspects of Kennedy's presidency, including his assassination, his foreign policy and diplomatic history, and his record as a social reformer. Other speakers will evaluate Kennedy's presidency.

The roundtable discussion is open to RIT students, faculty, staff, and the Rochester community.

For more information call George Whelan at -6095.

THE PAINTING SAYS THANKS... Joan (left) and Robert Gianniny (center right), outgoing Nathaniel Rochester Society chairpersons, received a painting from President Rose as a tribute to their leadership. At left center is Dr. Denis Waitley, best-selling author and lecturer on self-improvement, who was the guest speaker for the fall NRS event on Nov. 16. The painting was done by Robert Heischman, College of Fine and Applied Arts faculty member.

Another High-Tech Ethics Problem: Altered Photos

Photographs don't lie? Well, they do now.

In an estimated 10 percent of the color reproductions you see, something has been taken out or added to the original, according to Miles Southworth, director of the School of Printing Management and Sciences.

"Before, you could tell. Now, the technology is so advanced, you can *not* tell the photo has been changed," Southworth says. "You face ethical questions when you manipulate reality."

Computer manipulation is rapidly changing the way photographs are staged and reproduced. Here are some examples:

- Water from California, a model from New York, palm trees from Florida: with the right equipment, the three can be merged into one photo.
- Shooting a board of trustees picture for the annual report, but the board president can't make it? No problem. Have a stand-in sit in his chair during the shoot, photograph the president later in the same position, and insert him into the group photo with computer manipulation.
- Selling coffee cups? No need to shoot and reshoot to show each color that's available. Simply manipulate the photo.

Last spring, a bogus *National Geographic* cover showing Ronald Reagan and Mikhail Gorbachev checking time, the Kremlin looming behind them, was sent to photojournalists. A funny thing didn't happen on the way to the summit; an RIT technical associate merely pushed some fancy buttons.

Editors of *A Day in the Life of America* manipulated reality when they moved a cowboy under the moon.

Interdepartmental Sale

RIT's Interdepartmental Sale is scheduled for Dec. 12-16 on the 8th floor of City Center. All departments have submitted surplus equipment for sale. Proceeds will be returned to departmental budgets, less the administrative cost of the sale.

According to Gary Smith, director of Purchasing, the sale will run from 1 to 3 p.m. each day. "Buyers will need an authorized journal entry form to purchase equipment and forms will be available at the sale site," explained Smith.

The sale is open to all RIT faculty and staff, not just those buying for departments. Depending upon volume, goods will be delivered to departments as they are purchased.

All items remaining from the Interdepartmental Sale will be sold at a public auction, 10 a.m.-4 p.m., Saturday, Jan. 14.

Any questions should be directed to Marie Nitzman, Property Control, -2940.

About 500 companies own color electronic pre-press systems that can effortlessly perform such tricks. In five years Southworth predicts that the number will increase to 1,500. The current price of a system is "about \$1 million and dropping," he says.

Technical Associate Blair Richards, who oversees color pre-press systems at RIT, says, "People are buying systems hand over fist. Someday there will be a precedent-setting lawsuit over a photo that has been manipulated, and a new set of trade customs will be established."

For now, however, the increasingly common forms of manipulation rear puzzling questions: Whose photo is it? Who gets the money the photo makes? Who gets the artistic credit?

Hiring Policies

Most people think "affirmative action" and "equal opportunity" have the same meaning. Four local experts will explore the subtle differences between these two policies at the First Annual Forum on Affirmative Action and Equal Opportunity at 6 p.m., Dec. 15, in the Fireside Lounge, College-Alumni Union. The free forum is sponsored by the Office of Minority Student Affairs and the Hispanic Student Association and is open to students, RIT faculty and staff, and the Rochester community.

"Our panelists will present cases for affirmative action and equal opportunity in the work force and for educational institutions and housing," said Dr. Michael Ayewoh, director of Minority Student Affairs and moderator of the forum.

Students who understand these policies and how they affect a university's hiring practices will also gain an understanding of corporate hiring practices when they apply for jobs after graduation, Ayewoh believes.

"We're investing in education rather than ignorance," he said. "Understanding what affirmative action and equal opportunity mean helps fight racism in our society."

The forum panelists are William Johnson, president/CEO of the Urban League of Rochester; Augustin Melendez, affirmative action officer of the Rochester City School District; Lilly Haygood, affirmative action officer, City of Rochester; and Angela Reyes, assistant district attorney, Monroe County district attorney's office.

Package Design Exhibited

What happens to the tons of plastic used in everything from cosmetic cases to shrink wrapping? Or all those glass soda bottles? Aluminum cans? If the designers who create these containers have anything to say about the issue, packages will more frequently be designed with conservation in mind.

"Silent Sell," an exhibit of package designs at Bevier Gallery, Nov. 30-Dec. 19, addresses some current design issues. Originated by the Pratt Institute in New York City, "Silent Sell" features work by New York-based design firms and RIT students and examines packaging trends like recycling, computer-assisted design, and economical substitutions for bulky or expensive materials.

"Packaging designers have to think about today's environmental concerns," says Robert Kahute, associate professor of interior, industrial and packaging design.

Included in the show are designs for a line of children's computer games, a color-coded display environment of shoe boxes, and a section devoted to the conservation of paper, metal, and plastic in package designs.

At the show's opening reception, 5-7 p.m., Dec. 1, John Lister, vice president for the New York design firm, Butler-Lister, will be available for questions.

Students Trim Peace Tree

RIT students of all faiths will make ornaments reflecting their religious affiliations and decorate a Peace Tree as part of events planned to celebrate the holidays.

Students will make decorations and trim the tree from 1-5 p.m., Dec. 5, in the Skalny Room of the Interfaith Center.

RIT's traditional Christmas tree has been renamed the Peace Tree to reflect the variety of faiths represented at RIT, said Rev. Jim Sauers, director, Campus Ministry. After the tree is decorated, an interfaith candle lighting ceremony will be held at 5 p.m. in the College-Alumni Union. A menorah, made by students, also will be lit to commemorate the third night of Chanukah.

(For additional religious holiday events and services, see the "Calendar" in this issue.)

Peters' Prescriptions

If American business is to come out a winner in today's chaotic, competitive markets, it must demolish management hierarchies, be obsessed with quality, and empower workers with more respect and responsibility.

That prescription for a "management revolution" was part of the mandate delivered by Tom Peters, the author of three national best sellers on management, at a Nov. 1 teleconference aired at RIT.

The teleconference drew a capacity crowd of nearly 100 local business people. The live event, sponsored by Training and Professional Development, was transmitted via satellite from Old Dominion University in Norfolk, Va.

"There is not a person who has a sweet clue as to who the competition is going to be next year, let alone next decade," said Peters. "Everything is predicated on the belief that (tomorrow's business climate) will be like it is today. That's what has gone out the window. Uncertainty is the name of the game."

In response to a question from RIT on how academic institutions should be modeled for success, Peters emphasized listening to the "customers": students, faculty, and the community. He also stressed rapid innovation: "If our schools aren't innovating as fast as the rest of the world, they're ill-equipped to send people out into the environment."

Videotapes of the teleconference are available for viewing at the Media Resource Center in Wallace Memorial Library.

Faculty, Staff Invited to Sale

The biggest pre-holiday sale in town is Dec. 9, when Campus Connections will give a 20 percent discount on most items to RIT faculty and staff. The annual event, Faculty/Staff Appreciation Night, will be held from 5 to 7 p.m. All those attending will be required to show their RIT IDs and the invitation sent to all faculty and staff. Light refreshments will be served.

The sale includes discounts on most items, including clothing, jewelry, general interest books, art supplies, gifts and stationery, and sports items. Not included are textbooks, computer hardware and software, photo equipment (but you can save on film!), and sale merchandise.

"This is a nice way to express our appreciation to faculty and staff and recognize the contributions they make to the RIT community," said John Roman, director of Campus Connections.

RAISE YOUR SPIRIT IN SONG... Celebrate this holiday season with a Christmas and Hanukkah Concert—join the RIT Singers and Philharmonia on Dec. 11 at 3 p.m. in the Kilian J. and Caroline F. Schmitt Interfaith Center. Guests are invited to a reception immediately following.

NEWSMAKERS

- "Photographic Materials and Processes," a photography book written by School of Photographic Arts and Sciences faculty **Leslie Stroebel, John Compton, Richard Zakia,** and **Ira Current**, has won an honorable mention in the Kraszna-Krausz Award 1988 international competition.
- **Charleen McMahon**, meal ticket coordinator for Food Service, recently made a presentation on meal ticket audit systems and controls at the annual Validine User's Conference at Rutgers University in New Jersey.
- **Jack Holm**, instructor in the Department of Imaging and Photographic Technology, has had a paper, "Aerosol Charger Using Sinusoidally Driven Ion Current from Corona Discharge," accepted for publication in the June 1989 issue of *Aerosol Science and Technology*. He presented another paper, "Electrodynamic Funnel for Confinement and Transport of Charged Aerosol Particles," at the annual meeting of the American Association for Aerosol Research in Chapel Hill, N.C., in October.
- **Dr. Vinnie Gupta**, assistant professor, mechanical engineering, and Dr. David Quesnel of the University of Rochester, presented a paper, "Modeling Source Operation in Dislocation Cell Substructures," at the Metallurgical Society fall meeting in Chicago.

- **Joseph T. Nairn**, director of the Office of Part-time Enrollment Services, recently was selected to serve on the Middle States Commission on Higher Education's Task Force on Off-Campus Programs. The task force will create much-needed assessment tools for the evaluation of off-campus programs in the middle states region.
- **William Dempsey**, vice president, and **Richard Lindner**, associate vice president, Finance and Administration, presided over RIT's first quarterly Real Estate Round Table, at which **Eric Hardy**, vice president of RIT Development Corporation and director of the Real Estate Ventures Office, presented James Breese, Henrietta town supervisor, with an award acknowledging his contributions to the development of the Town of Henrietta. Hardy also is president-elect of the upstate New York chapter of the National Association of Industrial Office Parks and has been elected to the Board of Directors of Public Computer Systems Incorporated.
- **Alan De Back**, assistant director of the Office of Cooperative Education and Placement, has been elected vice president of the New York State Cooperative Experiential Education Association for the 1989 calendar year. He will automatically become president of the organization in 1990.

- **Elizabeth O'Brien**, associate professor in the Technical and Integrative Communication Studies Department, and **Jean Bondi-Wolcott**, assistant to the associate dean for educational support services, NTID, presented a paper, "Parents' Role in Facilitating Career Development and Transitions for Their Hearing-Impaired Adolescent," at the Third National Conference on the Habilitation and Rehabilitation of Hearing-Impaired Adolescents in Little Rock, Ark., in October.
- A paper by **Dr. Paul A. Haefner, Jr.**, Department of Biology, "Morphometry and Size at Maturity of *Callinectes ornatus* (Brachyura, Portunidae) in Bermuda," has been accepted for publication in the *Bulletin of Marine Science*. It will appear in Vol. 46, No. 1, January 1990.
- **President M. Richard Rose** addressed both the Brighton Rotary Club and the annual meeting of the Flower City Division of the RIT Printing Alumni Association in November on the present and future directions of RIT.

CALENDAR

- Dec. 2**—sports: Men's hockey hosts Potsdam, 7:30 p.m.
- Dec. 3-4**—sports: RIT men's basketball tournament; Gallaudet, W. Conn., Drew, 7 & 9 p.m.; consolation and championship games, 1 and 3 p.m., Dec. 4
- Dec. 5-30**—exhibit and reception: "YOYO Show," NTID's Switzer Gallery, featuring works in a variety of media by Caryl Glaab and Sandy Tulett, former student assistants in the You're On Your Own (YOYO) Room; opening reception, Dec. 5, 4-6 p.m.
- Dec. 7-8**—religious service: Feast of the Immaculate Conception, vigil mass, 5:10 p.m., Wednesday, Dec. 7; 7:30 a.m., 12:10 p.m., and 7:30 p.m., Thursday, Dec. 8, Allen Chapel
- Dec. 10**—sports: Women's swim team hosts Cortland, 1 p.m.
- Dec. 11**—music: Festival of Christmas and Hanukkah Music by the RIT Singers and Philharmonia, 3 p.m., Allen Chapel; reception to follow in the Skalny Room
- Dec. 12**—religious service: Catholic Advent penance service, 12:10 p.m. and 7:30 p.m., Allen Chapel
- Dec. 14**—lecture: "The Eyes of Time: Photojournalism in America," slide program by author Marianne Fulton, 7 p.m., Webb Auditorium; free
- Dec. 24**—religious services: Catholic mass, Allen Chapel, 7:30 p.m.; Episcopal Holy Eucharist, Jones Chapel, 7:30 p.m.; Christmas reception immediately following in the Skalny Room
- Dec. 31**—religious service: Catholic mass, Allen Chapel, 7:30 p.m.

McIntee Lecturer Honors Tea

Teamaster Hisashi Yamada prepares bowls for tea ceremony participants. The intricately orchestrated ceremony emphasizes the social and artistic facets of drinking the beverage.

The School for American Craftsmen's 1988 John T. McIntee, Jr., Lecturer asked members of his audience to take their shoes off. Then, on November 18, Hisashi Yamada, executive director of Uransenke Tea Ceremony Society, conducted a tradi-

tional Japanese tea ceremony before a group gathered for the opening of "Tea-N-Tea" in Bevier Gallery.

Before he began serving tea, Yamada spoke about the artistic, meditative, and spiritual aspects of the centuries-old ritual. Based on the spiritual principles of Zen Buddhism, the ceremony emphasizes contemplation and simplicity. Guests invited to join Yamada in the ceremony included Dr. Robert Johnston, dean of the College of Fine and Applied Arts, and Dr. C.J. Young, vice president of Development. Yamada instructed his guests on the fine points of both drinking tea and acknowledging the tea master and other participants.

The opening also featured several tastings of English "high" tea, Japanese green tea, Chinese informal tea, and herbal teas. The Friends of Ceramics, a community group dedicated to increasing public knowledge of RIT's ceramics and ceramic sculpture department, organized the tastings and provided several of the show's exhibited pieces.

The John T. McIntee, Jr., Scholarship and Lecture Series was established in 1985 by Evelyn Ruth McIntee, his sister. Providing financial assistance to worthy and needy students in the School for American Craftsmen, it also provides funds to bring in accomplished artists and craftsmen to enrich the academic environment.

Registration

The schedule of courses will be available in students' home departments the week of December 12.

Memorial Service

A memorial service will be held at 12:10 p.m., Dec. 6, in the Allen Memorial Chapel, Kilian J. and Caroline F. Schmitt Interfaith Center, for retired electrical engineering professor George W. "Whit" Reed.

Reed died Nov. 3 at his home in Pittsford. He retired from RIT in 1981 after 17 years with the Institute.

New Play Captures Holiday Spirit

The joy and spirit of the holiday season are captured in a new play that will feature life-size and larger-than-life-size puppets, as well as signing and speaking actors.

Night Memories, written by Dr. Bruce Halverson, acting chairman of NTID's Performing Arts Dept., will be presented at 7:30 p.m., Tuesday, Dec. 13, in NTID's Robert F. Panara Theatre. All RIT faculty and staff members are invited to bring their families. Admission is free. For more information call -6250.

BOBST PRINTING DONATION. ... An automatic register control system valued at \$100,000, which measures the accuracy of print on paper, has been contributed to the School of Printing Management and Sciences by the Bobst Group, Inc., of Roseland, N.J. From left are Michael M. D'Angelo, Bobst sales engineer, registoron and electronic equipment; Ed Jansen, Bobst national sales manager; Professor Walter Horne; and Miles Southworth, director of the School of Printing Management and Sciences.
