New Facilities To Be Featured In Display

A display depicting all aspects of the new buildings which will be the home of NTID will be presented to the Institute community June 21 and 22 in the College-Alumni Union.

In addition to a model of the new complex, there will be artist renderings, detailed sketches and three-dimensional views of the interiors, architectural plans for landscaping and other literature.

The \$24 million complex, expected to be completed and partially occupied by the Spring of 1974, consists of a three-wing dormitory complex, a dining hall and academic building.

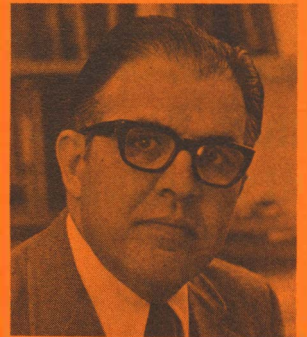

The architects, Hugh Stubbins and Associates of Cambridge, Mass., were challenged to design buildings that would fit in with the existing architecture on the RIT campus while at the same time provide many special architectural considerations expected to have major effects on the learning process of NTID students.

The entire learning environment will be built as an aid to education.

In the residence hall rooms, a modular building block concept will be employed so that all furnishings can be arranged in

Paliouras Named New Science Dean

Dr. John D. Paliouras has been chosen associate dean of the College of Science at RIT, effective July 1.

Dr. Paliouras, 44, an associate professor, has taught mathematics to all levels of students for eight years at RIT. He will continue to teach along with his new responsibilities as associate dean.

"Dr. Paliouras is held in the highest esteem by faculty and students and I am confident that in his new role he will contribute greatly to the further development of the College and the Institute," said Dr. Thomas P. Wallace, dean of the College of Science.

Greek born, Dr. Paliouras came to

Computer Science Head Named

Dr. Richard Cheng, currently assistant professor of computer science at Hunter College, has been named acting chairman of the department of computer science and technology at RIT.

Dr. Cheng, a native of Nanking in the Republic of China, holds a Ph.D. in computer science and an M.S. in electrical engineering from the University of Illinois at Urbana; an M.S. in industrial education from the University of Wisconsin at Menomonie; and a B.S. in industrial education/physics from National Taiwan University.

Prior to his position at Hunter, Dr. Cheng taught and did research at the University of Wisconsin and the University of Illinois.

Photo Student Gets Frisina Award

David G. Smith, (Center) a freshman photography student, became the first recipient of the D. Robert Frisina Prize, Friday, June 1.

The prize will be presented annually to the RIT student, hearing or deaf, who shows "unusual interest in and dedication to the furtherance of higher education for the deaf," Dr. Paul Miller said.

Dr. Frisina congratulated Smith and said the prize would accent the importance of student contribution to the growth and development of deaf education.

Art Student Wins RSCA Prize

Ms. Patricia Ann Moore has been awarded the \$1,500 Joseph Thuringer Scholarship by the Rochester Society of the Communicating Arts (RSCA).

Ms. Moore, daughter of Mr. and Mrs. Ivan Moore, is an industrial/ environmental design major in the department of communication design of the College of Fine and Applied Arts at RIT. She will be a senior next year.

"In viewing America, my concerns are with humanizing the products, environment, and lifestyles of her citizens," Ms. Moore said. She said after graduation she hopes to be able to aid "people to better relate to each other via more satisfying environs, and through what they see, feel, and consume."

The award was presented at the RSCA 1973 awards banquet Friday, June 22.

"Receiving an award such as this is the first step in your journey into the future," said RSCA Vice President Robert Shaffer Kerr. "We have reaffirmed through this award our hope in the future of the communicating arts."

Women's Club Announces 1973 Scholarship Winners

RIT Women's Club President Ms. Betty Glasenapp last week announced the winners of three Women's Club scholarships for 1973.

Photo student Ms. Claude De Backer received \$1,000; Social Work student Ms. Diane Kraus received \$500; and Fine Arts student Ms. Laura Stoviak received \$500.

Ms. Glasenapp said the Women's Council also contributed \$400 to the Horton Child Care Center for their scholarship fund.

She said the following women have been elected to the Women's Council for the coming year: Mrs. William Stevenson - 2nd Vice President; Mrs. David Hooten - 3rd Vice President; Mrs. Todd Bullard - 4th Vice President; Mrs. Joseph Greenfield - Treasurer.

Some Faculty, Staff May Get Social Security Benefits

The personnel department reminds faculty and staff who are 62 years old and work less than 12 months a year, that they may qualify for benefits from Social Security for the months they earn no salary.

Any benefits received during this time would reduce slightly future Social Security payments.

To obtain further information please visit or call: Social Security Administration Office, 107 Clinton Ave. North, Rochester, New York, 325-6640.

Paliouras

the United States in 1957 to attend Alfred University, where he received a B.A. degree. He has the M.A. and Ph.D. degrees from the University of Illinois.

The McMillan Publishing Company will soon publish a book Dr. Paliouras has written on "Complex Variables."

He is a member of the Mathematical Association of America and the Sigma Xi Society and adviser to the Alpha Phi Omega service fraternity at RIT.

He and his wife, Patricia, a home economist, have two daughters, Eleni, 6, and Christina, 4.

Dr. Paliouras succeeds Dr. Wallace as associate dean.

whatever way the student wants to fit his individual needs and interests. In the dining area, round tables will be used rather than traditional rectangular and square tables to permit more communication among students.

Computer assisted instruction and closed-circuit television terminals will be installed in residence halls. An emergency warning and signaling system using strobe lights will be installed. The device can be used to awaken the deaf students in case of emergency.

Classrooms, shops and laboratories have controlled lighting and vibration-control devices to decrease distracting noises and increase visual efficiency of deaf students.

A variety of technical equipment will be needed in laboratories, shops and studios to make the new complex a complete learning experience for deaf students.

The new buildings combine both unique and the common educational features designed to enhance the prospects of deaf and hearing to learn and grow together.

Photo Seminar Set In September

The Photographic Process as a Scientific Instrument, an intensive five-day program designed to assist engineers, scientists, and technicians in applying photographic technology to the acquisition of data, and to provide information on the photographic process and image necessary in the employment of photographic technology, will be held at RIT from Sept. 17 to 21, and repeated Nov. 12 to 16, 1973.

Registration is open, although a B.S degree or equivalent experience in physics, engineering, or chemistry is desirable.

For specific content of the program or tuition information, contact Dr. Ronald Francis, Program Chairman, College of Graphic Arts and Photography, 464-2758.

The next edition of News & Events will cover the period July 6 through July 19. The deadline for material to be included in that issue is Monday, July 2. Call 464-2330 for more information.

Students Get ROTC Commissions

Three students enrolled in Rochester Institute of Technology's Reserve Officer's Training Corps (ROTC) program were commissioned in formal ceremonies shortly before graduation this month.

At ceremony, above, are (left to right): Maj. John R. Dethorn; Grant Truesdale, a mechanical technology student; Robert Benner, a graduate student at the University of Rochester; and Michael Krause, a printing student.

The students received their commissions as Second Lieutenants in the Army after their service in the ROTC program.

Student Wins Champion Papers' Scholarship

Ms. Julie Roehm, 16 Lincoln Ave., Pittsford, is one of 13 national winners of the Champion Papers' Imagination Scholarship.

Julie is a junior in the Communication Design program in the College of Fine and Applied Arts at RIT.

The scholarship entitles her to spend two weeks in an intensive orientation to printing production and technology at the Graphic Arts Technical Foundation in Pittsburgh, Pa.

"The Imagination scholarship's intention," according to Champion Papers, is to "bring printer and designer closer together."

"Through years of association and the exchange of ideas with graphic artists and designers on one hand, and printing executives on the other, we have been made acutely aware of the vital need for more meaningful communication between printer and designer," a Champion spokesman said.

The scholarship is designed to provide student designers with the opportunity of becoming more familiar with the printer's art.
