RIT's Student Government Head Meets with Carter

Albert Thomas, chairman of the Student Directorate (the student government) at RIT, met with President Carter and White House officials on Friday, Feb. 15, to discuss domestic and foreign policy along with student leaders from all parts of the U.S.

Senior members of the White House staff, Security Council members and Domestic Policy staff members met with the invited student leaders in Room 450 of the Old Executive Office Building at 9 a.m. A morning briefing was followed by a question-and-answer period. After lunch, workshop sessions were held in groups of 50.

Registration for the draft, the draft itself, the Russian invasion of Afghanistan, the 1980 Summer Olympics, and funding for colleges were the topics discussed, according to Thomas.

Thomas was clearly impressed by President Carter's interest in the session. He refuted statements that suggested the invitation was merely a political move.

"He spoke to us not as students coming to hear the President but as leaders coming to hear another leader," Thomas said of President Carter. "Even though we might not have been able to change his mind, I really think he wanted to hear how we felt."

Thomas felt he gained a number of insights by participating in the meeting. For example, he felt he could better sympathize with the President's position after an explanation of why President Carter believes registration is necessary but the draft is not right now.

Regarding college funding, Thomas said the most hope for assistance is in

New Dean Is Named For College of Business

Dr. Walter F. McCanna has been named dean of RIT's College of Business. McCanna served as executive vice president and a trustee of the University of Detroit from 1976 until September 1979. He is currently a member of the business faculty there. The appointment culminates a seven-month search during which Dale Gibson served as acting dean, following the resignation of Dr. Edward A. Johnson, now at Texas Christian University.

"Dr. McCanna's rich background of experience offers fresh perspective to the College of Business as we look to the 1980's. I am delighted that we have been able to attract him to RIT," said Dr. Todd H. Bullard, provost.

As executive vice president, Dr.

DR. WALTER F. McCANNA

McCanna played a leading role in expanding the faculty and facilities of Detroit's dental school and increasing state support from \$500,000 to \$2.5 million. McCanna joined the University in 1975 as vice president for business and finance and treasurer.

Dr. McCanna spent seven years with the State of Wisconsin, serving as deputy secretary of the Department of Revenue, director of the Division of State-Local Finance and as the director of the state Division of Budget and Planning.

An alumnus of Marquette University, McCanna returned to his alma mater in 1966 to serve two years as assistant to the academic vice president. He was then named associate provost, a position he served in until 1970. In 1978 he received the distinguished service award from Viterbo College, Wisconsin "in recognition of contributions to the financing of Wisconsin higher education."

"Of course I am very pleased with my appointment as dean of RIT's College of Business," said McCanna, "I am looking forward to working with the faculty in clarifying which areas of the curricula will serve as a management core applicable to all profit and non-profit organizations, including business and industry."

McCanna is an associate professor in the College of Business and Administration at the University of Detroit and emphasized his interest in teaching. "Most of all, I look forward to personally engaging RIT students in the intellectual demands of this discipline."

After completing his undergraduate work at Marquette, McCanna received his Ph.D. from the University of Wisconsin-Madison.

NEWS & NEWSMAKERS

George Georgantas, Mathematics Department, gave a presentation on "Applications of Matrices" recently at Newark Senior High School.

Robert H. Johnston, dean of the College of Fine and Applied Arts, addressed the scientific research society Sigma Xi, Feb. 13 at the University of Rochester. Johnston spoke on "The Application of Xeroradiography to the Study of Archeology," as part of the Distinguished Lecture Series commemorating the 50th Anniversary of the Rochester chapter of Sigma Xi.

Lorraine Mars, field supervisor for West Campus, and Richard Jaus, field supervisor for East Campus, have been named assistant director for West Campus and assistant director for East Campus, respectively.

Andrew Davidhazy, School of Photographic Arts and Sciences, recently received a service award for organizing the display and photosystems demonstration at the Annual Science Exploration Days for high school students which is conducted by the State of New York Science Teachers Association. The award was presented by the Rochester Chapter of the Society of Photographic Scientists and Engineers.

Davidhazy also recently received a grant from the Polaroid Foundation, Inc. valued at \$1,000 to assist him in conducting further research into the development of "Instant" Strip Recording Systems particularly for peripheral and photofinishing systems. The Foundation contributed a sizable amount of film for the project.

Joyce Herman, of the Counseling Center recently conducted a seminar for the Rochester Professional Technical Women on "Mentoring—Myths & Realities." The group is largely composed of scientists and engineers working in Rochester industry.

Ellen Wolf, administrative director of Student Health Services, spoke recently to counselors of Life Line on the subject "Crisis Intervention Counseling Using TTY" for the deaf community.

Bruce A. Austin, CCE instructor, presented a paper at the Western Speech Communication Association Conference in Portland, Ore. Austin's paper, "Television Programming During People's Time," is a content analysis of 30 weeks of TV programming during the 4 to 8 p.m. time period as presented by Rochester's three commercial stations.

College of Fine / Applied Arts Tapped by Oriental Society

The College of Fine and Applied Arts has been selected by the American School of Oriental Research (ASOR) as a corporate member.

CCE at Eisenhower

The College of Continuing Education will offer its third 11-week session of evening classes at Eisenhower College, beginning March 10.

Nine courses will be offered during the spring session including corporation finance, management process, the managerial uses of accounting, issues in law enforcement, materials technology II, survey of computer science, solution of engineering problems II, technology in American history, and research writing.

Registration and advising for the spring session will take place Feb. 17 from 5:30-7:30 p.m. at Rosencranz Hall on the Eisenhower Campus. Late registration will be held during the first week of classes on March 10, 11 and 12 until 7 p.m., also at Rosencranz Hall.

For more information about spring evening courses at Eisenhower College, contact the Registrar's Office at (315) 568-7161.

RIT at Olympics

Gary Griffin, assistant professor in the School for American Craftsmen, was one of the artists representing crafts in America at the 1980 Olympics in Lake Placid.

A neckpiece and three pins made by this Rochester metalsmith were chosen by the American Crafts Council for the special Olympics exhibition.

After the Olympics, the show will travel to the American Craft Museum in New York City. A future international tour of the show is planned by the U. S. State Department.

An internationally known artist, Griffin has received two National Endowment for the Arts grants in recent years and has been selected as a fellowship juror this year for the National Endowment for the Arts. Examples of his work are currently touring Europe in a show of North American jewelry makers.

Founded in the nineteenth century, ASOR has its headquarters in Cambridge, Mass., and is sponsored by the Archeological Institute of America, the American Oriental Society and the Society of Biblical Literature.

As a member of ASOR, RIT joins approximately 140 leading institutions of higher education in the U. S. and Canada, including Cornell, Harvard, Notre Dame, Princeton, Valparaiso, Yale and a large number of theological schools.

Dr. Robert H. Johnston, dean of RIT's College of Fine and Applied Arts, calls it a significant step to have a technical institute selected to join the group. He hopes the membership will open up more opportunities for students to involve their skills first-hand in excavations. Students in both the School of Art and Design and the School for American Craftsmen at RIT will be able to participate.

Members of ASOR pursue a variety of specialized interests in the field of Ancient Near East studies. According to ASOR's charter, its goal is to recover "the life, the literature, the history, the culture, the whole ethos of the Ancient Near East, which gave birth to the civilization that we have developed in the West."

ASOR figured prominently in one of the major manuscript discoveries in history—the Dead Sea Scrolls. On-site research, archeology and field training of students are the main activities of ASOR.

Johnston, one of four paleo-ceramists in the world, has worked with ASOR on a number of digs in the past 10 years as a senior staff member of their field excavation team.

NEWS & EVENTS

Published weekly on Thursday during the academic year by the Communications Office at Rochester Institute of Technology and distributed free of charge to the Institute community. For information call 475-2750.

Itek Donates Gift of Equipment

Itek Corporation has donated a sophisticated new typesetter, the Quadri-tek 1201, to RIT for use in the NTID Printing Production Program laboratory.

"This generous gift helps NTID fulfill its mission of giving deaf RIT students the best technical education possible," said Dr. Jack R. Clarcq, associate vice president of RIT for NTID, in accepting the gift. "It will also help provide your company and the rest of the industry with highly qualified deaf workers."

James F. Higgins, vice president and general manager of Itek's Graphic Products Division, made the presentation during informal ceremonies on the RIT campus, and praised RIT for its success in matching curricula to industry needs. Accompanying Higgins was Brian Cook, manager of Sales/Service Training and Program Development.

Also representing RIT were Dr. William G. Hinkle, associate dean of the Technical and Professional Education Department; and Dr. Richard L. Cattanaach, assistant to the director of NTID.

"We receive many requests for equipment," Higgins said, "but we were impressed with RIT's excellent program and felt that placement here would be the most mutually beneficial."

Several deaf RIT students are doing their co-op work experience at Itek's Jefferson Road facility. One of these students, Ann Fenwick, was responsible for the graphic design of an Itek instructional manual.

Letter to News & Events

Protective Services—you bet I'm a booster. I've always felt so dumb when I've locked my keys in my car. It happened again Feb. 13 at the very time when I had an important personal function to attend off campus. I would have missed the function if it hadn't been for Protective Services. Two officers arrived in minutes and solved the problem. My thanks to the two officers as well as the individuals who staff the information booth. These Protective Services staff members are great representatives of RIT.

Jack F. Smith

James F. Higgins (center), vice president and general manager of Itek's Graphic Products Division, and Brian Cook (left), manager of Sales/Service Training & Program Development, accept thanks from Dr. Jack Clarcq, RIT associate vice president for NTID during informal ceremonies.

NTID student, Ann Fenwick, gaining her RIT cooperative work experience at Itek's Rochester facility.

Donn B. Parker, senior management systems consultant and leading authority on computer crime, emphasizes a point in one of RIT's computer rooms.

Speaker Airs Computer Crime

Institute Forum is much more than just a lecture series.

Donn B. Parker, Institute Forum speaker in February, spent a full day at RIT discussing the growing implications of computer-assisted crime. After talk show appearances on two local TV stations, Parker met with computer science faculty, hosted by assistant professor Bill Stratton.

Criminal justice faculty joined the computer science group and Parker for discussion over lunch, and students from the Computer Science House and RITCUS invited the computer crime expert to dinner.

Following Parker's well-received lecture in Ingle, a continuing education class videotaped yet one more session with this computer consultant and former teacher. The videotape is available in the library.

Institute Forum programs are designed to complement formal education at RIT. Students are encouraged to submit proposals for Complementary Education credit in conjunction with Institute Forum.

\$483,089 Energy Grant

RIT has received first level approval for a \$483,089 federal grant to be used for energy conservation measures on the Rochester campus.

Governor Hugh L. Carey announced state approval of the federal grant with federal approval expected to come by March 15. According to Jon L. Prime, vice president, Finance and Administration, the matching grant will be met with an equal share of RIT dollars to complete three major projects.

"The grant is part of the National Energy Conservation Policy Act of 1978, which earmarked \$7,000,000 state-wide for energy projects at colleges, hospitals and other public buildings," says Prime. "We should be very pleased to have received such a large share of the funds, considering that requests for the money totaled \$36,000,000."

The grant will be used for installation of a microprocessor to monitor and control energy use in most buildings on campus. Prime says the computer will also assist maintenance through detection of malfunctioning equipment and avoiding overloads during peak usage hours.

Other plans include modification of the ventilation system in the Frank E. Gannett Memorial Building (graphic arts & photography) as well as weatherstripping and storm window installation. The James E. Gleason Memorial Building which houses the College of Engineering will receive new light fixtures, weatherstripping and installation of air curtains on all doors.

"We hope to have all the projects completed by next fall and we should see a payback on the costs in energy savings within three to four years," explained Prime.

The grant application was based on a campus-wide energy audit completed by the Institute's Energy Task Force Committee. That committee was chaired by Dr. Bhalchandra Karlekar, new head of the Mechanical Engineering Department in the College of Engineering. Instrumental in the project were William Mets, director of RIT's Physical Plant, and Lodewyk Boyon, assistant director of Physical Plant for Energy.

ALAN R. ZIEGLER

New Advisor for Deferred Giving

Alan R. Ziegler has been named chairman of RIT's Deferred Giving Advisory Committee, succeeding attorney Alan Illig.

The Advisory Committee includes attorneys, life insurance professionals, commercial bank trust officers and members of the securities trading industry. The purpose of the committee is to plan events and activities to familiarize area members of the estate planning community with RIT.

"We have been fortunate to attract outstanding people to this important committee," said Dr. M. Richard Rose, president of RIT. "We thank Alan Illig for his long and untiring interest in RIT, and welcome Alan R. Ziegler to this important service."

Ziegler, founder of Futures Funding Corp., Rochester, an employee benefit consulting firm, currently serves as its vice president and secretary. He is also the vice president of the American Society of Chartered Life Underwriters' local chapter, a member of the Estate Planning Council of Rochester and the Board of Governors of the Genesee Valley Club.

A major activity of RIT's Deferred Giving Advisory Committee is the annual seminar, dinner and address given by Congressman Barber Conable, according to Ziegler. The event, in its sixth year, is scheduled for October on the RIT campus.

\$10,000 Gift From Millers To Aid WITR

Paul Miller, former chairman of the board of Gannett Co., Inc., and his wife Louise, have donated \$10,000 to WITR, RIT's student-run radio station.

The money will be used to assist the station in its efforts to increase broadcasting power from 10 to 1,000 watts. The station has submitted a request for the increase to the Federal Communications Commission (FCC) with approval expected to take six months to a year.

Another major part of the power level increase will be a used transmitter to be donated by WCMF radio, owned by Sconnix Broadcasting Corp. of Laconia, N.H. WCMF General Manager Ted Nixon will turn over the station's standby transmitter once they have completed installation of a new one. RIT has also committed \$10,000 for the purchase of new equipment following FCC approval.

According to WITR student general manager Rudy Bazelmans, about 50 RIT students are involved in the broadcast operations at WITR. The station has a progressive rock sound and extensive news department, featuring special reggae, classical, blue grass, jazz and blues segments. Students are able to learn firsthand the day to day operations of a broadcast facility by staffing WITR 16 hours a day.

Former chairman of the board of Gannett and the Associated Press, Paul Miller serves as a director and executive committee chairman of Gannett Co., and chairman of the Frank E. Gannett Newspaper Foundation. He is also an honorary RIT trustee.

Lt. Col. Victor Keefe (left) looks on as Christopher Olix, a third-year mechanical student, receives a check and congratulations from Dr. M. Richard Rose, RIT president. Olix is the recipient of a \$750 cash award from the American Society of Military Engineers.

Honored by Military Engineers

Christopher Allen Olix, from Hornell, has been selected to receive an award from the Society of American Military Engineers.

Olix is a third-year student in mechanical engineering at RIT. He was selected to receive the award, \$750 in cash, based on his academic record and involvement in campus activities. Only one engineering student per campus is chosen annually to receive the award.

A participant in Army ROTC where he holds the rank of cadet staff sergeant, Olix is a member of Triangle Fraternity and is president of Greek Council, the coordinating council for fraternities and sororities at RIT. He is active in the

American Society of Mechanical Engineers, student chapter, and was co-chairman of RIT Brick Day 1979, a campus-wide social event.

RIT President M. Richard Rose, a colonel in the U.S. Marine Corps Reserves, personally congratulated Olix in a brief ceremony in the President's Office. Lt. Col. Victor Keefe, chief Army ROTC officer at RIT, also was present.

Olix graduated from Hornell Senior High School in 1977 where he was a member of the National Honor Society. As part of his cooperative education plan, he is currently employed by Gould Pumps Inc. in Seneca Falls, N.Y.

International Student Fund Established

A special fund has been established at RIT to provide special services for international students on campus. Norman A. Kramer, a 1927 graduate of the mechanical engineering department, and his wife Dorothy have donated \$20,000 to endow the Norman A. and Dorothy H. Kramer Fund for International Students.

The gift will underwrite special programs and services, including hospitality events, and provide emergency

funds to help equip living quarters for the international students.

The fund will be administered by Dr. Fred Smith, vice president of Student Affairs. Smith says RIT has never had any type of program similar to this.

There are 120 registered international students at RIT this year and an additional 49 resident foreign students, representing 37 countries in all.

Norman Kramer was a 1962 recipient of the RIT Outstanding Alumni Award,

and is a charter member of the Nathaniel Rochester Society.

Beginning his career as an engineer in the business machines industry, Kramer established his own company in Los Angeles and San Diego from which he retired in 1961.

An active church layman, Kramer is also very involved with the Rotary Club, through which he has met many international young people. He and his wife have traveled extensively as well.

EMPLOYEE BENEFITS

Full-time and extended part-time employees wishing to change their Institute health plans may do so, effective May 1. These plans are the Blue Cross and Blue Shield with Blue Million Major Medical, Group Health (The Wilson Health Center), and the RHN Plan.

Blue Cross (Hospital Coverage) provides up to 120 days paid in full room and board for semi-private care. An allowance for 120 days of semi-private care is made for the normal maternity coverage for the mother. Full coverage for x-rays and certain diagnostic procedures when such services are rendered and billed by the out-patient department of the hospital.

Blue Shield (Physician Coverage) provides payment for surgery, in-hospital medical visits and full maternity based on the Blue Shield schedule of allowances. X-rays are covered at 80 percent of the schedule of allowances.

Blue Million (Major Medical), if the above coverage is exhausted, provides for an additional \$1,000,000, subject to the deductible and co-insurance toward semi-private room charges. Certain other diagnostic procedures, along with physician office visits, consultations, ambulance service and prescription drugs are covered at 80 percent after a \$100 deductible has been satisfied per individual per calendar year.

The cost for a hearing aid is reimbursed at 80 percent up to a \$200 lifetime maximum, after the \$100 deductible has been met. This is a one time only reimbursement.

Effective May 1, RIT employees will have the opportunity to join Group Health. A representative will be available on March 14 and March 17 between 9 a.m. and 3 p.m. in the 1829 Room to explain the plan and answer questions. Group Health has applied for a rate adjustment and, if approved, will require an increase in March's payroll deductions. RIT continues to participate in this benefit program on a sharing basis. For further information, contact Betty Bianchi, Ext. 2429.

Group Health is a comprehensive prepaid medical group practice plan providing personal continuous day to day care as well as hospitalization. Group Health provides 24-hour emergency coverage and the convenience of a central health facility for the whole family.

Members choose a personal physician from the staff of specialists at the Joseph C. Wilson Center (800 Carter St.). For services received at the Health Center, Group Health provides physicals, eye examinations, pediatric care, routine office visits, etc. Members pay a \$30 registration fee for all services received on the same day. In addition to the medical staff, the Health Center has its own facilities for outpatient surgery, casting, x-ray, EKG and a pharmacy and optical shop for the member's convenience.

The RHN Plan is designed to bring family-centered, personalized health care within easy reach of nearly all area residents. The RHN Plan has several medical centers staffed by physicians who specialize in primary care. When medically necessary, the center physicians make referrals to other specialists in the community. Members select their personal physicians from the staff of their health center. The RHN Plan benefits include hospitalization, office visits, periodic physicals, well baby care and eye examinations.

Group Health offers a tour of the Joseph C. Wilson Center, 800 Carter St., every Wednesday evening. Tours begin at 5:30 p.m. and run every half hour until 8 p.m. For a tour of the RHN Plan Health Center you are interested in, call 442-0100. It is advisable that you take a tour of the center of your choice to better acquaint yourself with all the services available to you and your family. A representative from both plans will be available on March 14 and March 17 in the 1829 Room to answer questions and provide information about the plans.

Students Use City As Classroom

On Monday, Jan. 21, a group of 26 RIT Hotel Administration students checked into the Americana Rochester Hotel for a three-day sales blitz. The purpose of this project was to give the hotel students practical experience in marketing and personal selling, while at the same time promoting package plans for the hotel in the Rochester area.

The project coordinator was Professor Frank Bucci, with cooperation from managers of the hotel, David LaGarace, general manager; Tony Amico, sales director, and Larry Shaffer, food/beverage director.

The project began with a tour of the hotel's facilities and dinner meeting describing the hotel's package plans, which also included a "crash" course in personal selling. Students were introduced to various members of the hotel's sales staff, and were given specific regions in the Rochester area to call upon.

Each day the project began with a breakfast meeting in which questions were dealt with. The students then departed from the hotel, returning late that afternoon. The day concluded with a dinner meeting in which each group discussed the day's events.

The blitz concluded on Jan. 24 with a final business session in which the students evaluated the quality of both the program and the hotel's facilities.

DATEBOOK

thru Feb. 28—"Collographs, Photography and New Directions in Printmaking," Bevier Gallery. Gallery hours: daily, 9 a.m.-4 p.m., Mon.-Thurs. 7-9 p.m., Saturday 1-5 p.m., Sunday 2-5 p.m.

Mar. 5—"Join the Professors," "Twelfth Night" lecture-discussion, Professor Mark Anderson, Department of English at SUNY Brockport. Lecture will be held at 7:30 p.m. in the Nazareth Arts Center, Room A-137 Nazareth College. Subscription fee for the seven lecture series will be \$15, with tickets at the door for \$2.50.

thru March 7—Art Without Money, an exhibition by Janet Braun-Reinitz, Eisenhower Gallery, Mamie Doud Eisenhower Hall. Gallery

hours: Weekdays 10 a.m.-5 p.m.
thru March 13—Paintings by Emily Joseph, Gallery 1½, Wallace Memorial Library. Library hours—Mon.-Thur. 8 a.m.-11 p.m., Fri. 8 a.m.-6 p.m., Sat. 9 a.m.-6 p.m., Sun. noon-9 p.m.
Feb. 28—Men's Swimming, UNYS Champs, TBA.

Feb. 29—Men's Swimming, UNYS Champs, TBA.

Feb. 29—Wrestling, at NCAAs, 10 p.m.

Mar. 1—Wrestling, at NCAAs, 10 p.m.

Mar. 1—Men's Swimming, UNYS Champs, TBA.

Mar. 2—Rifle, NCAA Sectionals at West Point, 8 p.m.

*IRAC Contest

PROFILE

Staff Couple Retiring Together

Gladys and Bill Lamb will be retiring this week after a total of 26 years of service to RIT. The Lambs joined the Institute staff in 1967—Bill in February and Gladys in May—and have worked at both the old downtown campus and the new campus. They've also seen three different presidents at RIT—Mark Ellingson, Paul Miller and M. Richard Rose.

Bill, who "loves to tinker" started with RIT as an engineer, then became a plumber, and for the past three years was a locksmith for Campus Services. Bill and senior locksmith John Dehaan are responsible for making new keys, changing locks and making signage (name plates and numbers) for the entire Institute.

There were weeks, says Bill, when he made between 2-3,000 keys. One week last summer 2,100 rooms needed new locks and keys. "For security reasons lock changes are periodically made for all rooms," Bill says.

Many times he's been called upon to rescue someone who forgot their keys or locked them inside their office. Sometimes Bill's had to pick locks, a skill he "acquired through trial and error," he claims. And then he grudgingly admits to a few occasions when he had to break down a door to gain entry into a room because the master key wasn't available.

Repairing locks is a large part of Bill's job, especially after a big campus weekend. He's found everything from paper clips to epoxy glue jammed in the locks which he must repair.

Although key making is a relatively easy task for him, it's the required paperwork that delays the process. Each key request must be approved by the department supervisor of the person asking for the key, then the request is sent to Protective Services who records the request, and finally it's sent on to Physical Plant where Bill takes over. Once the keys are made, the process is reversed.

Bill's wife Gladys is the supervisor of the incoming mailroom in Building 99. Gladys decided to go back to work after her son joined the armed service. She

was looking for a job that would be challenging and knew she'd come to the right place when she interviewed for the mailroom position. "I love getting mail and I knew I could help organize the Institute's mail services," she says.

Bill says she will probably really miss the mailroom because the first thing she does when she gets home is to check the mailbox to see what came that day.

Gladys also loves a mystery and tracking down a special delivery letter recipient is a challenge she really enjoys. Gladys is also responsible for opening all mail that is insufficiently addressed to RIT to determine where it should be sent. Because of the volume of mail

coming into the Institute, this can be as many as 100 letters to open and re-direct each day. Gladys also supervises a staff of two full-time assistants.

The Lambs are looking forward to retirement as a "time to travel, fix up their house in Rochester and pursue their hobby of antiquing." Gladys collects depression glass and Bill is proud of his collection of antique glass baskets.

Institute members who would like to wish Bill and Gladys a happy retirement are invited to join them on Thursday, February 28, 3 p.m. at the Physical Plant Offices in Building 99.

RECREATION HOURS

Listed below are the operational hours for the Physical Education and Athletic Facilities for the Winter/Spring Quarter break. The schedule will go into effect on Friday, Feb. 29, and continue through Sunday, March 9. At the conclusion of the vacation period, the normal operational hours will resume.

Please note that gym security will be closely checking identifications of all persons entering the facility. Those who do not adhere to his rule will not be allowed to use the facility. This rule will be strictly enforced throughout the remainder of the academic year.

Institute Honors Chapman

Albert K. Chapman, former president and chairman of the board of directors of Eastman Kodak Co., has received RIT's Presidential Medallion for exceptional service to the Institute.

Chapman was honored for more than 50 years of service on RIT's Board of Trustees. He joined the Board in 1930, the year RIT's internationally known School of Photographic Arts and Sciences was begun.

During his tenure on the Board, he was active on the nominating, steering, and planning committees and was involved in the development of RIT's new campus in the 1960's. From 1944 to 1954, he was secretary of the Board and served as a member of the executive committee.

The Presidential Medallion was presented to Chapman by RIT's President M. Richard Rose, who cited Chapman's long years of service to the Institute and support of other civic enterprises. "Thousands of young people have benefitted from his service to education," Rose said.

Thomas...

Continued From Page 1

the area of increased work-study programs.

Thomas, a fourth year computer science major, was the only student leader from the Rochester area invited to attend the White House meeting.

The full-day briefing was the first of its kind, according to a spokesperson for Anne Wexler, assistant to the President. "The active involvement and thoughtful response of student leaders are important to the critical issues facing our nation," according to the mailgram Thomas received from Wexler's office.

Thomas had met with RIT President M. Richard Rose and administrators and faculty to prepare for the White House event. Once he received the invitation,

he began reading papers and books on foreign and domestic policy, especially as they relate to students. He also discussed the subject with individual students and student organizations at RIT.

"I feel I had a solid information base to take to the meeting with me," Thomas said.

BOOKSTORE HOURS DURING BREAK

- Mon., March 3—8:30 a.m. to 4:30 p.m.
- Tues., March 4—8:30 a.m. to 8 p.m.
(CCE Registration)
- Wed., March 5—8:30 a.m. to 8 p.m.
(CCE Registration)
- Thurs., March 6—8:30 a.m. to 4:30 p.m.
- Fri., March 7—8:30 a.m. to 4:30 p.m.
- Sat., March 8—Closed

Sybron Visitors

RIT will open its doors to the employees and families of Sybron Corporation on Sunday, March 9. Events of the day will include a figure skating exhibition by the Genesee Figure Skating Club, followed by open skating and instruction, game room activities in the College Union, open swimming, tours of NTID and the Science and Engineering Buildings, a presentation by Admissions and CCE on "Exploring Careers," a performance by the NTID Theatre, and a reception in the NTID Dining Commons.
