

N·E·W·S & E·V·E·N·T·S

RIT Selected for New Air Force ROTC Program

The United States Air Force has selected RIT from more than 120 universities from around the country to host a new Reserve Officers Training Corps (ROTC) program. While headquartered at RIT students enrolling in any Rochester area college or university will be eligible for the program.

According to Brigadier General William J. Grove Jr., commandant of Air Force ROTC, "The quality of Rochester Institute of Technology's programs and its graduates is well known. I am looking forward to a long and mutually beneficial association with this fine institution."

The Air Force ROTC program at RIT will begin accepting students in the fall of 1985 and expects to enroll around 50 students during the first year. As many as 40 of those students could be on full Air Force scholarships.

The Air Force awards 7,500 scholarships nationwide to students in the program, primarily centered in the engineering, scientific and technical fields. "When we consider a school to host an Air Force ROTC unit, we look at the enrollment, academic excellence, the types of academic degrees awarded and the general receptivity of the school's faculty, staff and students to an Air Force ROTC unit," explained Major Thomas J. Boyd, Air Force ROTC admissions counselor at Syracuse University.

"RIT has a long history of educating leaders in the technical and scientific fields, and we feel the U.S. Air Force is in excellent position to utilize those graduates in their

Shown are RIT President M. Richard Rose, Major Thomas J. Boyd, Col. William D. McColl and Dr. Thomas Plough, vice president, Academic Affairs.

many exciting programs, such as the space shuttle project and others," said RIT President, Dr. M. Richard Rose.

Rose also explained that the Air Force ROTC program will benefit not only RIT, but all area colleges and universities. "While the Air Force program will be located at

RIT, students from all colleges in the Rochester Area College Consortium will be eligible to participate and the scholarship incentives will attract even more quality students to the Rochester area."

The Air Force ROTC program is hosted by 152 universities around the country

including the two newest units, RIT and the University of Texas at San Antonio. In addition to students' normal course of study, they will take courses in Air Force history, the organization of the Department of Defense, leadership and management and national defense policy. Students also meet weekly for a leadership lab consisting of military training.

For those students who are awarded full scholarships, the Air Force provides coverage for complete tuition expenses, reimbursement for textbooks, laboratory and other academic fees and a non-taxable \$100 monthly allowance during the school year.

Upon graduation from RIT, students will be commissioned as second lieutenants in the U.S. Air Force and serve four years on active duty. Those who choose pilot or navigator status will serve seven or six years on active duty, respectively.

While students will not enroll in the program at RIT until 1985, Air Force officers will be present at RIT beginning in September 1984 for recruitment purposes.

RIT has hosted an Army ROTC program on campus since 1969 and approximately 3,000 students have gone through it in the past 15 years. Currently 114 students are enrolled and their numbers continue to increase every year.

According to Major Boyd, national Air Force ROTC enrollment for the 1983-84 academic year is 26,081, the highest enrollment since 1970.

Experts Convene on Communication Issues in Post-Industrial Age

Experts of sociology, education, philosophy, graphic design, visual communication, photography and linguistics will convene April 25-27 at RIT to participate in the international symposium, "Communication in the Post-Industrial Age."

Dr. Mihai Nadin, the William A. Kern Professor in Communications, College of Liberal Arts, organized the conference to investigate communications issues on an interdisciplinary basis.

"Communication in our time, the Post-Industrial Age, has become critical because of the proliferation of media and messages in our culture," says Dr. Nadin.

"We need to provide a better understanding of what elements are shaping communication. Ours is an era in which issues related to communication—between individuals, social and political groups, the generations, and, most especially, between man and machine—have become critical."

Two presentations and an exhibit will be special events at the symposium.

Dr. John Ciampa, founder of the American Video Institute and director of that not-for-profit corporation now a part of RIT, will present "Videodisc and Communication." Ciampa also will give a lecture, "The Semiosis of Selecting the Medium and Adapting the Message."

The other presentation will be on computer imaging processing, a demonstration of a designer workstation by Artronics, Inc.

The exhibit will be a semiotic analysis (how signs and symbols relate the message) of a printed ad.

Symposium speakers will include Nadin, founder and director of the Institute for Visual Communication and Semiotics as well as professor in the liberal arts and design divisions of the Rhode Island School of Design, Providence.

Other presenters will be specialists in their fields, from RIT, from colleges and universities in the United States, Canada and Germany.

RIT faculty, staff and students interested in attending the three-day symposium will pay a special rate of \$30 and should contact Val Johnson, seminar coordinator, at the Technical and Education Center, 2758.

Recognition Receptions Planned for Graduates

Dr. Thomas Plough, vice president for Academic Affairs, has announced that beginning in Fall 1984, RIT will host formal graduation receptions for students who complete their degree requirements in the Fall or Winter quarters.

Plough, explains, "Approximately 900 students complete their programs in the fall and winter and these receptions are one way to ensure that they have a proper exit from RIT."

According to Plough, in the past these students did not receive their diplomas until after Commencement ceremonies in the spring. Graduating students will be sent their diplomas as soon as they are certified by the faculty as having met all the requirements for their degrees.

The dates scheduled for these receptions during the 1984-85 academic year are November 9, 1984, and February 15, 1985.

A CANDLE-LIT NIGHT...Nathaniel Rochester Society Award recipients F. Ritter Shumway, above left center, and Hettie L. Shumway admire the NRS Award presented by RIT President M. Richard Rose. At left is NRS co-chairman Alfred M. Hallenbeck. The award was created by Leonard Urso, award winning silversmith and assistant professor in the School for American Craftsmen. Below, more than 125 students in RIT's School of Food, Hotel and Tourism Management planned, prepared and presented the 1984 NRS dinner held in the Hettie L. Shumway Dining Commons.

PROFILE

He Recruits Students For Printing, Photography

If variety is the spice of life, then Richard Marsden's life at RIT is highly seasoned.

Marsden is coordinator of academic program services in the College of Graphic Arts and Photography, home of the School of Printing and the School of Photographic Arts and Sciences.

From coordinating with faculty and representing the college at schools to welcoming visitors to the college, Marsden approaches his smorgasbord of responsibilities with enthusiasm.

"My job is to support both schools," he says. "When I first joined the college, I knew little or nothing about printing or photography. I don't know if that's a plus or a minus," he laughs. "The faculties of both schools have been supportive of my work."

Specifically, Marsden works with recruitment, retention and articulation projects for the college.

"Right now I'm working on articulation agreements between the School of Photographic Arts and Sciences and several two-year colleges." He explains that articulation agreements help students transferring in at the junior level because, through the agreements, RIT will recognize and give credit for a student's two years of courses at specific junior colleges.

"A lot of my work for the School of Printing involves visiting schools and explaining to students and guidance counselors what the modern-day printing industry really is. I tell them that printing is management, not the hands-on trade it used to be.

"So many people in education think that graphic arts is the same thing as graphic design. I explain that printing is graphic arts."

Along with going out to schools to explain the programs in the College of Graphic Arts and Photography, Marsden also takes visitors and groups on tours of the college. "People are overwhelmed with the facilities we have at RIT. When they see the facilities, they realize how students can use their math and science backgrounds in our programs. Printing and applied computer science, printing systems and engineering, imaging and photographic science, biomedical photography and technical photography all are strenuous, rigorous programs that give students a chance to apply math and science. They are all good options for people who want to use math and science in a practical way."

Marsden also speaks with enthusiasm about the college's programs in professional photographic illustration, film and television, newspaper production management and printing.

Although Marsden joined the College of Graphic Arts and Photography in November, his association with RIT goes back several years. In 1981 he came to the Institute to work on his master's degree in career and human resource development.

Before coming to RIT, he was an admissions counselor at SUNY Oswego for three years. "I could see that I needed more education," he explains. He said the career and human resource development degree looked

like a great program. He completed his requirements for the degree last spring.

While a student, Marsden was active with the Veterans Club and served as the liaison between the Veterans Affairs office and Admissions.

He also bought a house in Hamlin where he enjoys gardening. Fishing, bicycling, sports and writing also occupy Marsden's leisure time.

'My work involves visiting schools and explaining what the modern-day printing industry really is.'

A veteran of the U.S. Army, he served in Germany, Ethiopia and Saudi Arabia. He enjoyed the travel and says he hopes to be able to do some traveling on behalf of the college during the next year.

Right now Marsden is organizing a speakers bureau for faculty members in the college to speak at community groups. "I've been pleased with the response from the faculty."

Marsden is working with Gamma Epsilon Tau, the printing honorary fraternity, to train members to serve as tour guides for the college. "The kids really know their school and the college, but we want to make sure they're all saying the same thing."

Dr. Nystrom To Deliver Kearsse Lecture

Dr. Dennis Nystrom, dean of the College of Applied Science and Technology, will give the address for the College of Liberal Arts Kearsse Distinguished Lecture and Student Honor Awards at 4 p.m., Monday, April 23, in Webb Auditorium. Established in 1980, the awards commemorate Henry J. and Mary Kearsse.

Describing his talk, "The Courage to Succeed," Nystrom notes that "Career success is often an elusive goal for many professional people. Achieving it requires commitment, sacrifice and personal courage. It also demands that individuals have a clear understanding of their environment, the changing paradigm of work, the nature of personal risks involved and, above all, the need for continuous, life-long involvement in learning."

Dr. Robert E. Golden, College of Liberal Arts associate dean, observing that the person chosen to give the lecture is usually from another university said, "We in Liberal Arts are very pleased to have the dean of another college at RIT give this address because we feel it exemplifies the close relationship of the College of Liberal Arts and other colleges on the campus."

Four students will be honored at the ceremony for their outstanding research papers and projects in areas of study in the College of Liberal Arts. Each student will receive a letter certifying the award and a check for \$100.

Awards will be presented Kevin Kearney, College of Science; Richard Maile, College of Business; Lori Vaskalis and Deborah Wilcox, College of Fine and Applied Arts.

NTID Honors Inventor, Dr. Robert Weitbrecht

NTID will honor the late Dr. Robert Weitbrecht at an April 30 ceremony.

Dr. Weitbrecht invented an acoustic coupler that permits hearing-impaired persons to connect telecommunication devices (TDDs) to regular telephone lines. NTID will name its telecommunication laboratory classroom in memory of Dr. Weitbrecht.

Engineering Tech Sets Microprocessor Seminars

A series of five applications oriented seminars on microprocessors, a seminar on digital signal processing and a seminar on advanced digital electronics have been announced by the School of Engineering Technology in RIT's College of Applied Science and Technology.

The microprocessor seminars are designed for, but are not limited to, practicing engineers and educators, others who may use microprocessors in their jobs, or those who are interested in learning more about the technical applications of microprocessors.

Program content will range from basic seminars for individuals with little or no previous experience with microprocessors to advanced seminars for individuals with some background in 8-bit or 16-bit micros.

The microprocessor seminars and dates are: Basic 6800, May 21-25; Advanced 6800, May 29-June 1; Basic 8085, June 4-8; Advanced 8085, June 11-15; and 8086/88, June 11-15.

The Advanced Digital Electronics seminar will be held June 4-8 and is primarily for engineers who desire to improve their skills in digital electronics. Topics include ALUs, static and dynamic RAMs, logic analyzers, CRT drivers and controllers, microprocessing interfacing and computer design.

The signal processing seminar is titled "Introduction to Linear Systems and Digital Signal Processing" and is scheduled for May 21-25. The seminar is designed to provide a background on linear systems concepts as well as techniques used in digital signal processing. Applications in audio, communications, radar, speech and the medical field will be covered. Several Fortran and Pascal programs on RIT's DEC VAX 11/780 computers will be utilized in applying the concepts of digital signal processing.

All equipment and materials used by seminar participants will be supplied by RIT.

Additional information on the seminars may be obtained by contacting Yvonne, Fish, School of Engineering Technology.

Search Underway For New Coaches

Brian Mason, men's hockey coach, and Bill Tierney, head lacrosse coach at RIT, will be leaving the Institute. Mason has accepted the head coaching position at Division I Dartmouth University. Tierney will assume duties as head soccer coach and assistant lacrosse coach at Johns Hopkins University, where lacrosse is a Division I sport.

Mason guided the RIT hockey program for four years. In that time, he won 84 contests while losing 35 and tying one. Last year RIT won the NCAA Division II championship. This year the Tigers captured the Eastern College Athletic Conference (ECAC) West Region title and finished third in the NCAAs. The past two seasons RIT has won the New York College Hockey Association crown.

Tierney is completing his third season at RIT. Prior to this year, he guided RIT to a 21-5 record and two Independent College Athletic Conference titles. Last year RIT advanced to the NCAA playoffs for the first time. This year the Tiger stickmen were 4-1 entering competition this week.

Search committees have been formed to replace Mason and Tierney, according to Lou Spiotti, director of Intercollegiate Athletics. New coaches are expected to be named prior to the conclusion of the school year.

Writing Workshop Hones Skills

If your job demands more writing than you bargained for, you may be a candidate for a Learning Development Center workshop on Basics of Effective Business Writing.

Dr. Martha Cummings will review, with a group of 15 RIT professional staff, the essentials of writing letters, memos, and reports from 9 a.m. to 4 p.m. Friday, June 1. Her presentation will cover principles of effective writing, analyzing purpose and audience, organization, effective language, revising and rewriting, errors and editing. In addition, participants will receive a professional critique of their writing.

If you are interested in participating in the writing workshop, call Elaine LaDue, 6090, before Tuesday, May 1. The first 15 registrants will be contacted and given further details about the workshop, including where to send their writing samples.

Fee for the workshop is \$50.

Gifts to RIT

The following gifts, at or above \$1,000 in value, were received by RIT during the week of April 5th-April 11th.

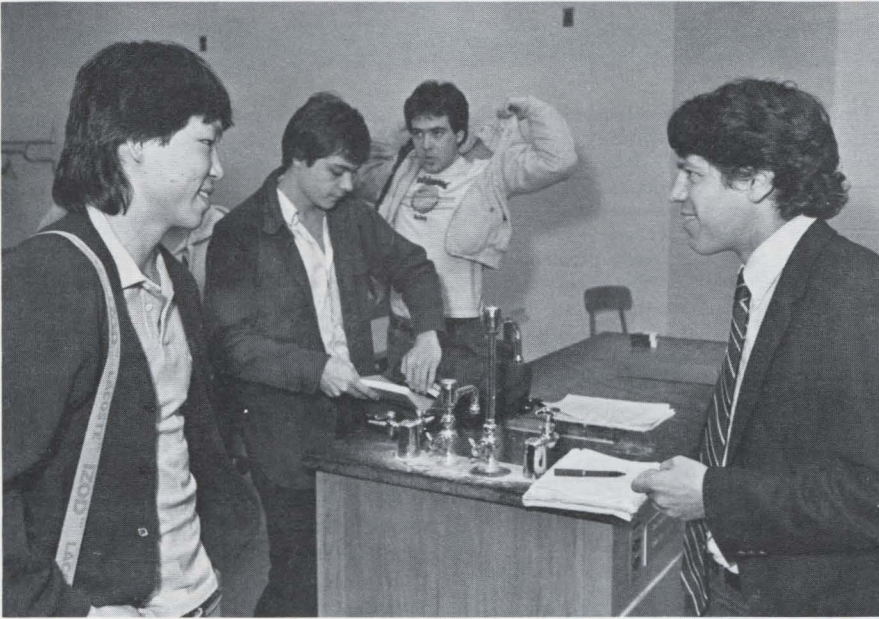

Unrestricted	\$1,000
	\$5,000

Activities Board Plans Dinner Theatre

The College Activities Board is sponsoring a dinner theatre Monday, April 23, in the cafeteria, College-Alumni Union.

Alpha-Omega Players of the Repertory Theatre of America will stage "Same Time Next Year" after dinner that will begin at 6:30 p.m. Terrence James, CAB cultural director, said tickets are \$5 for RIT students, faculty and staff and \$7 for others, including Rochester area college students.

CHOOSE LIFE FOR HUMANITY—Paul Loeb, author of *Nuclear Culture* and Institute Forum speaker April 11, right, tells students that "there is hope for the survival of our species. That hope consists of the actions of ordinary citizens who feel they must do something to halt the nuclear arms race. They start talking, meeting, writing letters and, all of sudden, there's a shift in thinking about what can happen when it's three minutes to midnight." It will be our choices that determine if we survive. Disarmament is a movement for life.

Tuesday's Reception Celebrates Employees' RIT Anniversaries

RIT employees who have been at the Institute for 20, 15, 10 and five years will be honored at a reception from 3:30 to 5 p.m., Tuesday, April 24, in the Lyndon Baines Johnson Building, NTID.

Among those who mark employment anniversaries between October 1983 and March 1984 is Dr. M. Richard Rose who became RIT president Jan. 1, 1979.

Celebrating 20th anniversaries are Reno Antonietti, Instructional Media Services; Felix Moratti, Physical Plant; Ann Pompili, Library; Kathleen Chajchuk, NTID.

Marking 15th anniversaries: Frances Closser, Physical Plant; Joseph Valvano, Dorothy Lipford, both Residence Life; Helen Brabant, Health Services; Brenda Reimherr, T&E Center; Frank Capuano and Geraldine Powers, Food Service; Robert Goldstein and Salvatore Indorato, Purchasing; Gwendolyn Caffery, Information Systems and Computing; Marlene Diem, Financial Aid.

Also, Dorothy Burns and Adelaide Perkins, College of Applied Science and Technology; Geraldine Drum, Residence Life; Janet Switzer, College of Continuing Education; Sheila Reasoner, Alice Beardsley, John Cox, Lawrence Mothersell, all of NTID.

With the Institute for 10 years:

John R. Ballard, Gerald Bird, Gene Herbert, Marilyn Bailey, Elizabeth Noan Beal and Beverly James, all of Physical Plant; Robert Willink, Residence Life; Valerie Yust, NTID; James Clarke, T&E Center; Walter Campbell, Graphic Arts and Photography; Craig Neal, Food Service; Lo-Yi Chung, Institutional Analysis; Carol Lake, Instructional Media Services.

Also, Phyllis Sarnack, ROTC; Delores Baxter, CCE; Carolyn Buntick, Counseling Center; Thomas Bailey, Peter Kulpa, Wendy Thompson, all of Information Systems and Computing; Betty Jane Doyle, Student Affairs; Anthony Finks, Michael McMahon, Frank Caccamise and Richard Orlando, all of NTID.

At RIT for five years:

Philip Goldberg and John Patchin, Physical Plant; Betty Thompson, Accounting; Igor Mihajlov, Student Health Service; Kathleen Ozminkowski, Computer Engineering; Marjorie Sawyer, Mechanical Engineering; Elaine LaDue, Dora Moore, and Lena White, all of Learning Development Center.

Also, Lynn Willoughby, Central Placement; Doris McNeil, Food Service; Wendy Benjamin, Paula Foster, Personnel; Karen Nielsen, R. Frances Hey, Purchasing; Cynthia Mularz, Registrar; Ellen Tonelli, Nancy Heise, Sylvia Ball, David McIntyre and Wanita Schwartz, all of the RIT Bookstore; Eileen Benedict, CCE; Cheryl Baldwin, Campus Safety; Goldie Ross, Minority Affairs.

Barbara Phillips and Mary Ann MacAuley, Information Systems and Computing; Parvesh Singh, Financial Aid; Angela Spano, Admissions; John Sherrick, CAST; Lynn Wilkenson, Ice Arena; William McKee, Communications; Deloris Albert, Doris McConnell, Robert Day and Wendy Schulermerich, Residence Life.

Also, Marilyn Spampinato, Karen Hopkins, Donna Russell, Peter Chudoba, Dorothy Cerniglia, Marjorie Crum, Jeanette Tydings, Jorge Samper, Mark Benjamin and Cynthia Desmond, all of NTID; Suzanne MacFall, Veterans Affairs; Cynthia Beiter, Science; L. June Mihalov, Fine and Applied Arts, and Sharon J. Brock, Residence Life.

Kearns to Give Gasser Lecture

David T. Kearns, president and chief executive officer of Xerox Corporation, will deliver the eighth annual William D. Gasser Distinguished Lectureship in Business at 11 a.m., Thursday, April 26, in Webb Auditorium, James E. Booth Memorial Building. Kearns' topic for the lecture is "Product Quality and Productivity," issues of major concern to business today.

The Gasser Lecture was established by Jones Chemicals, Inc. in recognition of Professor Gasser's many contributions as a teacher at RIT and as a director of, and financial advisor to, Jones Chemicals, Inc. Gasser taught at RIT from 1967 until his death in 1977. He received the Eisenhart Award for Outstanding Teaching in 1971.

Dr. Peter Pere, NTID Dean, Resigns

Dr. Peter Pere, dean of NTID, has announced his resignation effective in June. He'll be returning to the West Coast to open a family business.

Dr. William E. Castle, director of NTID and vice president for Government Relations, RIT, has announced the formation of a search committee to fill the position of NTID dean.

The committee will search for qualified internal and external candidates and has been asked to make a recommendation by Sept. 30, 1984. In the interim, Dr. Castle will serve as acting dean.

Minimum Boat Bids Set; Auction Takes Place May 9

Minimum bids have been established for 13 boats that are being auctioned off by the RIT Purchasing Department. The boats, formerly used at Eisenhower College, are available to all members of the RIT community.

Boats, available for inspection in the Eisenhower Athletic Center, 1-4 p.m. Saturday and Sunday, May 5 and 6, will be auctioned to the highest bidder through a sealed bid process. Sealed bids must be submitted to Purchasing by 3:30 p.m. Wednesday, May 9, and bids will be opened and read at 5 p.m. May 9 in the Alumni Room, RIT College-Alumni Union.

Bid forms and further information may be obtained by calling Purchasing at 2690, or visiting their office Building 99, room 1129. Below are minimum bids and descriptions of the available boats.

Starcraft, 14 ft. aluminum outboard, s/n 66-14314, Model 14EL Falcon, 1966, Johnson 20 HP motor, electric start outboard, with trailer s/n A2C4485 Minimum Bid: \$750

Sailboat, 23 ft. Star Class, Class registration #3396, wood hull, w/trailer. Minimum Bid: \$2,000

Sailboat, 19 ft. Lightning Class, Class Registration #10406 1975 Lippencott, fiberglass w/trailer. Minimum bid: \$2,200

Sailboat, 19 ft. Lightning Class, Class Registration #13330 1978 Allen, fiberglass, with trailer Minimum Bid: \$2,400

Sailboat, 19 ft. Lightning Class, Class Registration #13331 1978 Allen, fiberglass, with trailer. Minimum Bid: \$2,200

Sailboat, 19 ft. Lightning Class, Class Registration #13332 1978 Allen, with trailer, fiberglass. Minimum Bid: \$2,400

Sailboat, 14 ft. Sunfish, Hull #095365 -81K -Olympic fiberglass. Minimum Bid: \$500

Sailboat, 14 ft. Sunfish, Hull #094814, fiberglass. Minimum Bid: \$500

Sailboat, 14 ft. Sunfish, Hull #11003, fiberglass. Minimum Bid: \$200

Sailboat, Rhodes Bantam, s/n 6653-00100, w/trailer, fiberglass, Cox Mod. CF-5505-71, 10/70 cap 550 lbs. Minimum Bid: \$800

Sailboat, 10 ft. Cape Dory, s/n 1515 on homemade dolly, fiberglass hull. Minimum Bid: \$400

Sailboat, 12 ft. Spring Bak, s/n 5012 Mfg. by Aluminum Goods, Toronto, Canada, aluminum hull. Minimum Bid: \$300

Rowboat, 12 ft. Mohawk, Outboard, s/n 1515, 1975, fiberglass. Minimum Bid: \$150.

Registration Set

Fall Quarter 1984-85 registration and billing dates for matriculated day college students have been announced by the Registrar's office.

Departments will distribute registration forms and course schedules to students by April 23. Forms are due back to the Registrar by May 11 at 4:30 p.m. for undergraduates and July 13 at 4:30 p.m. for graduate students.

Student class schedules will be mailed to students' permanent addresses during the week of August 13. Quarterly payment is due to the Bursar by August 15, and the Bursar will mail confirmations or second bills by August 24.

Open registration for new students will be held 8:30 a.m. to 4:30 p.m. Wednesday, September 5. Open registration for returning students is scheduled for 8:30 a.m. to 4:30 p.m. Thursday, September 6.

James E. Myers Wins Stouffers' \$600 Scholarship Grant

James E. Myers, center, a third-year hotel administration student, receives a \$600 scholarship grant from John Reiss, general manager of the Rochester Plaza Hotel. The grant was from the Stouffers Corporation, which owns the Plaza. On left is George Alley, director of the School of Food Hotel and Tourism Management in the College of Applied Science and Technology.

James E. Myers, a third-year hotel administration student in the School of Food, Hotel and Tourism Management, has been awarded a \$600 scholarship grant by Stouffers Corporation, international chain of hotels and restaurants.

Myers was presented the grant by John Reiss, general manager of the downtown Rochester Plaza Hotel, which is owned and operated by the Stouffer organization.

Commenting on the grant, George Alley, director of RIT's School of Food, Hotel and Tourism Management in the College of Applied Science and Technology, had praise for both Myers and Stouffers.

"This type of financial aid is greatly appreciated by our students," said Alley. "Since our early days, Stouffers has been a continuous supporter of our hotel and restaurant programs, through grants and scho-

larship aid, as well as in the hiring of our co-op students and graduates locally and throughout their world-wide organization in their restaurant and hotel divisions.

"There are currently six students employed at Stouffer's Rochester Plaza Hotel, and there are numerous RIT alumni working worldwide for Stouffers. It is this kind of continuing support from industry that helps us maintain the high quality and national reputation of our programs," said Alley.

NEWSMAKERS

- A one-person exhibition of the work of **Bea Nettles**, associate professor of photography, is on view in the gallery in the Port Washington Public Library through April 14. She delivered a lecture on her work in March.
- **Robert Chung and Bekir Arpag**, faculty members of the School of Printing, College of Graphic Arts and Photography, participated in a workshop at the Gerber Scientific Instrument Company, South Windsor, Conn., in March. The purpose of the workshop was to learn how to operate the Autoprep 5000 system, a micro-computer-based CAD/CAM system whereby graphic arts tasks like imposition, layout, and image assembly can be implemented with the use of a digitizing surface, 36 mb Winchester disk, precision photo-plotter and sophisticated software. The Gerber Scientific Instrument Co. is donating such a system to the School of Printing. Upon installation, it will be used as part of the lab activities in Image Assembly and Application of Computers to Graphic Arts.
- **Dr. Robert H. Johnston**, dean of the College of Fine and Applied Arts, presented a lecture on "Archeology and Ceramics" to the Women's Council of the Rochester Museum and Science Center March 20.
- **Dr. Peter Giopulos**, associate dean, College of Fine and Applied Arts, served as a judge in the National Scholastic High School Art Competition to select recipients for National Scholastic scholarships to study art in college. Giopulos was in New York City March 26 and 27 for the judging.
- **Dr. Frederic P. Gardner** is chairperson for Region II of the Association for Continuing Higher Education. He recently completed his term as program chairperson at a conference held in Niagara Falls, N.Y. The theme, "Quality During Change," attracted more than 100 educators from Canada and New York State. The Mayor of Niagara Falls proclaimed March 18-23, "Continuing Education Week." In addition to Dr. Robert Kirkwood of the Middle States Association of Colleges and Schools, speakers included **Dr. John Hromi** of RIT.
- **Professors Robert E. McGrath**, Civil Engineering Technology Department, and **Joseph Greenfield**, Electrical Engineering Technology Department, served on an authors' panel at the spring conference of the New York State Engineering Technology Association April 12 at the State University of New York (SUNY) in Binghamton. Faculty members in the School of Engineering Technology in the College of Applied Science and Technology, they served on a civil architectural interest group authors' panel discussing the writing of text books. McGrath will be panel moderator. Greenfield has authored three text books in electrical engineering technology.
- **Dr. Harvey Rhody**, chairman of the Department of Electrical Engineering in the College of

- Engineering, will present a paper, "Error Correcting Codes for Digital Data", at an Optical Society of America conference on "Optical Data Storage" to be held April 18-20 in Monterey, Calif.
- **Kenneth F. Hoffmann**, assistant professor in NTID's Printing Department, has been named to the Churchville-Chili Central School District Strategic Planning Group. The recently commissioned group will be asked to analyze and synthesize pertinent data and to generate ideas and plans of action for the board of education. The committee will include representatives from business, parents, teachers, administrators, and members of the community. Hoffmann currently serves on the Churchville-Chili Curriculum Advisory Committee, which reviews all proposed curricular revisions and additions before making recommendations to the board.
- **Dr. Joanne Subtelny**, professor speech/language pathology, Communication Program, NTID, presented a one-day workshop designed to upgrade clinical skills in assessing the speech and language of adolescents with impaired hearing and improving speech language instruction for mainstreamed students. The workshop was sponsored by the New Jersey Speech-Language-Hearing Association as part of its program to encourage continuing education credits as specified by the American Speech Language and Hearing Association.
- **Dr. Edward B. Stockham**, Faculty and Program Development, is a district chairperson, Commerce and Industry Division, for the 1984 United Way/American Red Cross Campaign. Helping him in organizing Unified Way campaigns for 61 local firms are eight district captains from RIT: **Dr. Jack Clarco**, assistant vice president, NTID; **Richard Fuller** and **Edward Lincoln**, Admissions; **Dorothy Paynter** and **Dr. Lee Sengbusch**, College of Continuing Education; **Charles Weigand**, School of Printing; **Joann Middleton**, College of Business; and **Mary Ann McCarthy**, Complementary Education.
- **Rhona B. Genzel**, director of ESOL Programs for the Learning Development Center, and **Dr. Martha G. Cummings**, assistant professor, Learning Development Center, presented a workshop, "Simulation Games in the ESOL Classroom," at the 18th Annual TESOL Convention in Houston, Texas. Workshop members participated in, and learned to design, their own simulation games. The presentation was attended by 120 American and international ESOL instructors and administrators.
- **Dr. Lawrence Belle**, Faculty and Program Development, and **Dr. Robert Golden**, College of Liberal Arts, presented papers at the recent American Association of Higher Education Conference in Chicago. Dr. Belle addressed "Introducing Faculty to Microcomputers for Instruction." Dr. Golden's topic was "Dealing with DEC."

- **Dr. John Humphries**, administrator of the Center for International Education and Services, Faculty and Program Development, was chosen president of the Montgomery Neighborhood Center, which serves the low-income southwest quadrant of the city of Rochester. The center is a social service agency, providing programs for a wide range of services including emergency housing, food distribution, recreation for youth and senior citizens, family intervention, day care, and job education and training.
- **Donna Spiotti**, training consultant at the Learning Development Center, presented a workshop, "Women in Transition," for the American Association of University Women. Participants explored the effects of female conditioning, took a "Readiness for Change Inventory" and looked at ways to achieve flexible educational/career planning.
- **The Editorial Board of the Journal of Cooperative Education** recently announced the election of **Mary Dean Brewer** to a three-year term. The journal is the major publication of the Cooperative Education Association of which RIT is an active member. Brewer is associate director of the Center for Cooperative Education and Career Services.
- **George T. Alley**, director of the School of Food, Hotel and Tourism Management in the College of Applied Science and Technology, recently hosted a reception at Disneyworld for 22 graduates of the School of Food, Hotel and Tourism Management who are permanently employed at Disney World's Epcot Center.
- **Dr. David Farnsworth**, associate professor of mathematics, recently co-authored an article with Steven Suddaby entitled "A Unifying Approach to Projective Geometry," which was published in *Mathematica Balkanica* 8.
- **Dr. John Neenan**, assistant professor of chemistry, has received a summer research associate award under the U.S. Army Summer Faculty and Engineering Program. As a result of this award Dr. Neenan will carry out research at the Army Medical Research Institute of Infectious Diseases at Fort Detrick, Md. This research will result in the screening of the antiviral potential of compounds Dr. Neenan has prepared at RIT. Dr. Neenan has already prepared and partially characterized these compounds at RIT with the assistance of undergraduate students in both the Chemistry and Biology Department.
- **Dr. William Jensen**, assistant professor of chemistry, has a paper published in the March issue of the *Journal of Chemical Education* entitled "Abegg, Lewis Langmuir and the Octet Rule." This paper was part of a series in the G.N. Lewis Symposium.
- **Jeri Stanton** and **Howard Mann**, instructors in the Division of Career Opportunities at NTID, presented a paper, "Educational Awareness Package for Early Secondary Deaf Students," at the American Association of Counseling and Development Convention in Houston, Texas.
- **Mary Sollene**, Community Services, Learning Development Center, recently participated in a panel presentation to a group of more than 200

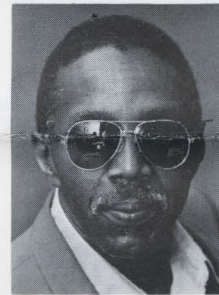

teachers and administrators at East Irondequoit High School. Sollene spoke on time management and its underlying psychological issues.

Staff Training Seminars Continue

Staff training and development seminars for managers, office supervisors, support staff and other interested personnel continues today. TIAA-CREF will be the subject of the seminar from 9 to 10:30 a.m., today, April 19. A basic understanding of the RIT retirement and annuity plan is required for attendance at this meeting to deal with interpreting TIAA-CREF annual reports, identifying rollover capabilities and comparing this plan with other investment options.

RIT's procurement philosophy and a review of the Purchasing Department will be included in the Purchasing Procedures Seminar from 9 to 11 a.m., Wednesday, May 9. Information on systems' contracts and a review of procedures for completing purchasing forms also will be presented.

Compensation Seminar, designed for managers, will take place from 9 to 11 a.m., Thursday, May 24. Topics will include information on RIT's wage and salary administration, the Institute's compensation philosophy and an orientation to RIT's merit program.

TALKS ABOUT MALCOLM X...Imam Benjamin Karim, associate of the late black leader, Malcolm X, told students that "Malcolm put aside racist ideology and adopted a universal idea of Islam." Karim met with students April 3 and gave an evening talk during Black Awareness Week April 1-8. Theme of the week was "Power and Politics."
