Vol. 38

Rochester 8, N. Y., April 1, 1963

No. 18

\$4,000,000 Allowed To Renovate Powers

Dr. Melvin Ellingson, president of RIT, has announced the completion of plans to renovate the Duffy-Powers building. Dr. Ellingson said, "We are planning definitely to use the Duffy-Powers building as our Night School Extension after our move to Henrietta; and so, we propose to invest \$4 million in renovating that building. The renovation will include exterior design changes and completion of the additional floors into laboratories and classrooms."

Commenting on this plan, Mark Stern, chairman of the Board of Trustees, said, "We have decided to keep the Duffy-Powers as our Night School Extension recognizing that its centralized locale will be advantageous to our night school students limiting the distance they would have to travel if they had to go out to Henrietta."

Rinfeather, Neuman, & Bentz are the architects who designed the plans for the renovations of the Duffy-Powers. Their plans call for an exterior face of white marble; classrooms and laboratories will be of the most modern design.

Mark Rinfeather, chief architect of the firm, said, "We have encountered one problem in our plans. We had planned for the most modern lighting; but we have discovered that the electric lines coming into the building will allow us only to place a 25 watt bulb in the center of each classroom. However, students need not fear of inadequate lighting. I am a stockholder in Eversharp flashlight company and I will be selling flashlights in the lobby of the building before classes for a small cost."

Plans for the renovation include a new name for the building; among the proposed names: Mark Rinfeather Building, Rinfeather Hall, Rinfeather Building, Rinfeather Extension, Mark Rinfeather Extension, and Mark Rinfeather Hall

feather Hall.

Mark Davis, vice president of Development and Pubic Relations, hailed the move as a boon to the community center. Adding that the proposed renovation would enhance the beauty of the center of the city, even though the architects plans are "completely out of line with the city's master plan."

Mark Gillete, mayor of the city of Rochester, commented, "We, the city fathers are pleased indeed that RUT, er-the U of R, er-RIT, has decided to continue plans for the renovation of the Duffy-Powers building. It will indeed improve the beauty of the center of the city. However the corporation Counsel has been consulted on RIT's deviation from the master plan."

- Mark Trimble, president of Student Council, when asked to comment on the proposed plan, said, "I stand on the Fifth.", and was promptly removed to St. Zelda Hospital with a lacerated foot resulting from stepping on a bottle of Canadian Club.

Dr. Mark D. Pease, dean of the Evening College, speculated, "The Evening College will now be able to continue to confuse, er-infuse evening students with the type of education they can not afford."

The food services branch of the Institute has been initiating many new ideas in an attempt to speed service in the RITskeller Snack Bar. Among these has been the innovation of self service beverage machines.

Mark Bentz, vice president Business of Finances has made it clear that if this phase of the program is successful, complete self-service facilities for the preparation and serving of food including an honor system for paying will go into affect by the summer quarter.

The self-service beverage idea has run into a little trouble because although the students don't have to stand in line to get their drinks, they have been required to stand around for some time in order to get glasses from behind the counter to put the liquids in.

Among the other ideas that have been considered, are machines that will make ice cream when the proper ingredients are placed in the receptacle. Meat grinders to insure fresh meat for hamburgers will also be run by the students and a centrifugal force apparatus will be installed to separate milk from cream and also to produce butter and cheese will be of great interest to chemistry and physics students.

Bentz said that he hopes to have a completely self-service operation going full scale within the next few months and that he is sure the "ingenuity, fine attitude and honesty of the student body and faculty will make the operation a success."

Bookstore Has Record Profits

It has been announced by the Bookstore that profits for this month will be up to a record high of 234.75 percent over cost of the merchandise sold.

In an unprecedented move to save money the Bookstore brought in operations expert Mash Mertoon, (Horticulture '03) who was most recently Chief of the Gyp Dept. at Mark's Bargain Stores.

Many drastic measures were taken to lower costs and raise profits while doing a volume business to the captive audience here at camp. Salaries have been cut to new all time lows.

A close and unimpearable source said, "We ain't been gettin' but coolie wages up ta now and now dey gotta take away da bubble gum privileges."

In conclusion this reporter can only surmise that the good old bookstore is falling into the wicked ways of its illustrious nextdoor neighbor.

MARK SMOTHERED and his younger brother, Marc, warms up for one of the warm, sensitive ballads they will sing for the RIT folks Sunday night of Spring weekend.

Smothered Brothers: Duke Ellingson in Spring Book

Because of its limited budget, the Spring Weekend Committee was forced to introduce an austerity program. This resulted in hiring local groups for entertainment on Saturday and Sunday night.

The Smothered Brothers (who bear a vague resemblance to certain officials of the Institute) will appear here for their first professional appearance. The duo has been formed for two days. Mark Smothered, the eldest of the two, said, "Aw, we jus wanta warble a little and bring joy inta da lives of de RIT students."

Zelda Smothered, their mother, manages the group for a small (90 percent) agents fee. She was quite enthusiastic about the duo. "My boys are the greatest you'll ever hear - mind you now, I didn't say singers though."

Zelda Botts, chairman of the Sunday night tea in honor of the singing group, says students may purchase tickets at the door, but they must present their Student Association passes which will be issued two days after the event.

The Smothered Brothers are expected to present a lively program of popular and old tunes. On the program will be such favorites as: "I waltzed Sadie", "The Kage closes too Early", "Hangover Blues", and the old favorite "Jailbird Rock."

The tempo of Duke Ellingson's activities was as fast as ever during 1962, and he ran off with top honors in the jazz world's two most significant polls.

In the International Students' Poll organized by "Slow Beat" he was voted last in the arranger-composer category and last with his band, in the big band category.

He received the same results in the "Jazz Lovers" Poll, which also elected him top "Odd Beat" of the year. In each poll, too, the band's alto saxophone star, Brother "Staccato" Campbell, was voted last in his catagory.

During his concert in Washington, Duke was presented with a rail from the city and escorted from the White House out the back door. A dinner was given in his his honor at the local Salvation Army post.

Duke Ellingson has not neglected record fans. Following his first failure, "The Abominable Duke Ellingson," was the equally miserable album "Duke Ellingson—the Abominable."

Ellingson will be entertained at a cocktail party before the dance at the exclusive "Pass Times" Restaurant. Students are invited to attend this riot. Best dress is not required.

DUKE ELLINGSON

This is the architects sketch of the proposed renovated facade of the Duffy-Powers building. Construction is expected to begin in July. Dr. Melvin Ellingson announced the proposed renovation at a press conference yesterday.

Willies Worries. . .

April Fool Fun

April Fool! That time of the year when you become the fall guy for everyone's jokes is here. The staff has worked to provide entertainment and poke fun at some of our friends and critics. We hope we have achieved our goal of providing this merriment. To our friends (if we have any left) at the University of Rochester, we hope you don't mind our surprising you on this day. But read on now and hold your hats as we whiz off into the world of fantasy.

Powers Renovation Welcomed

The decision to renovate the Duffy-Powers ends the speculation prevalent on campus for the past several weeks. The acquisition of such noted architects as Rinfeather, Neuman and Bentz to design this building assures RIT of having a most spectacular edifice in the center of all this rub-

However, we are disturbed by two facts revealed; first, the inadequate electric power, and second, the architects divergence from the city's master plan.

How can we tired and haggard students accept the inadequate lighting that will be placed in the building? This is outrageous! A 25-watt bulb in the center of these spacious classrooms is hardly sufficient to allow sleeping students to remain unseen. Don't let Rinfeather sell flashlights in the lobby! Let us be allowed some freedom!

It is unfortunate that the architects had to deviate from city's master plan. However, the city should seriously consider revamping their master plans to conform to the design of the new Duffy-Powers.

Why Not Rudy Vallee?

Spring Weekend entertainment this year is unparalled in RIT history. We have never had such bad entertainment before. The Spring Weekend Committee can go on a austerity.program if they want to but not where the entertainment is concerned. For just a few extra dollars, the Committee could get such available stars as Rudy Vallee and The Lone Ranger and Trigger.

Progress – Pocketsize Diplomas

The decision to reduce the size of diplomas will be a welcome to many mygrating graduates of the Institute. The benefits of this type of diploma are numerous, the most important being keeping it close to something we all hold dear -- our pocketbooks.

Stistical **Students**

This is the 37th article in a series on the RIT cooperative employment by Dr. Mark Wilson, Coordinator of Cooperative Employment.

In this article I will discuss the average day in the average life of an average student in an cooperative program average here at little old average RIT. (This sentence has been checked for average, mean and mode, accuracy with Mark Rickmers Professor of Statistics in the Photo School.)

The student we shall watch in his daily chores is Mark Vam-piritsky. Mark is a sixth -grade student majoring in Food Administration. Mark coops at Murphy's Funeral Home and Hospital here in Rochester. He starts out his average (awk) day by getting up at 7 and catching the Ketchup bus at his corner.

Once at the home he heads for the lab and breakfast. After partaking of a long draft of tomato juice the first customer rolls in. The odor of formaldehyde is thick in the air but Mark moves in.

After this first job of the day comes coffee. Mark's work consists of unveiling the customers, draining and refilling crankcases polishing up the windshields and chrome and closing the hoods. Mark says he likes his work. All of his close relatives are embalmers and he wants to follow in their stretcher tracks.

We here at RIT feel that coop erative employment gives the student his first and therefore most important look at what real live work really is. It is through this vital process that the student learns to live and work with the real live kind of real people he will meet on the outside.

Mad Staffers Protect Deporter Fortresses

The Deporter staff, recognizing the precarious position in which they have been placed due to latest student faction uprisings. has taken steps to protect itself.

In negotiations with General GAL Von Gerwick, the Deporter editor - in - chief, Billis O'Warley, made arrangements to fortify the Clark Tower. Von Gerwick Promised full cooperation of the troops under his command, of which, 150 will be stationed in the Tower. Of course this will necessitate that the staff move to new quarters, but this is only a minor problem.

News editor Tony O'Carsbeen pushen implored General Von Gerwick not to set up the 80 mm Howitizer near his desk. He said, "I don't mind the noise so much, but oh that kickback!"

Photo editor Spen O'Kencer (noted fencing champion - having put a fence around one acre of land in two days, 14 hours and 36 minutes) is preparing fortification of the photo department with the aid of his assistant "Mad Dog O'Eisenberg. Kencer warned the staff about the mines he planted just before stepping on one and reaching the eternal reward.

Copy editor Amprsond O'Frank has abandoned the "pen is might-ier than the sword" bit, and has stocked a supply of foils and sabers in easy reach.

Sports editors Hank O'Blauberger and Chick O'Nerchio are limbering up their pitching arms throwing baseballs across the office having completed loading their drawers with grenades.

The Production managers are directing defense measures in the case of attack. Elrod O'Kaps is directing the entire defense proadvocating the use of

is devising plans for defense of an air attack, however the staff is disclaiming his theory helium balloon attack is the most practical form that can be used. Mohrsaw O'Queler is in the midst of completing arrangements for naval support on the Genesee River with the USS Enterprise. However, the Enterprise's skip-per, former Deporter PR man O'Burrick, feels that the Clarissa Street bridge may not be high enough for the ship to pass

Ding O'Waynegllbury and his assistants have been pushing Deproter Defense bonds and has reported a sale of 75 percent of them to Marsh Trimbull a wellknow student benefactor.

Bayley's Cororner

As I look out from The deep pit from which I view the deep and wicked World,

I contemplate how calm and kind it would be without the Fraternities and all that. It is cool and calm here in That dark space I call my Little world between the walls. This is my little home away from the noises and shatterings of the world outisde. This is my world here between

the living and the dead. Here in my own little heaven. GET THE HELL OUT OF MY

Rumble Gurgle

Dear Editor,

As the true guardian of our student heritage, I appeal to you in a most delicate matter which has been the scourge of CU341. I have never been prompted to write a letter to the editor before, but in dire need I have penned my thoughts.

While we are in class, we seem to be overcome by a strange and overpowering odor. We are at a loss as to its source, although it seems to be a direct effort of an evil mind.

Never, have we been able to finish a class when this gaseous vapor has descended upon us with the horrible effect of (horrors) placing the class in a trance-like stupor, much resempling sleep This then is our problem, which we appeal to you to make not light of, but investigate and relay your advice to us

Adrenal Z. Glan Student of CU341

After careful study (Ed. Note) for the past nine weeks, it is the opinion of the entire Deporter Staff that the prime solution is to be overcome by this stupor for the duration of ten weeks at which time a C pill will solve the situation entirely.

Dear Editor,

Ash u no, it ish tea sol purpuss of eech stuedent heer at R.U.T. 2 at lesht git a sea in all of hish studees. I seam too bee havein

trubel gittin throo mi cumu. inglis hear. conn. .cumo. thair any waay that I cin bee added by U? Ish shoe, I wood de---liek to here frum u. Tanks.

Daniel Webster Jr. (Sic) (Ed. Note) How would you like to work as a proof reader in the Grafic Arts Department?

Dear Editor.

Four score and seven years ago, our forefathers brought forth upon this continent a new nation, conceived in liberty and.

Unsigned (Ed. Note) It will never work!

Dear Editor,
When !\$—& \$&&?'\$ "—&? &&!
—&('—\$' ')98\$8\$8 \$')!&('\$!0!&(!—&:(''\$ \$:(? \$'&—(!—&(!— (Ed. Note) —&(? \$'? (((—));\$; -&(:!\$—'&:(?'-&:(\$—&:! -& -&(:!\$—&:''((((-&! '&-(? !(-&(:'\$—&:? and therefore '\$):(. -(:!\$--&:(?. So There!

Dear Editor.

It has been brought to my attention that in recent years the fine piece of ornamental cement and vegatation in the center of quad has been brought to much criticism if only by the term ogy used to describe it. "Dough-nut," "Babylonian Gardens," and many similar and even obsene titles are not befitting such a monument of the finest example

of Neo - Periferal - Neandrethal-Farcism, on the South Peruvian Continent.

It is neither fitting nor justified that the students of this timehonored institution perform this injustice to modern architecture. It is with-firm conviction and supreme effort that the Deporter should proceed to stem in the bud, to halt at the moment of supreme truth this dishonorable outrage.

We, at this moment of crisis and emergency should shoulder this burden placed upon us by the generations past, and conquer as did the Romans, on our field of

Mark Q. Angstrom Peddle Pusher "59"

Dear Editor,

I was greived to read your recent editorial on "Ban the Beer" on the River Campus. Considering that the U of R draws its name (River Campus) from the very water that produces Rochester's best liquid refreshment, I feel it is unfair that Miss -a - sippi Beer should be removed from the campus soda machines, since our beer is no better than average beer we feel it only proper that social life. it should increase greater hangovers, and more flunkies per class.

> Ivan J. Brew President Miss-a-sippi Soda Corporation

Operation Hi Ball Reformed Mark Pittlad Commandante

Last year's ill-fated Operation Hi-Ball will fly into the sky again this spring, announced Mark Pittlad, Commandante of this year's revitalized organization.

The RIT group was formed last year to experiment in problems of radio operated aerial photography from captive balloons. The group of several hundred second-year tech students from School of Photography met many unfortunate problems.

In late May, the project ended in a headline making fiasco, with tangled balloons and cables caught in various parts of the RIT Chapel in a spectacular display of "aft gang aglee."

As Photo School illustrators rolled on the sidewalks in merriment, a fire truck arrived to untangle the mess and blocked in-ner loop rush-hour traffic to create the city's worst traffic jam in 11 years. A few weeks after this jam, Mark Hassellcap, Institute director of Alumni Re-lations, said that new-campus fund donations had hit a dramatic low as a result of it.

This year, most of the problems have been solved and the group looks forward to spectacular suc-

number of workers has been hiked to 12,000 and six-dozen bull horns will be available instead of two. The old-fashioned balloon idea has been popped in favor of several small rockets designed by Mark (V-3) Darrow.

As a precautionary measure the will be evacuated one hour before blast-off.

The semi-secret fraternity WELK (sometimes known as KLEW) will handle all special status symbol arrangements. Hi-Ball pith helmets, sweat shirts and towels are available. Souvenir programs and score cards will be printed.

Staff members will include

Mel Agrees On **New Diplomas**

As an austerity measure the Board of Trustees has decided to change both the format and stock of the RIT diploma. Dr. Melvin Ellingson has announced that the new diplomas will be presented in easy to carry 31/2 x 5 inch form.

This move was prompted by several factors, probably the most influential being the comments heard year after year by the alumni association that graduates, due to the quality of education at the Institute are offered positions of a very competitive nature which necessitated numerous job changes.

It was felt that a pocket-style diploma would be extremely useful in these circumstances. It was furthermore stated that the RIT diploma has become such a paper of great value in our modern world, that it should be held in importance second to none except perhaps one's selective service card.

As an austerity measure to enable higher faculty-staff salaries the diploma will be printed upon newsprint left over from Deporter issues, and then laminated. (At the mere cost of \$15 plus Monroe County tax to the Mark Lunn, Mark Blair, Mark Rylance, Mark Corvelli, Mark Van Doosie and Mark Lentz. Thesis review day, May 20, will again be the day for this shot to

be heard 'round the Ward.

Melvin Potts---"Thou canst not realize the effects of the psychological impacts where thou placest they serbefore thy fellow

Student Engaged In Piece Corp.

A dedicated RIT student, Mark Potts (SAK VI), is now engaged in activities with the Piece Corps. Mark, a graduate of Lower Hoboken Senior Grade School, volunteered to join the Corps after taking a course in Psychology with Mark Levan.

Mash said, "Thou canst not realize the effects of the psychological impacts where thou placest thy service before thy fellow man." (Potts flunked the course and it necessitated his leaving the Institute on his 17th pro.)

Potts was first assigned to the Fort Dix Training Camp where he stayed for three weeks during which time he received a cram course in Sanskrit.

Then he was transfered to Fort Yowhogo in Alaska where he received guerilla training. This course consisted mainly of swamp crawling, mimeographing in a mosquito net, and propagandizing

Finally after a year of training on the White House lawn, Potts was given his first assignment - training pigmies on West 42nd. Street, the Bronx.

Potts was then sent to the remote section of the Mohave desert on a secret mission which he has since been trying to find out what it was; however his trip was not for naught for his picture shows the beautifual tan he received on

Bunny Club In Mens Residence

Negotiations are underway for the purchase of Nathaniel Rochester Hall. In highly secret negotiations, Playboy Inc. is negotiatwith the administration to purchase the Men's Dorm for use as a "Bunny Club."

According to Mark Bentz, Playboy Inc. approached RIT last June concerning the possible sale. Negotiations between Playboy and the administration bogged down when Playboy claimed to have the Institute "over the barrel" because "no one would seriously consider buying that dilapidated

Bentz said that Playboy's last offer was \$25,000 and a life time pass to Mark Rinfeather. Bentz called this offer "outrageous Ellingson and I want a pass too."

The Institute is reportedly asking \$2,500,000 plus the services of the maintenance staff for the building. **Playboy** says they are definitely interested in the services of Mark Murray as chief of their maintenance crews for all their "Bunny Clubs."

Speculation has risen as to the new manager of the Rochester Bunny Club. Prominent in all circles of thought is RIT's Diwrecktor of Housing Mark Rinfeather.

When asked to comment on this, he said, "Well I'll say this about that, this is a interesting thought, however I do not feel at this time there is any basis for the rumor. But you'll have to excuse me I I have a plane to catch for New York, I'm thinking of starting a rabbit farm."

Institute officials are expected to meet with officials of Playboy next week at the Playboy Club in Chicago.

Henrietta Fire **Brigade Formed**

A student operated Institute fire brigade, under the direction of Chief Mark Sammartino will be formed immediately on campus, vice president Mark Campbell announced today.

Six of the new Segrave 12,000 pumpers, complete with deluge guns, and four Pitman (no relation to RIT's Mark Pittman) 160 foot snorkel units have been purchased and will be delivered in time for a "practice" fire rummored for the Eastman Annex April 12.

Vice President Mark Bends was said to have said that if "the insurance fuzz don't catch on to this one" there may be other "practice" fires at the heavily insured Zelda Baker Hall and SAC.

Brigade Captains will be Mark Bird and Mark Sparrow. Crew members will include Mark Lentz, Mark Walsh, Mark Kong Dong, Mark Cosgrave, Mark Loose, Mark Winter, Mark Spring, Mark James Grant, Mark Felbie, Mark Mick-can-ick, Mark Lumpeck, Mark (fire-hair) Stein, Mark Mitch, Mark Rosie, Mark Fatoorah and Ralph Murray.

Interested recruits should leave a note in the photo faculty mail folder of Mark "Sparks" Spencer.

Warner Bros. To Film "College Joe" At RIT

Today will be a big day for about 10 to 15 lucky RIT undergraduates who will be chosen by the Warner Bros. motion picture company to appear in one of their upcoming pictures, "College Joe."

The companies' scouts have been in upstate New York at the various colleges and universities looking for typical collegiates to appear in the comedy of a freshman girl who is mistaken for a male when she files her applica-tion under the name of Jo.

Victor Birnhardt, vice president in charge of casting for the big Hollywood company said in a letter to Institute Student Activities Director A. Mark Walls, "We are looking for actual college people to appear in the movie and although their parts in most cases will not be starring roles, the play and the travel involved will be a terrific opportunity for the young

people we select."

The filming of the movie will start during the first few weeks in June on the University of Wisconsin campus in Madison, Wisconsin, and will continue through the end of August in other cities around the country. Among the places the cast will visit are New York City, Miami, San Francisco, Las Vegas, and Mexico City.

Walls urges all students interested in being selected to act on their best behavior during the next few days because the scouts will be observing them in all phases of college life during this

GE Dept. Announces Faculty Change Over

In the Chemistry Dept., which is becoming increasingly co-ed, a department co-director program will be instituted. Dr. Mark Van Puresome will be department head for men and Zelda Sandberg will be department head for women. Dr. Mark Hayles will work part-time as Assistant Coach of the Hockey team.

In the Electrical Dept., in order that he can devote full-time to the duties of dean of the College of Applied Sciences, Mark Morecock will be replaced as head of the Electrical Dept. by Mark
"Sparky" Steffenhagen who is
coming to Electrical from the
College of General Confusion where he was an instructor in mental cases.

Mark Mayr replaces LeCain as Head of the Mechanical Dept. assisted by Mark Hadsin-LeCain was appointed Dean of the newly-created College of Space Sciences.

Dr. Mark Scott, director of the School of Business Administra-tion, said, "No changes have been made in our faculty yet, but changes can be expected in the near future."

Zelda Hurley, coordinator of the Food Administration Dept.., has announced the addition of Mark Fitzpatrick as part-time intructor in Foods who will teach "Psychology in Food serving" (F 1134-5) or "How to make people eat what they don't order."

Zelda Hogadone, director of the School of Retailing, announced that Mark Burkholder will teach a new course, "Chemistry of a new course, "Swatches" (R 102).

Mark Sliker replaces Mark Wit-meyer as director of the School of Art and Design. Mark Barschel has been named Assistant Di-rector. Witmeyer resigned his post as Director after being appointed Dean of the College of (Continued on Page 6)

Alumni Nuts

Mark Kent. (Mech 333) has been good enough to drop a note to the Alumni Office. Although no check was enclosed Hasbeen-plugged read it and informed us of the contents.

Kent, it seems, has discovered a method by which through the use of hot air, and pumps, and boilers, and a small portable nuclear reactor, and various gaskets and frammises, he has been able to pump hot air out his feenee and thereby fly through the air like a boid.

He claims that the other Kent is merely an impostor. He also de-clares that he owes all he has and knows to dear old RIT.

Upon reading that. Hasbeenplugged carefully rescaled the letter and returned it along with a new campii brochure and request for donation.

Mark Motherly (Home Ech. '41) is currently engaged in teaching a course in Advanced Oedipus Theory. This course is being given as part of a concentration in Bringing Up Father.

He has told us here at camp that he owes all he knows of the Oedipus Complex to a course he took while here at RIT.

A check has revealed that the course was Hooey 222 and the instructor, L. Mark Sandpaper.
Oark (Fletch Bay) Sliker-than-

thou, has reported in to the alumni office of his whereabouts. Upon receiving a curt rebuttal from Mark C. Hasbeenplugged, he took it into his own creative mind to write directly to the

He informs us that he is now engaged in. He also informed the Deporter that as soon as the ice thaws he plans to move from the hypocritical, materialists in the Temple of the Creative Spirit at the corner of Sprung and Washing, to a raft on wellknown Hemlock Lake.

He claims that from there he can better direct the forces which move his innermost being, his stomach.

Our Man In Cuba; Creates Chaos There

Never in the history of collegiate news reportage has there been as valiant an effort made to bring out the facts as our own Mark Grubby.

Grubby, a student in the School of Literature has spent the last six months in the chaos of modern Cuba. As a matter of fact, they were his last six months anywhere.

Mark Grubby

He was imprisoned and shot last week for the state's highest offense, as he was caught stealing toothpicks from the peoples' wood commune and the poor, deranged man was setting up Burma Shave signs throughout the countryside.

We must forgive him for dying, however, as he did relay some of the funniest jokes heard in Cuba for many a day before he tried to show Castro the Indian Rope Trick, but failed and was commissioned to demonstrate the peoples' new bulletproof vest instead.

In his last few communiques, Grubby had shown a near genius talent for searching out the controversial, and then hiding out. It was rumored that Grubby was responsible for the failure of the Bay of Pigs invasion, but he dismissed the charge as pure balder-

(Continued from page 3)
Fine Arts at the University of Rochester.

Mark Brennan, Director of the School for American Craftsmen, said emphatically, "There will be no changes in my department." It was too far a walk for anyone to investigate.

Mrs. Zelda Neblette, director of the School of Photography before her reappointment to the position as guidance counselor at Edgerton Park Apartments, inferred at an exclusive Reporter interview, that Mark Croom will be coordinator for the United States Dept. of the Interior, Forestry Division, Pest Control Center. His position here at RIT is to be filled by Dr. Mark H. Carroll, who will teach "Aestetics in Motion Picture Production" (Ph 732). It was also announced that Mark N. Todd will be teaching advanced violin playing in the Peace Corps. Filling in for Todd in optics, physics and advanced photo theory will be Mark C. Bagby.

In the School of Printing the biggest change came with the retirement of Mark G. Culver, director of the school. Mark was replaced by Mark Beresford, Jr. formerly constructor of Monotype.

Beresford has announced the

dash when questioned later.

Grubby stated that is was merely a coincidence that 10,000 Cuban exiles had to be landing as he sent a telegram to Castro inviting him to the local Halloween festivities.

It was also recored in his illustrious career that Grubby may have closed Attorney John Donovan some grief when in a measure of kindhearted love of his Cuban friends, he stuffed both Donovan's luggage and the ransom packages with Polaris mockups.

Grubby will also be well remembered for his excellant photographic record of the conditions at our Quantamano Navel Base, where it was only through the fault of the local camera dealer that his negatives were accidently switched with those of the University of Havana's architectural studies of the Inca ruins.

This might have caused a considerable stir in the State Department, but Mark went undaunted in his quest. He again arrived in the spotlight when he was arrested for stoning the Russian delegation, hoping to hit the window of his secretary Zelda Faggot (Basket Weaving "73") who had overslept.

Yes, Grubby will always be remembered as the sole American who singlehandedly was responsible for the housing of 50,000 Cubans in middle-income housing, no matter who calls them concentration camps.

The dexterity, and example of Mark Grubby will stand as a shining example to all, as typical of the quality of RIT graduates.

The Institute has announced a change in the school calendar effective this school year. The Easter Break will be extended one day.

This means students may have an extra day to return to school relieving the necessity of returning Easter. Sunday.

shifting of instructors to courses better suited to them. Mark W. Hunt, formerly instructor of "Production Procedures" will now teach "Elrod casting I and II" Pr 234, 235). Mark Johnson will now teach "Advanced Flexographic Technology" (Pr 045).

graphic Technology" (Pr 045).

Mark Walsh will teach "Offset
Press Production and Control I
and II", assisted by Mark Short.

H. Mark Archer will instruct "Financial Failure Techniques" replacing Mark Bowles who will instruct "Advanced Production Proofreading". Mark Southworth and Mark Webster will teach a course called "1001 and 1 ways to create headaches for Pressman."

Mark Brooks succeds Mark Wilson as Dean of the College of General Confusion. Wilson has been appointed coordinator of Cooperative Unemployment. Mark Steffenhagen (who is famous for the quote: "You carry on quite a conversation when you sleep.") has been appointed director of the Electrical Dept. and will be replaced as Mental instructor by Mark (Dirty books) O'Brine. L. Mark Sanders will have a course in "Literature and Underwater Basketweaving." Zelda Mosley will teach "Cheating Techniques at Harvard."

Self Service Creates Havoc In Snack Bar

The RIT Cafeteria Service, in response to the increased demands of a growing student body and a proportionate increase in service requirements, has decided to operate the food service on an entirely self-service basis.

The new changes will go into effect the first chance the present staff has a chance to quit.

Mash Yung, Food Service manager, has stated that the change will do much to improve operating speed of the cafeteria. Yung has also stated that it will take a speedy operator to make any more money than the present return anyway.

The new changes will be as gradual as Dr. Mash Murphy can accomodate. Two cases were already referred to the medical center as a fight with hot grease ensued as two students had a slight disagreement on priority on the french fries which were being french fried.

The second similar incident which held back the complete change-over involved a dirty knife, spoon, and fork throwing incident when in the height of the battle it was learned that Zelda Q. Fink had made off with the cash register in a true spirit of self-service.

The **Deporter** is apalled at the lack of enthusiasm of the student body to the new system and in a show of disapproval has moved its own catering service into the tower.

The final step in the self-service changeover is due this week when the present milk dispensing machine will be replaced by a cow and three buckets with the price of milk rising slightly (from 10 to 25 cents) due to the increased freshness.

All students will be asked as an economy measure to extend the life of the cow, and take a new 1 credit course, "Animal husbandry (AG342)."

New Club Formed; Membership Drive to Begin

Pantie-raid buffs will be happy to hear of the newest organization on campus, the RIT Jacques Club. Ron Glazer, founder of the group says tat he had been thinking of it for a long time but never though anything would develop.

Plans to organize were started when he learned of a group of girls who were interested in running retailiatory raids. Marlene Sass and some of her friends have already begun operations and plan many expeditions in the near future.

Glazer is "a little chicken," and may not get his group in actual operation for some weeks. All those wishing to join in the activities can see Glazer in his room on the second floor of the Kage.

Candidate Concerned Over Coverage Depth

(Ed. Note)

In a recent fiery interview with the **Deporter**, it was learned that Mark Q.X. Beerd, improbably heir-apparent to the office of Student Council president, felt that not enough attention was being paid to his candidacy. In answer to this challenge the **Deporter** will, beginning below, reproduce the entirety of Beerd's disconsonant scree-er-speeches.

"In all fairness to myself, I must begin by saying, that futhermore, and in all sincerity, the present New York newspaper strike, while the food department goes on Pro, is not exactically and yet emphatically wrong with the self-service registration procedure.

Let me proceed if I may, or then, if I might not we will be forced to coffee in the old frontier of conference.

And therefore and quite unnecessarily did Mussolini attempt at the last Student Council Tea with such forebearing and grandeloguence and all for the workers too.

"Remember me", these immoral words should stand forth with fortitude and vigilance and the next time you shower, use "Dial". We shall fight the Web Presses, from the Henrietta fire department to the call of "old Virginny."

April Fool

LLOYD BEERD

All of us should remember. That has been said about this, and I will leave you with none of that! or this! Our cry shall be, and it will be for it shall never not be. Forever!

Our cries, Your cries, My election is superficial as this was and always will be. We must remember as politicians or as polecats at the poles, that when the piles arrive NO—DOZ it has been said, has plagerized every pile president Trump, with great vigor hadcontinually and eventually fought, with grim determination and vigor, and with vigoruos vigor yet as such surpassed only by itself in this time of national and therefore retrifocal need.

So we will, or rather I will, leave you with nothing. It is fitting that on this delection and night of compensation that the truth be know and the past vigorously supported. I therefore leave you with the following threat and promise: "Every absurdity has a champion" (Melvin Goldsmith).

A well known philosopher J. Patrick Fennedy will be the speaker at the RIT convocation to be held on June 1, 1963. Fennedy will speak on "Devious devices for deviating from present tax structures." He is expected to arrive in Rochester the day before convocation to speak to a newly appointed professor at the U of R.

To Fill Void

The RIT Potsy and Hop-scotch club is looking for candidates to fill a void created when their five starters from last years very successful team took to drinking and were uncerimoniously carted awav

Jeff Seemsin, who holds all the existing school records and many national ones as well, is the only team member still eligible to play

Seemsin, as you may remember, in a match against Eastman Dental School ran 1.265,987 boxes. 2,890 radishes and was able to get all eight boxes for his very own 800,002 in a row with out stopping.

This feat, not only set many of the international records but it is interesting to note that in the three day period during which he made this extradordinary run, he was never once called butter fingers.

"Twinkle Toes" Glamack coach of the club has stated that he needs many new people to appear for the club this year. "Dagnabit! This is one of the most interesting and challenging sports in the world today. Our new uniforms, the yellow knickers with the pink stripe, picked out especially for the team by my wife are just perfect for the winning team we were expecting; but we may have to let the boys out in their BVD's if we don't expect to win."

Asked to comment about his possibilities of making All-American, Jeff Seemsin said, "Chances are poor!" Without the other five men to back him up in a team effort, it seems like his chances aren't any too good.

SASCB Plans **Annual Excursion** This Spring

The Society for the Advancement of Sport Car Buffs is making plans for their annual excursion to the races this spring. Busses will leave the Kage at 8:30 the night before the next warm day.

Girls will be allowed to sign out for the night and sleeping accomodations will be provided on the way to the races at the Mohawk Manor.

The busses will arrive at the Motel at 8:33 that night and will leave just in time to make the

start of the races.

The caravan will proceed down Plymouth Ave. after breakfast at 11 the next morning and arrive at the site of the races, the corner of corner of Plymouth and Main at

Club President Baron Bomber urges everyone to sign up immediately. "It should be a terrific mediately. "It should be a terrific weekend. The busses are brand new and have toilets and the accomodations for the night are swell. I should know."

One year ago, this Spring, the Germa-sea Brew Inc., allotted a grant to the U of R Stout-Rock Research Center to discover the Germa-secret. Stout-Rock officials announced today that without a doubt the undeniable secret is that Shiltz and Dooley spit in Rimlock Lake. The unqualified announcement was made after many hangovers of research.

To RIT; 1963

All-American

All-American basketball star, Larry Kramer, has been accepted to attend the Insititute in the Fall of this year. Kramer, who applied for transfer from NYU, will begin studying in the Schooll for American Craftsmen, in September and will consequently not be eligible to play on the RIT team until the fall of 1964.

Upon hearing of Kramer's acceptance, Mark Alexander Jr., stated that he was elated with the possibilities of having such an outstanding star under his guidance and that "although the NCA rules state that a transfer student is incligible to play intercollegiate sports during his first year of transfer, we have a few ideas on how to get around this Mark Glamack, assistant to the coach was recorded as saying, "Dagnabit, hic hic!"

A long distance phone call to Kramer in New York, revealed that he was undecided whether to persue an education in law or medicine, and finally took a third alternative, basket-weaving

"I was a little disconcerted after the Violets lost their final game of the season against Duke in the playoffs and upon noting in many of the national sports publications that RIT had won its final game I immediately filed my application there. I am a great believer in ending a season with a win." Kramer was also quoted as saying, "I'm sure my time at RIT will be well spent."

Kramer, who is from Schenectady, the same town as Tiger star Bill Lamoureux, says that he never heard of Bill.

A sophmore, in his second year of study, Kramer was selected to an All-American guard position after averaging about 30 points per game. His fine desire, drive sportmanship, and team spirit, coupled with his large donations to the NCAA and ECAC rank him worthy of this honor.

Canidates Needed Star Coming New Coach Is Named

RIT's Athletic Department will have a new addition to the coaching staff next fall. Mark Lunn who has been in the national headlines in recent weeks after he was accused by The Saturday Morning Post of conspiring to fix the Alabama-Georgia football game last year, has signed a contract to coach football at the Institute for the next three years

Bob Closed, Assistant to the athletic director says that although we don't have a football team we feel that the Institute could use the publicity this man

Speak At Dinner

Plans for the Institute's annual tonaire Resturant, or Point on Henrietta Road.

Included on the program is an infamous guest speaker, George Washington Stockwell, leader of the Gnazi Party in North America. Although Hillel has filed a formal complaint concerning his to speak on "The Place of Gna-

ment. The Hillel Society and Tau Epsion Phi Fraternity are planning a gala combination welcome and send off party for Stockwell and are elated at the fact that he will be arriving on Easter Sunday.

Gnazi Leader To

awards banquet are virtually completed, and the committee has announced its intentions for this year. Although the date hasn't been decided everything else is in the air until some decision is made. The event will be held at either the Manger Hotel, the Powers Burlap Room, the Clin-Golden

appearance, the committee seems set on having Herr Stockwell here zism on a Concrete Campus.' Stockwell displayed a great desire to visit the Institute, and tour the facilities, especially those in the heat and mechanics depart-

Our Man On Campus?"

MARK BOWELSTEIN

Donkey Dung

In the past few months, while I have had the opportunity to express myself on these pages in the capacity of Sports Editor of the Deporter, I have praised and lauded the various athletic activities on campus and the over-zealous supportors of these programs around the Institute. Unfortunately, I must take this time to ruin a perfect record, and register some complaints.

Most distressing, is a complaint from the Genesee Brewing Company, who say that our crew team has been littering Hemlock Lake. A little care could easily alleviate this problem if the team members would endeavor to carry litter bags in their boats. Another distressing occurrence has come to my attention. It seems that many of the musicians in the RIT Marching Band have not been punctual in their arrival to football games. The large section reserved for them in the spacious outdoor stadium is often conspicuously empty during the first half.

After the Hockey Clubs loss to Brockport some time ago, it seemed very unsportsmanlike to act as the taem did. They displayed very poor taste in fatally stabbing several of the Brockport players. The club's president, Tim Butler was shocked by the outburst and immediately sent the Brockport coach a letter of apology.

The athletic committee has announced that RIT will not use the controversial fiber-glass vaulting poles in the upcoming track season. An announcement issued last week stated that the committee felt the large outlay required to supply our students with those poles would be completely foolish since we don't have a track team.

The announcement also gave first word on the upcoming Leterman's Club Awards Banquet to be held at Nick Tahoe's fashionable Main St. restaurant. Guests will have individual choice from the menu which has been aproved by gourmets throughout the world. Russ Carter, club president suggests that most of the people will be choosing "two wid everything, a sada batatoes, and a pepz," Plans also call for entertainment by famous top dancer Bo Jangles who will do a saw dust dance. The guest speaker, Mark Eichmann who will speak on the importance of showering after athletic events.

Heitmanek Turns

Pro Next Year

Tiger wrestling Capt. Jerry Hejtmanek, has signed a contract to wrestle professionally right after graduation. Although the exact terms of the contract are not know investigators were able to come up with the following information.

Since he hails from Little Falls, he will use the stage name of "The Maharajah." Emulatiag "The Sheik" from Coney Island, he will introduce several new holds.

The most famous of these is his triple suflex, which he will use in conjunction with the Purple Herman, a hold he learned from Rick Lebowitz heavy weight champ of Iraq.

He also has the sternem smash, and the camel bite which is still in development, written into many of his scripts. "The Maharajah" will attend a leading drama school before his first professional engagement.

Coach Buller who taught him everything he knows", feels Jerry will be successful because he has excellent technique

Alex Jr. Goes Ky.

Athletic Director, Mark Alexander Jr. who is in Louisville, Ky. for a conference with the basketball coaches from all over the country, is heading up a committee there which will revise several of the existing NCAA

He has many ideas on this subject. Among those he discussed before his departure, he was particularly vehement about low-ering the basket, moving up the foul line, getting alumni to ref home games, and requiring the visiting team to be the skins 'whether they like it or not".

As his plane was ready to leave, in order to accentuate his feelings, he said to the throng of airport departure buffs who were hired especially for the occasion, "Shtup amena, moona roony, mechvalta comminusy caladasa."

in hair pulling, eye gouging, and shin kicking, and has an excellent aptitude for "hiding various and sundriy lethal weapons in his underwear."

His career shows great promise because Jerry himself has told us that he is "the greatest wres-tler in the world."

Undergraduate Course Improvement Underway

Newly appointed UR High Professor puts on show at a recent press conference. He was demonstrating the techniques of gaining sympathy in politics. (Zelda Nebleet Photo)

Rickardo Noxin, former national political figure of note, will join the faculty of UR, with the newly created title of High Professor, on May 7, it was announced today.

He will teach only graduate courses as part of the University's policy of improving the undergraduate program.

Lectures planned include:

"How to try in politics without really succeeding." "How to select the "right" dog for a pet." "Television, lights and lighting." "Don't Debate!" "How to get the Commies to riot against you." "Technique of the "final" press conference."

Contacted by phone in his native California, he was asked what his party's new "Get Castro Out!" policy was all about. He replied, "Who said anything about Castro? We mean Kennedy."

Graduate students interested in taking the course should contact the Monroe County Democratic Committee, HA 6-3210.

Undergraduates who want to protest the appointment should contact Mark at LO 2-5780 and do so often.

The deadline for residence hall applications has been extended for one week. All applications must be turned in by MIDNIGHT on the evening of APRIL 14.

Applications may be otained at any director's office. Applications recieved after this date will be considered late and assignments will be delayed.

MIDTOWN PLATZA officials have announced their intention of presenting the UR with the platza clock now prominent in the maul. (Owl Photo)

Curfews Ended: Major Setback In Housing Policy

After due consideration and thorough investigation, R i v e r Campus Officals at the U of R announced their final ultimatum to abolsih curfews for women. The decision came after constant prodding by an A HOAX Committee to Abolish Curfews. The Committee is comprised of surplus Sophomore girls.

U fo R officials did make one stipulation, however the men will now have curfews. Men will have to be in at 11:03 on weekdays, 11:36 Fridays and 12:07 on Saturdays. No women will be allowed in men's residence halls. If there is a surplus in the Men's residence hall, they will be housed in the women's dorms.

Heralded by the **Times** as a major setback in housing the new curfews go into effect April 1.

Officials expect that the new system will encourage more girls to attend the U or R by decreasing the accident rate of girl's rushing to meet nightly curfew deadlines. With the added responsibility and convenience the U or R hopes to win a major battle in women sufferage.

Stock Crash With Advent Of Color TV

Beginning with the school year 1963-64 all River Campus housing facilities will be equipped with Color TV consoling units.

A sympathic dormitory official admitted that the rigors and strains of U of R college life are much too great to be great. With consoling units in every room we hope to improve morale, technical understanding of color and a greater appreciation of music.

Of course, tuition will have to be raised in order to pay for Color TV consoling units. Campus officials agree the educational benefits to be derived far supersede the material inconvenience. RG and E has already been contracted to supply electricity to each and every room.

Opposition came from the U of R bookstore officials. They predicted that bookstore stocks may crash with the advent of electricity if stockholders found out about the 5,000,000 flashlight batteries now on stock.

U of R advances in consoling and education seem prevalent for the centuries to come.

FAA investigators have ordered UR officials to remove the Tower from this beautiful edifice because they feel it will be a hazard to jet service to Rochester. (Savage Photo)

The Federal Aviation Agency (FAA) has notified UR officials that the Rush Rees Tower must be removed. The action was prompted by the Agency's recent investigation of the Monroe County Airport facilities.

Agency Administrator Najeeb E. Halaby said, "Our investigators were assigned to determine the feasibility of the jet runways planned for the Monroe County Airport. Because of the flight patterns necessary for jet service and in the interest of air safety, it will be necessary for University officials to initiate steps for the removal of the Tower on top of the library which is in the direct path of incoming aircraft."

Agency investigators made a

six-month study of Rochester's aircraft flight patterns to determine the best route for incoming jet aircraft. Jet service will begin in Rochester in the fall of 1964.

Chief investigator George Carson stated that the route over the UR campus was found best for year-round traffic. "If this route is to be used, all obstacles must be removed from the path and the biggest obstacle is the University of Rochester Library's tower."

The Board of Trustees is expected to call an emergency session on Thursday to determine what action should be taken. Feeling is mixed on campus, but many students feel court action should be instituted to protect the beauty of the UR campus.

University Will Lease Tower Dorm Facilities

"Due to the lack of enough individuals to fill the Towers, the University will lease the dorm facilities to the Rochester Institute of Technology," said Charles Lantern, director of men's residence halls.

Men's applications for the Towers has fallen short of the dorm's capacity. University officials are puzzled at the reluctance of students to live in four-man or sixman rooms.

RIT, having made its decision to expand facilities on a new campus in Henrietta, has found itself unable to provide sufficient housing facilities for its out-of-town students.

RIT officials approached UR officials about the possible leasing of dorm facilities on the UR campus. Mark Rinfeather, director of Housing at RIT, met with Charles Lantern, UR director of mens' residence halls last week to complete final plans.

The Towers, a co-ed dorm, is expected to remain so when RIT takes over. Rinfeather said, "RIT students have swamped my office for applications to live in the Towers—even in four-man or sixman rooms."

Dean Retracts Statement On Honor System

"I retract the statement I made in the last issue of the Crampus Times advocating the Honor System," said Dean Robert Franz.

"It just won't work here at UR and it has been proved to me." Dean Franz had stated before that at the institutions where he studied—Oberlin and Princeton—had successful Honor Systems.

"Unfortunately, students are taking advantage of the system, and are not showing the mature responsibility necessary for such a system to be effective."

"Therefore, I withdraw my support of an Honor System at UR."
