

Rochester's Future

RIT To Host Urban Policy Talks

More than 100 area government, business and community leaders will examine alternative future policies for the Greater Rochester area during a series of major Urban Policy conferences at the RIT Urban Center beginning Feb. 10.

The conference will be conducted by the Brookings Institution, an independent, non-partisan research organization, and held under the sponsorship of RIT, the Rochester Center for Governmental and Community Research, and the Industrial Management Council.

The Brookings Institution is a private, Washington based organization devoted to research, education, and publication in economics, government, foreign policy and the social sciences. Its principal purposes are to aid in

the development of sound local public policies and to promote the public understanding of issues of national importance as they relate to local policies.

Through a series of 13 one-day meetings, the 100 seminar participants, working in two groups, will study the results of recent policy research on urban and metropolitan development and how it relates to the development of Greater Rochester.

"A conference of this scope, run by an institution as respected as Brookings, will give Rochester leaders the opportunity to view with historical perspective where Rochester stands in a variety of critical areas," Arthur L.

Reston Brings a Look At China to RIT

New York Times Pulitzer Prize-winning columnist James Reston (second from left) and Edward P. Curtis, Jr. (left), RIT vice president for public affairs, conduct a press conference with area college student editors prior to Reston's talk to an overflow audience in the Ingle Auditorium Jan. 17. Reston spoke on the "Emergence of China" and President Nixon's planned visit there in February. An estimated 1,000 persons attended Mr. Reston's RIT presentation.

RIT To Host Urban Policy Talks

(Continued from page 1)

Stern, chairman of the RIT Board of Trustees, said in announcing the conference.

"This conference will bring together, for the first time, leaders from government, industry and the community," added Craig Smith, director of the Rochester Center for Governmental and Community Research. "We feel the meetings will result in positive direction for Rochester's future."

"Our intense interest in this conference stems from what we believe to be the increasing need for business

involvement in problems facing the community and in policy and management issues in the governmental sector," said John D. Hostutler, general manager of the Industrial Management Council.

"There is no question that RIT, in its 142 years in the Rochester community has had a strong, continuing role in shaping the development of this area," Paul A. Miller, RIT president, said. "We see our sponsorship of this conference as the logical extension of the leadership role. Our future, as a matter of course, lies with the future of Rochester."

As a support program for the conference, the Brookings staff will contact 500 area residents prior to the start of the seminar series to gather objective data and opinion on past events and their probable impact on the future development of Greater Rochester.

"The conference participants and Brookings staff will use this data to help project the political, social, economic and environmental conditions that can be expected in the Rochester area during the two time periods 1971-1975 and 1975-1980," Edward P. Curtis, Jr., vice president for RIT Public Affairs, said.

"In effect," he added, "we'll be gathering and analyzing information on how the urbanization process affects such policy issues as housing, transportation, finance, education, and others. Then we'll try to determine where we'll be in these various areas of concern in five or ten years, if we continue under present policies."

"If, based on the research and discussions, the conference participants determine we're not headed in the right direction, they will outline alternative futures that appear more beneficial to the Greater Rochester area," Curtis remarked.

With the Women

RIT Women's Club News

CULTURE CLUB

Deadline for reservations is Feb. 5 for the free tour, Feb. 9 of the Eastman House, starting at 1:30 a.m. Call Thelma Todd, 328-7625.
