[New heights—and depths—for RIT student project](#)

With the Independence Day holiday almost here, what better story to share than RIT engineering alum **Dan Scoville**'s recent discovery of the Revolutionary War-era British warship *HMS Ontario* in Lake Ontario?

See and read more about this amazing discovery, and learn about remote-operated vehicle technology originally developed by RIT students that helped make the find possible, in [this story](#). Plus, listen to my interview with Dan on [Studio 86: Finding the HMS Ontario](#).

Have a great Fourth of July!
