## Significant Agreement Signed by RIT, MCC

An agreement ensuring that MCC students who meet specific criteria for RIT degree programs will be able to transfer to RIT in an efficient manner has been signed between RIT and Monroe Community College (MCC).

The agreement was formally signed by President Peter A. Spina, MCC, and Provost and vice president for Academic Affairs Thomas R. Plough, RIT, during a ceremony at MCC. The plan also was approved by President M. Richard Rose, RIT, and vice presidents R. Thomas Flynn and Frank Milligan, of MCC.

Since the inception of MCC, students have successfully transferred into more than 75 different programs at RIT.

The signing ceremony signified a continuing commitment to existing cooperative arrangements. The agreement confirms past practices of accepting equivalent credits in transfer and affirms a commitment to equal rights and affirmative action, as well as to a high quality general education foundation and to the mastery of technical competencies needed for success in the modern world.

"This articulation agreement will enable both institutions to continue the excellent cooperation in assisting students to receive the best education possible," says Dr. Rose. "The faculty and administration at MCC and RIT know and respect each other and have a clear recognition of the quality of education at both institutions."

"It is always gratifying to be able to broaden the transfer opportunities available to our graduates," says Dr. Spina. "I am particularly pleased to see this agreement

Signing the agreement between RIT and Monroe Community College are, front row, from left, President Peter Spina, MCC, and Provost and vice president for Academic Affairs, Thomas Plough, RIT. Looking on in back row, from left, are Richard Fuller, associate director of Admissions at RIT; David Finney, director of Admissions at RIT; Dr. Richard Rinehart, director of RIT's Center for Community/Junior College Relations, and Nicholas Proia, director of Transfer, Placement and Financial Aid at MCC.

formalized with RIT, an excellent and respected Institute that has long been a favored choice among our transfer students. Our graduates have always been treated well at RIT and I am delighted that we are cooperating with such a fine institution."

Because of the importance of meeting all needs, many individuals from both institutions were involved in preparing the detailed

agreement. They include: director of Admissions David Finney, associate director of Admissions Richard Fuller, director of the Center for Community/Junior College Relations Dr. Richard Rinehart, all of RIT; director of Transfer, Placement and Financial Aid, Nicholas Proia, and assistant director of Transfer and Placement, G. Christopher Belle-Isle, both of MCC, and specialized faculty members at both MCC and RIT.

## TAP Allocation Recognizes RIT Leadership

Recognizing RIT as one of the state's leading centers for part-time and continuing education programs, the New York State Legislature has allocated nearly a quarter of a million dollars in tuition assistance for part-time students attending RIT. The \$230,000 allocation is part of an \$11 million package signed by Governor Mario Cuomo extending the Tuition Assistance Program (TAP) to part-time undergraduate, matriculated students who meet specified criteria.

Based on its part-time enrollment of more than 5,000 students, RIT received the second highest independent college allocation in the state, with only Pace University receiving more.

According to Dr. Robert Frisina, senior vice president for Institutional Advancement, "The legislative action clearly acknowledges RIT's long-standing efforts in the field of part-time education and designates RIT as the regional authority on part-time programs." Frisina adds, "We also feel the legislation opens the educational door to thousands of students across the state to continue their education on a part-time basis."

Awards will be based on need, but are limited to a maximum of \$2,000 per year and cannot exceed the cost of tuition.

As many as 2,580 students might be eligible for the new part-time Tuition Assistance Program, if they meet all criteria.

According to the legislation, eligibility requirements include the following: students must be part-time; they must be matriculated; they must have completed six semester hours of college work; they must be N.Y. residents; dependent students must have family state net taxable incomes of less than \$22,000, and independent students must have state net taxable incomes of less than \$15,000. All students must file federal PELL Grant applications.

RIT's College of Continuing Education is one of the Institute's nine colleges. All of RIT's colleges also offer part-time programs.

## Delegation from China Visits RIT

Madame Gu Xialian, governor of Jiangsu Province, People's Republic of China, listens to welcoming remarks by President M. Richard Rose. Madame Gu led a delegation from her province to New York state last week. The delegation visited Rochester and Albany during its trip to New York state.

RIT was honored last week by a visit of Chinese officials from the Jiangsu Province (where the city of Shanghai is located). The delegation was led by Madame Gu Xiulian, governor of the province. Rochester was one of only two cities the delegation visited in the United States. The other was Albany.

Invited to New York state by Governor Mario Cuomo, the delegation was eager to

visit RIT because of the members' interest in the Institute's applied philosophy of education. They hope to establish increased technological education in their province.

The visit to the state was initiated by RIT President M. Richard Rose following his trip to the People's Republic of China last summer with a delegation that included former Eastman Kodak Company Chairman of the Board Walter Fallon.

President Rose was interested in establishing a sister state relationship between New York state and the Jiangsu Province. He received positive response from Governor Cuomo on the proposal.

In addition to the trip being a goodwill mission, it is hoped the visit will help promote further trade relationships, technical cooperation, and cultural and educational exchanges.

Upon their arrival in Rochester the delegation was welcomed by President Rose; Rochester Mayor Thomas Ryan; vice president of the Monroe County Legislature, Vincent Campbell; chairman of the New York State Assembly Committee on Commerce and Economic Development, Roger Robach; and director of RIT's Center for International Education and Services, Richard Chu.

Following a tour of Eastman Kodak, the delegation was formally greeted at a reception at RIT's City Center by business, government and community leaders from the Rochester area, as well as members of the RIT community. At the reception delegation members were welcomed by President Rose and heard remarks by Mayor Ryan and Martin Rennalls, president of the International Friendship Council. The delegation also toured the Rochester Sesqui-centennial exhibit: "Productivity: The Rochester Edge," a joint effort of RIT and the Industrial Management Council of Rochester.

On Saturday the delegation toured the RIT campus making special visits to the College of Graphic Arts and Photography, the College of Engineering and NTID.

## Schilling Honored By Shewhart Medal

Dr. Edward G. Schilling, Paul A. Miller Professor and chair of the Graduate Statistics Department in the Center for Quality and Applied Statistics in the College of Continuing Education, has been awarded the 1983 Shewhart Medal by the American Society for Quality Control.

The Shewhart Medal, given annually to the individual making the most outstanding contribution to the science and techniques of quality control, was presented to Dr. Schilling during the 38th annual Quality Congress in Chicago, May 14-16.

Dr. Schilling was honored as one of the foremost experts in the field of quality control and sampling. The society said his work has had a major impact upon the quality profession and on the improvement of quality. By implementing Schilling's techniques, numerous companies throughout the United States have been able to achieve better quality and increased productivity at lower cost.

Dr. Schilling, who was associate professor of statistics at RIT from 1967 to 1969, returned to the endowed chair and the chairmanship of the Graduate Statistics Department in 1983. He had held positions in quality control at RCA, The Carborundum Company and General Electric. He

## Hacker Presents Seminar in Mexico; Meets Newspaper Leaders, Faculty

Dr. Robert Hacker, Paul and Louise Miller Distinguished Professor in Newspaper Production Management in the School of Printing, recently completed a two-week stay in Mexico. He went to Mexico at the invitation of the Universidad Autonoma de Mexico to consult with faculty members there and to present a seminar.

Hacker consulted with the faculty on developing a master's degree program for graphic design and conducted a seminar for faculty and students on new developments in printing technology.

Hacker visited several Mexico City newspapers to observe their operations and he conducted a week-long seminar on computer applications in the graphic arts. The seminar was offered by the university of the Mexican printing industry.

Hacker says, "This industry seminar was especially interesting for me because it involved simultaneous translation. I lectured in English; they asked questions in Spanish, which I then answered in English. Everybody was very understanding, and it was a good experience."

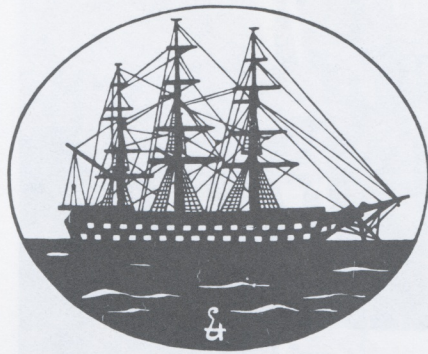

Hacker explains that two years ago, he, Richard Zakia and James Ver Hague wanted to establish a student/faculty exchange program. They developed a seminar, but it took two years for the project to come to fruition. Hacker says Mexican audiences were receptive to the seminars he presented and the university is considering running them again.

"Most of all," Hacker says, "I was treated with great courtesy and dignity. The newspaper with the largest circulation in Mexico ran a story about my being there together with a picture of me with the publisher and other dignitaries."

"What was really great," he adds, "was that I met many RIT alumni while I was there. I was hosted by RIT Trustee Jorge A.G. Rivas, presidente, Group RIMA, S.A., who was my student 20 years ago. And, I ran into another former student who now runs the printing operation for the American embassy in Mexico. It was like old home week."

Hacker credits the Center for International Education and Services (CIES) and RIT's Faculty and Program Development for making arrangements for his trip.

Faculty may obtain information on international education opportunities by contacting John Humphries, CIES, administrator, at 6644.

## Learn Sailing with RIT's Courses

It's time to hit the decks!

RIT's Department of Physical Education is offering the RIT community the opportunity to learn to sail in a four-week course to be instructed by Lawrence S. Bart, former head sailing coach and instructor of sailing at Cornell University.

Areas of instruction will include sailboat components, sailing theory, basic boat handling, boating safety, wind and weather, aerodynamics, hydrodynamics, marlinspike seamanship and rescue techniques. The course will provide the neophyte with the jargon, skills, and safety of basic small- and large-boat sailing. Campus lectures and films will cover the technical instruction and actual sailing sessions will be held on Irondequoit Bay aboard a 14-foot sloop rigged day-sailer.

Classes will meet Tuesday and Thursdays, 1:30 to 4 p.m. or 5:30 p.m. to 8 p.m. Session I will begin July 3 and Session II Aug. 7. Registration for Session I is 7:30 a.m. until 2 p.m. July 2 in Clark Gymnasium and Session II registration is 7:30 a.m. to 2 p.m. July 2 and Aug. 6 in Clark Gymnasium.

Students will take a basic swim test, but the only prerequisites for the course are enthusiasm and the determination to learn to sail.

A \$125 fee is payable at registration

## Sil Hall Scholarship Recognizes Pederson

Showing her work to Mrs. Mildred Hall, left, is JoAnn Pederson, a student in the School for American Craftsman. Pederson, who is studying metalcrafts and jewelry, is the recipient of the Sil Hall Scholarship presented in memory of Mrs. Hall's husband.

JoAnn Pederson is the recipient of the Sil Hall Scholarship awarded by the College of Fine and Applied Arts.

Pederson just completed her second year in the School for American Craftsman where she is majoring in metalcrafts and jewelry.

The scholarship, funded by the Sil Hall Memorial Scholarship Fund, was established in 1980 and is awarded to a worthy student in the college.

It honors the memory of Sylvanus G. Hall, an outstanding amateur artist and craftsman, who had a distinguished career in graphic arts sales for Eastman Kodak Company. Mr. Hall's work in the art of bird carving earned him awards for three consecutive years at the International Woodcarvers Congress. The Sil Hall Memorial Scholarship Fund at RIT was created by Dr. Robert E. Wells and friends of Mrs. Hall.

Dr. Robert H. Johnston, dean of the College of Fine and Applied Arts, announced Pederson's scholarship during a luncheon at which Mrs. Mildred Hall was guest of honor.

Alan Illig, left, and Terry Finegan were speakers at the Financial Planning Conference held recently by the Office of Development. The conference enabled RIT to show its appreciation to a number of individuals by sharing information on planned giving and investments.

## Friends Find Financial Planning Advice at RIT Conference Session

More than 75 friends of RIT considered their options for financial and estate planning as the Office of Development sponsored a Financial Planning Conference last week.

According to Cy Young, vice president for Development, "The conference enabled RIT to show its appreciation of a number of individuals by sharing information on planned giving and investments."

William A. Buckingham, senior vice president and deputy general manager of Manufacturers Hanover Trust Company, an RIT trustee and a 1964 graduate of RIT, presided.

The conference, which was chaired by John W. Tarbox of Harris Beach Wilcox Rubin & Levey, focused on financial planning for the retirement years and was coordinated through the RIT Deferred Giving Advisory Committee.

Guest speakers included RIT graduate, Gary J. Lindsay (BA '64), a partner in Peat

Marwick Mitchell & Company. Lindsay spoke on recent tax and legislative changes.

A social security update was provided by John W. Lee, field representative for the Social Security Administration.

Alan Illig of Harter Secrest & Emery presented insights into power of attorney, investment management, custodial accounts and revocable trusts.

General investment considerations were presented by Terrence C. Finegan, vice president Norstar Investment Advisory Services, Inc.

Attendees were urged to seek professional advice in choosing the most appropriate investment vehicles.

Dane Gordon, associate dean, College of Liberal Arts, addressed guests following a luncheon. Gordon is author of a history of RIT titled "Rochester Institute of Technology, Industrial Development and Educational Innovation in an American City."

## Special Services Honors Students At Candlelight Awards Dinner

RIT's Office of Special Services honored students associated with the program at its ninth annual Candlelight Awards Dinner May 5.

The literary magazine, *Our Dimensions*, published by students in Special Services and the Higher Education Opportunity Program, was distributed at the event. It includes a story, "Theodore and the Magic Box," written by kindergarten students in Horton Child Care Center, as well as poems by students and Marie Giardino, Special Services director.

Honored for academic achievement was Carolyn Jean Powell, graduating senior who achieved a 4.0 cumulative grade point average in graphic design, College of Fine and Applied Arts. Powell also spoke at the dinner.

The following students were recognized for dean's list honors: Georgette Bluno, Lisa Bowes, George Dalmas, Terri Gigon, Ann Jones, Scott Stockham, Mark Vaughn, Dan Winter, John Mikula, Tom LaLonde, Thomas Eymontt, Carolyn Wasikowski and Ilene Zipkin. Bowes, Winter and Jay Malmeth comprised the magazine staff.

Honorable mention for their academic achievements were received by Mike Anglim, Lorie Barone, Bruce Bennett, Twain Blue, Joe D'Agostino, Jacqueline Pelzer, Jennienne Peoples, Larry Rutkowski, Kim Sellers, Sue Senkiw, Nora Shene, Jean Sougstad, Ronnie Tyson, Avram Rudy Vener, Robin White, Avis Williams, Tippi Younger, Al Gladowski, Charlie Hawkins, David Bissell, John Augustine, Jeffrey Statts, Egon Robertson and Doug Brice.

Jacqueline Lynch-Czmsanske received a special academic award. Other students speakers were Winter, a second year photo

student, and Chris Burk, second year business student.

Each academic quarter Special Services recognizes students for their academic success, personal accomplishments and community service. Letters of commendation are sent to their parents and the students are guests of honor at a staff luncheon.

Giardino said selections for the Spring Quarter were Gordon Davies and Avis Williams; Winter Quarter, Chris Burk and Peter Luck; Fall Quarter, Tony Galucci and Bruce Bennett.

## Science to No Longer Offer Two Programs

Beginning this fall the College of Science will no longer offer programs in pharmacy and chemical technology.

According to Dr. John Paliouras, dean of the college, declining enrollments were among the factors influencing the college's decision to discontinue the two programs.

In addition, the dual degree programs in biology/pharmacy and chemistry/pharmacy, offered in conjunction with the Massachusetts College of Pharmacy, experienced severe articulation problems as a result of curricula revisions at both institutions.

Students already in the pharmacy and chemical technology program will receive their degrees as originally planned without any inconvenience.

"We are chagrined about both cases," says Paliouras, "because the demand for pharmacists and chemical technologists is still very high."

## Chinese Study Photoprocessing

For three months during the Spring Quarter, two Chinese engineers studied photoprocessing at RIT.

Yu Zhang Ding, senior engineer with the Tianjin Precise Machinery Institute, and Yang Yu Xiang, an engineer with the institute, studied the techniques and operation of the photoprocessing lab of the School of Photographic Arts and Sciences. Tianjin Precise Machinery Institute, an optical company, is affiliated with Tianjin University in Tianjin, a seaport about 100 miles from Beijing.

According to Ellsworth J. McCune, RIT's James E. McGhee Professor of Photographic Management, Yu and Yang were at RIT to learn as much as possible about color processing and printing so they could work to establish and improve the photoprocessing industry in China.

"I met with them a couple of hours each morning and then they would observe," says McCune. "They also studied with Bob Kaiser, Steve Diehl and Dr. Lothar Engelmann."

During their time in Rochester, Yu and Yang visited Eastman Kodak, Bausch & Lomb and the International Museum of Photography. They shared an apartment at Riverknoll where they cooked their own meals.

"When they arrived at RIT, they needed quite a bit of help with their English," says McCune. "Richard Chu of the College of Liberal Arts served as interpreter for them

Looking over the Eastman Kodak TECHNET Center in the photoprocessing lab of the School of Photographic Arts and Sciences are Yang Yu Xiang and Yu Zhang Ding, both engineers with the Tianjin Precise Machinery Institute, an optical firm affiliated with Tianjin University. Yang and Yu spent three months at RIT studying photoprocessing.

and Barbara Letvin, director of International Student Affairs, arranged for Yu and Yang to take courses in written and spoken English."

McCune says he and the other faculty in the photoprocessing department are really indebted to Chu and Letvin.

## Videoconference To Celebrate RIT's Joining NUTU

RIT's College of Continuing Education will celebrate RIT's membership in the National University Teleconference Network (NUTU) with the Institute's first videoconference via satellite.

Dr. Richard Rinehart, director of the Center for Community/Junior College Relations, won the membership for RIT. Reno Antonietti, associate vice president of Academic Services and Computing, says, "This membership could not have come at a better time. We have been investigating many of the new telecommunications systems and we were most interested in NUTU."

The videoconference, to be held 9 a.m. until 4 p.m. Tuesday, June 12, in Webb Auditorium of the James E. Booth Memorial Building, is a live telecast covering the professional applications of the personal computer and stressing improved productivity in its use.

Sponsored jointly by RIT and the IEEE Educational Activities Board in cooperation with the IEEE Computer Society, the conference will cover the role of an operating system, modern programming and design languages, data base systems in the engineering process, project management tools, graphics and electronic mail.

Dr. Donald Baker, dean of the College of Continuing Education, says, "Teleconferences such as this offer tremendous potential for CCE to expand its offerings and serve the professional educational needs of adult learners."

Sharing their expertise for the conference are Taylor L. Booth, computer science and electrical engineering professor at the University of Connecticut; Dennis R. Allison, lecturer at Stanford University's Computer Systems Laboratory; David Farber, professor of electrical engineering and computer science at the University of Delaware and recognized authority in local computer networks; and Fred J. Maryanski, professor of computer science at the University of Connecticut, formerly with Digital Equipment.

The conference will be enhanced by electronic mail, which allows questions to be phoned in at any point during the conference. Those questions will be answered during the conference and further questions will be answered up to three weeks after the conference.

Participants will hear a local, pretelecast presentation by Michael Ciarldi, adjunct faculty member at RIT and the University of Rochester, and by businessman Don McClimans, computer consultant and president of Inti Electronics. Source material will be provided and exhibitors will show IBM, Hewlett Packard, Apple and DEC equipment during a wine and cheese reception. Lunch and refreshments are provided during the day-long videoconference.

For more information, call Susan Rogers, telecourse program consultant in RIT's College of Continuing Education, 262-6283.

## Renovation at Union

College-Alumni Union, now into its summer schedule, is undergoing a series of improvements and renovations.

Margaret A. Chapa, director of Student Activities/Union Services, says additional lighting has been installed in the College-Alumni Union lobby and she announced the following schedule of work to avoid inconveniencing RIT staff and students.

Work on the Ingle Auditorium catwalks will take place from June 12-July 7; renovation of A-level lavatories, June 18-July 1, and the Alumni Room, August 13-17.

In addition, the rubber trees (not as healthy as they looked) in the atrium planters have been replaced with ficus trees, and ivy will be planted at the base of the trees.

Summer hours of the College-Alumni Union building, according to Debbie

Waltzer, coordinator of campus information and reservations, are from 7 a.m. to 9 p.m., Monday through Thursday; 7 a.m.-11 p.m., Friday; 9 a.m. to 11 p.m., Saturday; 9 a.m. to 9 p.m., Sunday.

Waltzer said that after Summer Quarter, August 11-Sept. 1, hours will be from 7 a.m. to 5 p.m., Monday through Friday, and the building will be closed Saturday and Sunday.

Waltzer reminds the RIT community, "Summer is an ideal time to reserve College-Alumni Union rooms for 1984-85 meetings and events." Call 475-6992, 8:30 a.m. to 4:30 p.m., Monday through Friday.

## Prize to Student

Mark S. Carraher, a student in the Department of Mathematics, has been awarded a prize for a talk he delivered at the spring, 1984, meeting of the Seaway Section of the Mathematical Association of America. His talk was entitled "Flow Behavior of Red Blood Cells in Capillaries."

The Student Talk Committee of the Seaway Section called Carraher's presentation excellent, felt the results he reported represent "a solid piece of work for an undergraduate," and said both Carraher and the Department of Mathematics have a right to feel proud.

## Former Mental Patient Speaks at RIT Session

Bill Thomas, a former mental patient who now is president of Creative Images, Inc. in Los Angeles, Calif., talked with RIT employees during two afternoon sessions May 23.

Thomas' visit was sponsored by the Institute's Employee Assistance Program (EAP), Personnel Office. He described his incarceration in Farview State Hospital for the Criminally Insane in Pennsylvania which he escaped after nine years. He told of inhumane treatment, the lack of psychiatric treatment and how he cured himself. His experiences are the basis for his book, *The Shoeleather Treatment*, and for an NBC television movie, "The Other Side of Hell," featuring Alan Arkin as Thomas.

Thomas' presentation before a public meeting that evening in Ingle Auditorium was unorthodox and dramatic. He appeared unkempt and in shabby clothes and, as the talk progressed, became the person he is now, the recovered head of a public relations agency that represents writers and actors.

**FACING ECONOMIC FACTS...**The College of Continuing Education's Western New York Clergy Economic Education Conference, which brought clergy and speakers on the economic issues facing business, agriculture and labor together, came to a successful close May 8. Shown during the conference are, left to right front row, Helen Widrick and Dr. Fred Gardner, RIT conference co-directors, and Alan Illig, attorney with Harter, Secrest and Emery, one of the speakers; and back row, left to right, Ron Willmann, pastor of St. Martin's Church in Webster, Janet VanZile, RIT arrangements specialist, and Francis Stolte, United Methodist pastor from LeRoy, N.Y.

## Firm Completes Computing Study

The consulting firm of Deloitte, Haskins and Sells has completed its study of administrative computing and submitted its report to Dr. Thomas Plough, provost and vice president, Academic Affairs, and H. Donald Scott, vice president, Finance and Administration. Copies of the complete report, "Long Range Planning Study: Information Services," will be distributed to all participants as well as to administrative and academic leaders.

The study focused on a variety of key computing issues, such as capacity planning, priorities for administrative applications, organization and staffing, and performance measurement. These findings and recommendations will provide the impetus for further improvement and development of Institute administrative computing services.

A status report, which addresses efforts already underway and pertaining to the report's recommendations, will be attached to copies of the report.

## NEWSMAKERS

● **Richard D. Zakia**, chairman, Fine Arts Photography Department presented a paper on "The Life of a Photograph" at the New School for Social Research. In addition, Zakia gave a slide presentation at Syracuse University on the pictorial language of advertising.

● **Dr. Janet Barnard**, assistant professor of management in the College of Business, wrote an article, "The Foreman's Role in the New Management," which was published in the Spring 1984, issue of the *Advanced Management Journal*. Also, Barnard chaired a panel on Policy and Strategy at the Eastern Academy of Management annual meeting in Montreal in May.

● **Morton Nace**, training and development specialist at NTID, wrote "Proven Pluses in Developing Workshops," which was published by the Genesee Valley Chapter of the American Society for Training and Development (ASTD) in the May issue of the ASTD newsletter, *The Torch*. The article highlights six techniques as standards for producing a professional product.

● **Louis Andolino**, associate professor in the College of Liberal Arts, has recently been elected a vice president of the Rochester Association for the United Nations (RAUN). He has been a member of the RAUN Board of Directors since

1979 and has served director of its speakers bureau. On May 17, Professor Andolino gave a presentation on "President Reagan and the Post-Andropov Leadership: U.S.-Soviet Relations in 1984" to the Newark Library Association in Newark, NY.

● **James M. Papero**, associate director for human resources, Personnel Office, has been elected president of the board, National Council of Alcoholism of Rochester and Monroe County, and has been named to the board of the Health Association of Rochester and Monroe County.

● **Dr. Frank Annunziata**, professor of history, College of Liberal Arts, participated in Ohio State University's conference, "George Orwell and 1984," as a panelist speaking on "Statism and Anti-Statism in Modern American Social Thought." Annunziata's essay on "Franklin D. Roosevelt as Governor of New York" appears in the *FDR Encyclopedia*, published to commemorate the 40th anniversary of the former president's death on April 12, 1945.

● **James Forman**, director of the School of Applied Industrial Studies in the College of Continuing Education, was moderator and keynote speaker at a New York State Assembly Ways and Means seminar on May 24. The seminar to dis-

cuss the future of training for the machining industry in New York state was attended by state legislators, observers from the State Labor Department and State Education Department's Occupational and Vocational Program Development members.

● **Dr. John Hromi**, director of the Center for Quality and Applied Statistics in the College of Continuing Education, was keynote speaker for a series of executive seminars on quality management presented for Hewlett-Packard Company in Rochester, Albany and the Syracuse area last week.

● **David Moszak**, assistant controller, was elected chairperson of the membership committee of the Cash Management Association of Monroe County (CMAMC). The CMAMC, formed in 1982, is an organization of more than 70 members from banking institutions and local industry who meet bimonthly to discuss cash management information. For further information regarding CMAMC, contact Moszak 6105.

● **Steve Loar**, assistant professor in the College of Fine and Applied Arts, designed a wood piece accepted for exhibit in Created by Hand '84, an exhibit of recent American crafts, at the Art Gallery, Buffalo. Entitled "Ten Years in the Sun

Guard," Loar's work is a commemorative vessel of spalted maple and cherry. It is one of 79 pieces in the show selected from among 525 pieces submitted by craftspersons from throughout the country. Created by Hand '84 will be up from June 9 through July 5 at the gallery, 698 Main Street, Buffalo.

● The History of Printing in Rochester was the topic discussed by School of Printing associate professor **Herbert H. Johnson** at Rochester's Memorial Art Gallery in April. Johnson, who spoke along with June Alexander, a collector of fine printing, emphasized fine printing in his presentation.

Six papers from RIT's Department of Chemistry were recently presented at the 29th Annual Undergraduate Research Symposium sponsored by the Rochester Section of the American Chemical Society. The student presenters and their faculty mentor were: **Cynthia A. Smith** and **Kay G. Turner** (two papers); **Terry Breslawski** and **L. Paul Rosenberg**; **Boris A. Chrunyk** and **Laura Tubbs**; **Matthew J. Cook**, **David L. Minicuci** and **Laura Tubbs**; and **Pasquale A. Falcigno** and **Richard Ulsh**. This year's symposium was held at the Community College of the Finger Lakes in Canandaigua.

## Guests View Campus, City Center

Continued from Page 1

Members of the delegation included: Zheng Liangyu, director of the Foreign Affairs Office; Li Bingcai, deputy director of the Department of Foreign Economic Relations and Trade; Jiang Rengzhao, senior engineer of the Planning and Economic Commission; Lu Sujie, division chief of the General Office of Jiangsu Provincial People's Government; Madame Yao Zhengq, interpreter of the Foreign Affairs Office of Jiangsu Province; Jan Berris, vice president,

National Committee on U.S./China Relations; and Madame Zhang Aihua, wife of the Chinese Consul General based in New York City.

The Jiangsu Province is similar to New York state; it is one of China's most productive and industrialized areas.

The delegation's visit to RIT was coordinated by the Office of Government and Community Affairs.

Dr. Mark Guldin, dean of the College of Graphic Arts and Photography, at right in top photo, shows the capabilities of RIT printing students to Madame Gu and other members of the delegation from Jiangsu Province. Rochester Mayor Thomas P. Ryan, at left in top right photo, presents members of the Jiangsu delegation with Sesquicentennial tote bags during ceremonies welcoming the delegation at RIT's City Center. During their visit to RIT, members of the delegation toured Bevier Gallery in the College of Fine and Applied Arts and enjoyed the Gleason Works exhibit, part of the Sesquicentennial exhibit produced by RIT and the Industrial Management Council at RIT's City Center.

## Schilling Honored

Continued from Page 1

also had taught quality control at the undergraduate and graduate levels on the faculties of the University of Buffalo, Rutgers University and Case Western Reserve.

A fellow of the American Society for Quality Control and the American Statistical Association, Dr. Schilling has won the Brumbaugh Award for his research in the field of statistics four times. He received his BA and MRA degrees in statistics from the University of Buffalo and his MS and Ph.D. degrees from Rutgers University.

**HE HAS THE FLOOR...** Dr. William Castle, vice president for Government Relations and director of NTID, greets U. S. Senator from New York state Alfonse D'Amato before the senator spoke at NTID's awards ceremony May 18.
