# Goal

- ICC requests a motion to approve and approval of the recommended changes to the Minor Policy D01.1.

# Minor Policy Revision D01.1-IIC.

- At least nine semester credit hours of the minor must consist of courses not specified by the student's home program. (Current Policy)
- At least nine semester credit hours of the minor must consist of **specific courses not required** by the student's degree program. Courses such as free electives, **immersion courses**, general education electives, **courses within** program options and tracks are not considered **required** courses.

# Concerns

- If these changes allow too much overlap between a major and a minor perhaps students in that major should not be allowed to take that minor.

# Minor Policy Revision

- ICC wants to address:
  - Vagueness of term “home program”
  - Same courses taken can result in different end result
  - Ability to use minors to create secondary focus areas
