## All girl band to begin TX agenda

Tonight's "Prelude" in Ritter-Clark gym will kick off the 20th annual Sweetheart Ball Weekend sponsored by Theta Xi fraternity. The Southern Comforts, an all-girl rock and roll band who were last seen on campus at Theta Xi's Monte Carlo Caper in October, will provide the entertainment from 9 to 1. Dancing and beer will be available and admission will be \$1.25 per person and \$2.50 a couple.

Highlighting the weekend will be the crowning of the Theta Xi Sweetheart tomorrow night at Island Valley Country Club. The present sweetheart, Dottie Kerman, will make the presentation.

Candidates for the sweetheart title are Jan Camelio (A&D) of Rochester, Dina Hebert (Ret 3) of Rocky River, Ohio, Jo Jackson (Ret 3) of Schuylerville, Kathy McCormick (Ret 4) of Euclid, O., and Gail Stamatis (A&D 2) of Glen Cove.

Providing music for the ball from 9 to 1 will be Ken Unwin and his orchestra. This event will be closed to Greeks because of a recent IFC ruling.

Closing the weekend on Sunday afternoon will be a social hour at the Green Lantern. At this time a drawing for the tuition raffle will be held.

**PREPARATIONS**—The brothers of Theta Xi fraternity add the finishing touches to their weekend preparations. An all girl band kicks-off activities in the gym tonight. (Denton Ortman)

## Carey addresses Senate about role of an alumnus

by Selina Zygmunt

With the role of an RIT alumnus as his theme, James Carey, director of the Alumni Association, spoke before Student Senate this week. Along with Glen Curtis, a 1964 graduate of the Institute, Carey stressed interest in RIT as one of the key obligations of an alumnus.

According to Carey, a graduate must relate that which is happening to education in general to that which is happening to RIT. The value of a degree is not static, but like the value of stocks, it varies. If the standards of the Institute increase, then the value of the degree increases also.

Tied in with interest in the institution is the obligation of the alumnus to act as a public relations spokesman for RIT. "One of the most valuable ways to contribute to RIT is to see that high caliber students make their way here," Carey said. Students are also urged to report back to the Institute on the effectiveness of the courses they took while attending school.

Carey spoke briefly on the history of the Alumni Association and its future goals, which include a projected 24-page alumni magazine to appear six times a year.

Senate Chairman Ray Baker gave a summary of the 1966 Long Range Planning meeting held Feb. 4 and 5 at the Trenholm Inn in Farmington. The mood for that meeting was set by keynote speaker, Michael J. Kami, director of corporate planning at Xerox. Emphasis was placed on early decision of intended goals in order to maintain the momentum needed to carry them beyond the present and into the future.

In what was described as "a real brainstorming session," groups of faculty and administrative staff (as well as the three student representatives, Baker, Tom Staab (Pr 2) and Dave Rylance (Pr 3)) were given topics ranging from in-service training of new faculty members to the best utilization of financial aid to students to discuss.

"Perhaps the most positive benefit of the meeting," stated Baker, (Continued on page 3)

## 'Showboat' selected as Spring Weekend topic

by David Gregory

The Spring Weekend Committee, headed by David Christman as general chairman, has announced the theme for Spring Weekend '66. "Showboat," with all its color and excitement, will cruise through the RIT campus on May 13, 14, and 15 as students take time out for their favorite weekend of the year.

The theme of Showboat defines an era in American history ranging from about 1830-1943, and it offers a great latitude for competitive events and overall enjoyment. Christman said, "The committee expects that the theme will be broad enough to stimulate the imagination of the competitive organizations, yet narrow enough to add unity to the weekend."

The conception of the theme includes the showboat itself, as an entertainment facility, as well as the local color of the towns up and down the Mississippi. Showboat entertainment consisted of the full range from serious Shakespeare to melohrama and vaudeville.

The rules and procedures governing this theme and the competitive aspects of Spring Weekend will be announced in the near future. The agenda of events for the weekend is in its final stages and will be released to the student body soon.

## Placement office has summer jobs

All students are invited to consult information pertaining to summer employment opportunities now available at the Placement Office, M-126, 50 Main St. West.

Irving J. Van Slyke Jr., director of placement services, has announced he has upward of 500 summer job opportunities in his files.

Jobs range from corporate types leading to permanent employment, to openings for camp counselors. Jobs are available which would enable one to travel to Europe, or work as a photographer for "National Geographic" magazine.

It is necessary to begin contacting employers as soon as possible because many of these positions have early deadlines.

## Engineers' Week observance planned

The Institute, in cooperation with the Rochester Engineering Society, will sponsor a meeting on campus beginning at 10 a.m. tomorrow. The affair is in conjunction with National Engineers' Week. Tours of the Institute facilities will be conducted.

## MUST HAVE 2.25 AVERAGE

## Housing Office offers resident advisorships

This year, RIT is again offering resident advisorships to both men and women. Students who are interested and qualify should obtain application blanks from either of the housing offices, located in Nathaniel Rochester Hall or Kate Gleason Hall.

The process of application includes completing the application form, along with a letter of any length explaining why the applicant should be appointed. When this has been done, personal interviews will be arranged with the Associate Director and the Director of Housing. All interviews should be concluded before the end of Winter Quarter.

All applicants must have and maintain a minimum cumulative grade point average of 2.25. All applicants must be or must have been residents in one of the residence halls. They must be able to perform their duties continuously throughout the Fall, Winter, and Spring Quarters. In addition, they must not only have displayed academic, social, and emotional maturity, but must also be able to contribute their ideas to the further

development of the residence halls.

All resident advisors receive as compensation for their duties a room in the residence hall, payment of all residence hall dues and fees, and a \$50 credit each quarter to be applied toward tuition.

Melvyn P. Rinfret, director of housing, has announced resident advisors will be appointed April 13, and will be notified by mail.

## Wives will hold Valentine party

The RIT Student Wives Association will sponsor its annual Valentine's party on Feb. 12 at 8 p.m. in the party room of 9 Backus St. All married students and their wives are invited to attend. Refreshments will be served.

The monthly general meeting will be held at 8 p.m. Feb. 16, in apartment 202 at Backus St. All wives of full time day students are invited.

## the 'official publication ...'

On page one of the *RIT Reporter*, in the highest position on the page, there appears each week the statement: "Official publication of the Rochester Institute of Technology." It is a weekly publication, and it is official in the sense that it reports the news of the Institute to students, faculty, administration, and alumni.

There is always an inherent responsibility implied when the term "official" is used, and the responsibility for the *Reporter* is assumed with utmost sincerity and dedication by the several students and faculty advisors who work to produce the paper.

I believe that the newspaper must be of significant value in reporting the news to the Institute. I believe this to be our responsibility. Yet further, I believe that every newspaper must be active in the community in forming opinion, determining policies, and otherwise contributing efforts which would generally improve the community. Newspapers have displayed the ability to initiate public action, to arouse community spirit, to make and to break public officials. This is, and should be, the influence of the newspaper.

For our newspaper to aspire to such influence, however, there must be consideration on the part of Institute officials -- consideration in the form of confidence and respect. In order to serve well and to be truly effective, the newspaper must have first hand information, and admittance to events that are of a news-worthy nature. There should be few Institute activities, on campus or off, that do not permit the representation of the press. Equally important, proper effectiveness of the newspaper cannot tolerate the deadly nemesis of being "scooped" by other local papers week after week.

It is the prime objective of the '66 newspaper staff to cover all the news of the Institute in an intelligent, responsible manner. Prerequisite to this end, however, is the need for total involvement in all campus affairs and Institute policies. Also, and it is obvious, a good school newspaper cannot gain respect if it cannot retain "first access" to campus news events.

The '66 *Reporter* staff intends to uphold the responsibility implied by its title: "Official publication of the Rochester Institute of Technology." And it will exert the full extent of its influence to this end.

David G. Gregory, Editor-in-Chief, '66

## with help from the students

College students are often criticized for their lack of interest in the community in which they are living, and the permanent residents of these college communities critically eye the students as a noisy, carefree, irresponsible bunch of teenagers. RIT students, however, have proven that this idea is wrong.

During the severe snowstorm last week, the student body worked with staff members to help Rochester. Several students worked as many as 40 straight hours preparing and serving food to snow-bound policemen and city workers. Other students gave their dorm rooms to policemen who were unable to return to their homes, and many students who live in apartments began to shovel the snow from fireplugs and to help their neighbors clear their sidewalks.

It will hopefully be many years before Rochester encounters another storm of the magnitude of the blizzard just passed. But it will also be many years before the police and other city employees forget the students who were so willing to help clear the city.

# quorum

by ray baker

It has been argued by many of the social critics of today that because of technological specialization, man is required to assume a multiplicity of roles. Therefore, he will inevitably suffer an individual loss of self identity.

How does this apply to the student of technology? Does it mean that his destiny is one of uncertainty and regimentation likely to sponsor a decline in a democratic way of government?

It is the type of student attending RIT who will prove or disprove this "theory of regimentation." It is he who will shape the future of technical education, here at RIT and throughout the nation.

What can we, as students of technology, do to assure ourselves that a future, structured with the lumber of technology, will remain standing on a foundation of individualism?

We can attempt to understand the governing powers of our community, including those of our administration and student government.

We can voice our personal opinions based on relationships with other students and faculty who share our interests in the future.

We can expand our educational horizons by viewing our general studies curriculum as an attempt to better prepare us to look upon society as "individuals" and successfully master required change.

We can concern ourselves with words such as "tradition," "in-

(Continued on page 7)

"DO YOU THINK WE'LL GET EXTRA CREDIT FOR THIS?"

## letters . . . to the editor

Dear Editor:

In the interview with Dr. Smith and Dr. Wilson at the Student Senate meeting of Jan. 17 concerning curriculum changes there was no mention (at least in the *Reporter*) of the economic factors involved.

These economic factors are relative in actual dollars and cents

to every student who is paying his own tuition. While there has been a 28.5 per cent increase in annual tuition between September 1963 and September 1966 there will be an increase of cost per classroom hour of 55 per cent covering this same period. Since September of 1963 the cost per class hour has increased 40 per cent and compared with last year a 23 per cent increase. Yet there has been a decrease of 18 per cent in actual class hours of instruction.

These figures are based upon my tuition bills and program covering the last three years at RIT and are fairly representative of the student body, since I have followed closely to the schedules that have been prepared by the school. Differences in dollar value will vary from students in other schools at RIT where tuition rates are lower, but these increases are about the same.

As I see it we are paying more and more for class instruction and getting less and less in return. By increasing credits without increasing class hours, RIT appears to be increasing its income without increasing its tuition rates at the present time. Next year it will make a direct increase of nearly \$300,000 -- i.e. 2,000 students at \$150 each -- along with this cost-cutting credit-increasing curriculum.

This is not the only tactic the administration has used. It has increased the amount of students per instructor in a class. For example, during the Fall Quarter Physics 77 - 111 classes were handled by three or four instructors with each having classes of about 30 pupils that met three times a week. This quarter one instructor has been assigned to lecture 100 students in a class that meets two hours a week for Physics 77 - 112. Here is a course that should be taught in smaller classes but given the same treatment as a Student Activities hour assembly. Why can't this continuation course be handled in the same manner as last quarter?

With this condensed cram course I am paying \$2.23 for every hour I am scheduled to be in class but not getting as much out of

(Continued on page 7)

## stop the clock

by ron antos and bill mcdonald

After just returning from the watch maker, (our clock was stopped last Friday,) we have these wintry observations to make. For the first time the RIT campus looked clean, mainly because it was all covered up. Communication between the girls' dorms was completely upset, one stayed out while the other stayed in. However, not all was lost. There were other activities on campus that were greatly appreciated. The free food given out by the school in the wake of the storm and the sock hop to instill a little spirit in the student body were examples of this. **LATEST & GREATEST**

Due to our "Bartender of the Month," Jack Lang, who lives, eats, works, and sometimes sleeps at Pete's place, the much visited Pastime was probably the swiftest public shelter in the city. ...Happiness is: A car with a wide back seat.

The film festival has two excellent movies coming up. The first is "The Hustler" for those of

you who missed it on the tube two weeks ago. The second is "The Day Manolit was Killed," a very good short. Again, we remind you of the big show coming on Feb. 27 at the Eastman Theater. The talent will include Dick Gregory, The Bitter End Singers, and Herbie Mann.

It looks like the RIT basketball team is going to have a winning season. After our five years here it is very unusual.....It seems the school is very childish at times. A good example of this was shown during the storm when the girls were only allowed out for three hours one day. We wonder if the administration will revert to such high school carry-overs as study halls, three different lunch periods, student monitors between classes, and hall passes.

IN ATHENS:

It's funny how the girls get 2 o'clocks the night of a formal dance and get 3 o'clocks the following Friday, providing they pay for it. It's very noticeable how

## Yellow slips apprise students of standing

"That the student be made aware of the seriousness of his scholastic standing..."

In essence this is what the Faculty Council hopes to achieve when it forwards its recommendations concerning the issuance of yellow slips to Dr. Leo F. Smith.

Realizing the responsibility that each instructor has toward the student, Prof. Robert Koch, secretary of Faculty Council, said the council has recommended that:

1. The timing of issuing the slips be made more flexible; that they be issued at the first sign of the student encountering difficulties with a particular subject.

2. The yellow slips be directed to the advisor or department head, and that he in turn forward it to the student in a *more formal* manner.

3. The instructor submit a more confidential report to the advisor concerning the student's position.

4. The categories on the yellow slips be made more pertinent: e.g., is attendance good, lack of adequate background, and failure to do assigned work.

Realizing the importance of this, Faculty Council urges the student who is issued a yellow slip to take the initiative to see the instructor.

## Baseball candidates

### will meet Feb. 16

All candidates for the varsity baseball team are requested to report to the Wrestling Room in the Ritter-Clark gym on Wednesday, Feb. 16, at 9 p.m.

During this brief meeting, Coach Bruce Proper will discuss the pre-season training program. It is imperative that all attend so that organized team practices can be arranged around daily schedules.

## Carey addresses Senate

(Continued from page 1)

"was the realization by all in attendance that indeed there is a genuine interest and dedication on the part of all concerned to make RIT the best institute of its kind anywhere."

A resolution introduced by Senator Richard Begbie (Pr 4) concerning the installation of an inter-institute phone in the Main St. lobby and the hall of the Eastman Building was passed.

## RIT's College of Business has seminars for builders

Home builders are paying too little attention to customer desires, Dr. Eugene Fram of the College of Business, told persons attending a Feb. 3 seminar sponsored by the Home Builders Association of Greater Syracuse. Instead, said the RIT professor, the builders are placing heavy reliance on what their past customers have wanted.

Speaking to more than 35 builders and suppliers at the Northway Inn, Syracuse, Fram said his observations of the home building industry indicated that little attention was being given to such customer desires as where electrical outlets should be put, how close to the house sidewalks should be placed, and where lighting fixtures should be installed.

Fram said that increased sales usually followed when home builders began selling their products with the time-tested marketing concept used by a number of re-

Iceicles that created a hazard to students below the Eastman building are handily removed by Institute staff. (Phil Fraga)

## Dean of Engineers urges caution with computer use

The dean of the Institute's engineering department says that engineers must use caution before "deciding" what parts of society should be turned over to computers.

Dr. Edward T. Kirkpatrick recently told members of the Institute of Electrical and Electronics Engineers of Rochester that it is possible to use computers for such things as daily public voting on local and national issues.

But there are many people who do not wish to have computers making their daily decisions, he said.

"And it is not up to the engineer to decide which application of the computer could benefit mankind," warned Kirkpatrick.

"The engineer has designed the tools and has the methods for putting them to use," he said. "The big problem comes when you try to determine which person or group will decide which of the computer applications will truly benefit mankind."

Other applications of the computer include playing checkers, chess and other games and composing music, he added.

tailers. The marketing concept states that the policies and operations of a firm will be dictated by documented customer needs and wants.

Fram suggested three ways that could help a builder become aware of customer preferences:

1. Look for changes in consumer living habits.

2. Check with past customers -- after they have lived in their homes from two - five years.

3. Seek the advice of people who are "close" to home buyers, such as home economists.

Fram's talk was the second of 10 seminars which have been arranged for the Syracuse home builders' group by the RIT College of Business and its Extended Services Division.

The seminars were designed to provide a long range view of the industry for home builders in the Syracuse area.

Because of the future sociological implications of computers, most RIT students are urged and many required to take courses in computer techniques, Kirkpatrick said.

## Rabbi speaks at Hillel breakfast

B'nai B'rith Hillel Counselorship of RIT will hold a Lox and Bagel Breakfast at 11 a.m. Sunday, Feb. 13, in the Pioneer Room of Nathaniel Rochester Hall.

Guest speaker will be Rabbi Allen Levine of Temple Emanuel El who will speak on "New Trends in the Civil Rights Movement." A film on civil rights called, "Call For the Question," will also be shown.

All are cordially invited to attend this breakfast.

## Chessman Award given to tournament losers

by Wayne Gilgore

This morning Chessman arrived on campus. His first impression of RIT was very humble. He kept repeating, "Holy gee, look at all the snow!"

Intrigued by the passing coeds, Chessman slushed up to one and introduced himself and begged for a date. "I implore you," he said to the bleached blond beauty, "please come with me to the RIT-skeller?" The A & D student showed no sympathy: she simply stuck her nose in the air and started to walk away. At this point, Chessman became enraged and jumped the coed, heaving her face-first into the closest snow bank.

Later that afternoon, Chessman was introduced to Dr. Ellingson and the big brass. They all smiled as they put the touch on him for the New Campus Fund. We left kind of hurriedly as Chessman pushed me out of the office.

I must now tell you of the bad news which followed. In his last humble hour Chessman became ill. He mentioned a few words and then turned green. Chessman is dead.

The RIT Chess Club wishes to

## ISF promotes understanding between the foreign students

by Joseph Nalbach Jr.

Are you familiar with the International Student Fellowship program here at RIT? Probably not, since it was created only last May.

Over 40 foreign students attend RIT. When the foreign students first arrive in Rochester, organizations such as the Rochester International Friendship Council, the Red Cross, and the United Church Women meet and greet them. But no RIT student group officially welcomes the newly arrived foreign students nor do they help them become acquainted with life here at RIT. Here was the need to form the International Student Fellowship program.

Two American students, Carolyn

Marcello (A&D 4) of Rochester, and Wally Stuart (Photo 4) of Stratham, N. H., approached the director of student activities, A. Stephen Walls, to discuss what could be done to establish an international program at RIT. Through the assistance of Walls and the support of other students such as Dag Taubo (Pr 4), Bill Delaney (Pr 4), Prida Hetracul (Pr 4), Bhupendra Basnyat (Pr 2), Ken Chin (Elec 2), Ram Prasad Agrawal (Pr 4), Kamalakar Phadnis (Pr 4), Jean-Guy Naud (Photo 2), Carol Caffrey (A&D 2), Eun Mo Chung (A&D 2), and Frances Tsang (Pr 3), program was well underway.

The main purpose of ISF is to promote mutual understanding between students of the different countries, to stimulate an interest in the exchange of culture, and simply to become friends. Mrs. Earl Sexton, mathematics instructor of African students at the University of Rochester, is advisor.

Members of ISF were busy the first few weeks finding and welcoming all of the foreign students. One of the first functions of the group took place on Oct. 3 when a skating party was held at the RIT ice rink. S. Z. Wasswa-Musoke, an African student, received a memento of the third anniversary of the independence of his home country, Uganda.

Another event took place during November in the RIT cafeteria, when over 10 foreign students prepared and served their own native dishes in a selection ranging from Indian bread (puree) to sweet and sour pork. The dinner was followed by folk dancing.

For the remainder of the school year, foreign students will give informal talks on their home countries to various groups.

From the original 12 students who formulated the ISF program, today there are over 50 members all sharing in a common fellowship to carry out the prime purpose of the ISF.

Officers of ISF are Carolyn Marcello (A&D 4), president; Bill Delaney (Pr 4), vice president; Joanne England (A&D 4), secretary, and Jean-Guy Naud (Photo 2), treasurer.

During the next few weeks, this reporter will attempt to bring the student body closer to the foreign student on campus by formulating a feature series called "The Foreign on Campus." Students are welcome to join ISF by placing their names in the ISF folder outside E-125.

## Student 'playpen' or student unions?

Mrs. Beverly J. Linton, secretary to A. Stephen Walls, Student Activities Director, recently wrote an article which appeared in the Bulletin of the Association of College Unions. She questioned, "Are Unions glorified 'playpens' which interfere with the serious, or academic aspects of the college student's life?"

Mrs. Linton wrote the article because in recent months, in several periodicals, such as *Newsweek*, *Time*, and the *New York Times*, the assumption was that

(Continued on page 6)

## Entire campus goes 'Bat-Crazy'

Batman has arrived.

Every Wednesday and Thursday at 7:30 p.m. the bustle of the campus comes to a halt. Television has brought the comics to adults. Batman and his sidekick, Robin, soar across the screen on ABC-TV.

So popular has the program become that it has reached the top 10 in ratings. Pete Hare (Pr 2) goes to the Student Union an hour before showtime to be assured a seat. Some members of Theta Xi fraternity prefer the Wednesday meeting starting time changed. Changing the time from 7:30 to 8 would enable them to see the Cape Crusader.

According to the Jan. 28 issue of *Time*, "the grownups are supposed to see Batman as camp, a sort of tongue-in-chic philosophy of pop culture, which decrees that anything that is really bad must be awfully good."

be the first to show gratitude to the deceased. In his honor a Chessman Memorial Award will be given at the coming Annual Men's Dormitory Chess Tournament.

Because Chessman was a complete failure in life the award will go to those people who best symbolize his meager existence. Why should only the good players get the trophies when there are always more losers than winners? Of course, the winners of the tournament will get the usual gold plated chess pieces.

When you walk out with your Chessman Award, head held low in defeat, you know that you won because you really deserved it.

Men and women who have the desire to win or lose are invited to come to the annual championship. The tournament will be held at Nathaniel Rochester Hall on Saturday, Feb. 12 in the Pioneer Room. Registration will be from 10 - 11 a.m., with the first round beginning at 11 a.m. sharp.

Please bring your own set if possible. The RIT Chess Club will supply sets for those who do not have them.

DESIGNED AND PHOTOGRAPHED BY DENNIS GLENN

# The School for American Craftsmen

The School for American Craftsmen of the Rochester Institute of Technology, offering professional courses of study in ceramics, metacrafts and jewelry, woodworking and furniture design, and textiles, has bridged successfully a gap between education and training that has led to a unique program of instruction in the hand arts. Its students, graduates and faculty have contributed in a substantial way to the the expanding renaissance of the crafts in the U.S.A. through their production as designer-craftsmen, their work in industry as designers and technicians, and service in

education as teachers and administrators of craft programs.

The curriculum leads to three degrees: the Associate in Applied Science, given at the end of two years of instruction, the Bachelor of Fine Arts, awarded at the end of four years of study, and the Master of Fine Arts, given upon the completion of a year of advanced study beyond the baccalaureate. In addition to the regular programs, workshop sessions are held each summer for those who wish a period of "refresher" study.

# Tigers down Brockport and Fredonia; record now 11-6

by Jim Castor

Two more games were added to the coffer of the red-hot RIT basketballers last week, increasing their record to 11-6. Brockport State succumbed to a 76-59 shellacking and Fredonia State was shelled 65-57.

### Tiger Guards Star

Jim Robinson and Keith Thompson, RIT's deft duo in the backcourt, provided plenty of punch in the attack against Brockport. The swift pair scored 20 and 8 points respectively for half the entire team's total in the contest.

Robinson, hampered earlier in the season by a shoulder ailment, shook off any effects this has had on his game, hitting on 47 per cent of his shots. He also rebounded and assisted many times to complement his scoring game.

For the second week, the "Dunellen Deadeye" was named to the Eastern Collegiate Athletic Con-

ference's All-Star team as Sophomore of the Week.

Thompson proved brilliant in the playmaking department and surprised many with his 18 point output, four points above his yearly average. His field goal percentage was a whopping 58 per cent mark, one of his best games in that department.

### Game Never Close

The Tigers started hitting hot and heavy in the first half and quickly made a rout of the game. Brockport could not can a field goal for the first five minutes and RIT took advantage, racing to a 26-8 lead midway in the period.

The Golden Eagles found the range somewhat to cut the lead to 41-27 at halftime, but the Tigers again got hot after the start of play and coasted to victory.

Free throw shooting is becoming one of the Tigers' strongest points. In the first half, the starting five snapped 15 of 15 shots through the hoop. Everyone saw action in the last half, and the figure dipped to 18 of 29 for the game.

Four men reached double figures for RIT. Beside Thompson and Robinson, Bob Finkler tossed in 12 and swept down eight rebounds, and John Serth collected 10 and grabbed nine misses

### Fredonia Threatens

Fredonia State threw a scare into Coach Lou Alexander Jr.'s cagers last Friday night for the first half, but a much improved showing in the last period broke the game wide open for RIT.

Shooting a frigid 22 per cent from the field, RIT showed only a 26-22 advantage at the first whistle, -- their margin coming once again from the free throw line. The Tigers were held to just seven buckets in the period, while Fredonia was dunking 10.

The second half was a totally different story, however. Led by the shooting of Robinson and the rebounding of Finkler and Serth, RIT swamped Fredonia 21-8 in a 16-minute period and rolled to an easy win.

### Robinson Sets Record

Scoring ace Jim Robinson broke the Tiger record for consecutive free throws by tossing nine straight through the hoop. He eclipsed the old record of 23. His 32 straight was still intact at the end of the game.

Robinson led all scorers with 25 points, his third highest total of the season. Co-captains Finkler and Serth scored 11 points apiece. They also broke double figures in the rebounding department. Finkler set a new record for this season by pulling down 15, while Serth was not far behind with 12.

### Home Showing Tops

With the two home victories, the cagers sport a 9-1 mark on the Ritter-Clark floor, and have won five straight and their last eight of nine contests.

The Tiger yearlings also notched two victories. Coach Bruce Proper's improving squad topped the Brockport frosh, handing them their second loss in 12 games, and crushed the Fredonia cubs 71-57. Dan Viele hit 31 against Brockport and Dave Eaton 21, while Joe Muni and Eaton made 20 each against Fredonia.

FLYING TIGER—Jim Robinson goes in on a lay-up as Brockport's defender looks on helplessly. (Kudola)

RIT's Dave Eaton drives through the key for a score as the Tiger Frosh beat Fredonia State Frosh 71-57. (Phil Fraga)

## Half-price to college students and faculty: the newspaper that newspaper people read...

At last count, we had more than 3,800 newspaper editors on our list of subscribers to The Christian Science Monitor. Editors from all over the world.

There is a good reason why these "pros" read the Monitor: the Monitor is the world's only daily international newspaper. Unlike local papers, the Monitor focuses exclusively on world news — the important news.

The Monitor selects the news it considers most significant and reports it, interprets it, analyzes it — in depth. It takes you further into the news than any local paper can.

If this is the kind of paper you would like to be reading, we will send it to you right away at half the regular price of \$24.00 a year.

Clip the coupon. Find out why newspapermen themselves read the Monitor — and why they invariably name it as one of the five best papers in the world.

### Contamination seminar scheduled for Feb. 14-18

The Institute will put its blackboards and chalk on an airplane, as the Extended Services Division travels to Atlanta, Ga. to present a five-day seminar on contamination control Feb. 14-18.

The same program was presented in Rochester last summer and RIT was subsequently asked to repeat the program in the south, primarily for persons affiliated with the aero space operations at Cape Kennedy and Houston.

The seminar is scheduled at the Hilton Inn, Atlanta. More than 35 persons are expected to attend. Among those who will attend from RIT is William S. Shoemaker, professor in the School of Photography. The basic aim of the seminar will be to explore methods by which persons and products are protected from contaminants.

The Atlanta trip is the second out-of-the-area program arranged by Extended Services within the

past month. The other trip was a recent ten-week course in Syracuse for the Home Builders Association of Greater Syracuse.

### Student 'playpen'

(Continued from page 3)

the "union" was hardly qualified as necessary for a college education.

Very much in favor of all college unions, Mrs. Linton wrote, "The most basic function of the union, even in the 'playpen' sense, is that it provides low-cost, varied cultural and recreational activity, not only for students, but also for faculty and staff members. The college student learns both physical and mental skills from the services provided for him in the college union."

In summing up, she said that the union is "a place where students may gain greater insight into the complexities of modern community life under the guidance of experienced staff personnel."

Denton P. Harris (Mgt '52) has been named assistant vice president at Rochester Savings Bank. Harris has been with the bank since 1936 and resides at 170 Morncrest Drive, Gates.

Edward D. Dwyer (Ret '29) has been named to the advisory board of the Batavia Office of the Marine Midland Trust Co. of Western New York. Dwyer and his sons own and operate the Thomas & Dwyer Shoe Store in Batavia.

Eugene F. Horak (Mech '62) has been appointed Quality Assurance Engineer with the Burroughs Corp., Todd Division. His former post was that of printing engineer in the division's Research Development area.

Clarence F. Gallman (FA '63) is now Director of Food Management for the Stouffer Foods Corp.

James Mickles (Chem '43) has been named professor of chemistry at the Massachusetts College of Pharmacy in Boston.

Mrs. Suzanne Joyce Broderick (SAC '59) has been appointed Sys-

tems Analyst with UNIVAC, programming computers and designing EDP systems for New York firms.

Semour Seigel (Mech '50) has been promoted to Design Engineer at Rochester Products Division of General Motors Corp. His present work on the Quadrajel carburetor involves constant communications with all areas of the Chevrolet Division.

A former Pittsford resident, James D. Forman (Mech '59), will become director of engineering technologies for Anne Arundel Junior College in Severna Park, Md. Forman is currently head of the Mechanical Technology Dept. at the State University Agricultural and Technical College at Alfred, where he has been a faculty member since 1959. In the fall of 1964 he was the recipient of a Gillette-American Society of Engineering Education Fellowship sponsored by the English Speaking Union's Teacher Exchange Program and visited

many technical colleges in Great Britain. One of his articles, a description of courses given at various two-year colleges, appeared in *Technical Education News* in February, 1964.

John V. Baccoli (Photo '48) has joined the staff of the Lincoln Plant of Eastman Kodak Co. as senior design engineer. Mr. and Mrs. Baccoli also announced the birth of their first child, a daughter, Jaklyn, on Christmas Day.

Mrs. Jane Hunt Lombardo (Ret '63) has been appointed Special Insurance Claims Examiner by the Social Security Administration in Baltimore.

William S. Remington (FA '62) visited the department early in January. After graduation from RIT, he received his Master's degree in Business Administration from Michigan State University. He is now Food Service Operating and Personnel Manager of W. T. Grant Co. and is located in New York City.

James Moberg (Pr '51), vice president of manufacturing at DuBois Press, has been elected to the company's board of directors.

H. Merle Hanford (Mech '35) has joined the engineering staff of Walz & Krenzer Inc., and will head a newly formed research and development department.

Edwin P. Lehmann (Mgt '51) has been appointed supervising engineer of the application test center at the Gleason Works.

Wyllis F. Engdahl (Elec '32) has been appointed manager of special projects in the product engineering department at the Rochester Division of Friden Inc., a subsidiary of the Singer Co.

Wesley A. Bernhardt (Pr '59) has been named production manager of Schoettle Division, EasTex Packaging, according to an announcement by EasTex's general manager.

Kenneth Kusak (Bus Adm '65) has been appointed an agent for the Allstate Insurance Companies for the Rochester area and will be located at Sear's Southtown store. He also has been appointed local representative of the Allstate Motor Club and the Allstate Safety Crusade.

Fifty-eight photographs of Chicago by James Marchael (Photo '57) will be on exhibit in the Art Institute of Chicago from Jan. 29 through March 27. This is an out-of-the-moment account of Chicago with most photographs dated 1964-65.

Marchael has been a free lance

# A memorial to Denny's Benny

by William H. Brown

Benny Boa is dead. His death, although expected, came as a shock to his long-time trustworthy friend, Dennis Coons (Pr 1), who hails from Buffalo. Coons also served as Benny's trainer, handler, and owner.

Coons sadly admitted that he will probably never find another friend like Benny Boa. Benny's smooth personality always seemed to communicate a certain sense of excitement and urgency to those around him.

Coons mentioned that Benny's talent for attracting large crowds was an attribute to his dynamic personality. Whenever he was at a luncheon or dinner, large crowds gathered around. They stood in awe and respect for just a quick glimpse of Benny displaying his suave table manners with the air of an English aristocrat and the completeness of an IBM computer.

For all of Benny's 8 lbs. in his seven foot frame shook with uncontrollable pleasure whenever he downed his favorite dishes of rabbits and chicken. His unique taste and preference for uncooked

the course as I did in the fall. This technique of classroom instruction was attempted in Freshman GS courses and the students responded in a similar manner. What makes the administration think we've changed our minds?

My tuition bill says, "A privately endowed non-profit-making educational institution." Those words "non-profit" should be removed if the administration continues to follow the present trend. Have faculty members been given an overall increase in salaries to absorb these increased rates or has the faculty been itself increased by 40 per cent? From the RIT catalog I understand that tuitions pay primarily for faculty and administration costs.

I believe Dr. Wilson and Dr. Smith gave some rather feeble excuses for curriculum changes. Their ideals are in order, but I don't believe that every student likes the idea of spending \$375 a year on a 5-credit course for three quarters that should only cost \$200 at the per class hour cost while spending their own time and remaining \$175 learning what any college student is expected to learn from his other courses that are far more explicit in their objectives.

Howard Hansen (Pr 3)

money changes the rules..... How was the wintry serenade by the six snowmen on the cold blizzard's eve?

Don't forget to attend Theta Xi's Sweetheart Weekend starting with the blast tonight in the gym. Naturally pop will be served along with the beer.....Happiness is: A Rat Fink.

Alpha Xi Delta is now collecting cigarette packs to purchase a seeing eye dog. Your support would be appreciated by the girls..... Speaking of the girls, the Imposter Party was of a different twist. Even MAC was there.....Suggestion: Why don't the sororities have tables down in the snack bar as do the fraternities. Thus, when a guy wants a date all he has to do is sit there and wait!!!

As can be seen by the Reporter's New Campus issue, there was hardly anything on fraternity and sorority housing. We feel that this is just the beginning of the type of publicity we will receive from the Institute. This shows that the greek system will more than likely have to make their own publicity. How about it, IFC and Panhellenic Council???

Sports: IFC basketball and bowling have started again. These events are interesting and all are welcome to attend.....Last Wednesday Dr. Campbell met with the greeks in the Ritter-Clark gym. The topic discussed was the new campus fraternity housing. Thank you for your interest, Dr. Campbell...We understand that the next move over at the Kage will be the installation of hidden microphones in the walls -- (not A. Stephen), right, Wilma?.....A rose, a rose....."Daddy, there's a boy outside, his name is...."

## ROCHESTER TECH ALUMNI CHAIR

Whether your home, office or studio follows traditional or contemporary decor, this beautiful chair will be in excellent harmony. Finished in satin black with gold trim, the chair is constructed of solid New England birch. The RIT seal is prominently reproduced in gold on the backrest of the chair.

Handproduced by master craftsmen, the chair requires four weeks for delivery. It is shipped express—collect—from Gardner, Mass., by the manufacturer.
