- 3) Approval of Minutes
 - a. Motion by Dave to approve, seconded by ____
 - b. Noella changed from last week

4) Speak to the Senate

- a. Park Point representative Heather Martin: Park Point residents met about parking, wanting a solution, upset that no one knew about the change until they arrived on campus to start classes.
 - Motion by Dave to talk about this, seconded by ___: majority ruled.
 - GCCIS: what do they want SG to do about it?
 - Heather: We know they have no parking but we need an answer. It's not Park Point's problem, we need
 - Park Point resident: There are tons of RIT students who live there, why are they being treated like as on-campus with parking and nothing else?
 - Park Point resident: If Park Point 900 of the 16500 students, they don't make up a percentage of the school. If we're so small why can't we park?
 - Park Point resident: Meet half way, one pass per apartment.
 - Justin Resident: Rode the bus and saw empty spots
 - Heather: What about people who work on campus early or planned their schedule around getting to and from campus with a car. Don't want a fight, why did this happen so fast?
 - VP: How do you regulate who gets a pass in the apartment if sharing?
 - Heather: That would be hard.
 - Phil: Carpool?
 - Resident: Don't want to drive with strangers.
 - Justin Resident: Rode the bus yesterday, too many students on the bus. Didn't come to RIT to not be able to drive.
 - Heather: Not RIT and PP can't drive but RIT Inn can. They may live further away but the bus can go back and forth.
 - Cory: You're upset you weren't informed about parking. What about a quarter or so to park and then have to work on another mode of transportation. Lot near Cross Roads at least a couple rows of empty spots. PP can park in certain places for this time.
 - Adam: You work in the office. Has PP taken a professional issue with this?
 - Heather: PP wants students to work with RIT on the issue. What's going on? What can we do before people in the office take action?
 - Matt: SG represents all students. Perkins and Colony not informed either about parking on campus. Culture change, we have to get used to it. RIT spoiled to any city school. If we had a flawless bus system, short term parking, maybe that would be a solution. Jumping on bus to get to school, better than looking for a spot.
 - Business Senator: Colony, Perkins, UC can't park on campus?
 - Emily: Yes, that is correct.
 - Heather: PP not on campus. We're only on campus when it comes to parking. Internet not working well but we don't have RIT Internet, only RIT parking.

- Jonathon Maurer: Work with associate director or Parking and Transportation.

1. Started by putting out RFP's.
2. Parking advisory group.
3. Finalists were interviewed for developing parking, transportation, bikes, and pedestrians.
4. March April May 3 sessions. PPT on parking website.
5. At the completion there was a report explaining everything. Presented to SG and governance groups.
6. Strategy phased 2008-2009 was decided on, PP not included. S
7. G requested PP be included with with the other apartments. Administration opposed but SG wanted it so it was agreed.
8. When it was set up it was late.
9. 2 additional buses added to make it a 10 mins wait.
10. Dedicated to transportation solutions.
11. Only had the summer to implement solutions, not where they should be but working on it.
12. Solution continues to look bad for parking at RIT. (Sent paper around)
13. Surveys of parking lots done during first few weeks.
14. Busy time, 250 parking spaces. Expected as consequences, we would have 100's if not 1000's of spaces for PP but excess spots eaten up by RIT's growth. More faculty and staff on campus. Construction taking up parking. Major special event during a peak time of 400-500 parking, we will not be able to park reserved parking or commuters.
15. RIT growing fast, positive for community, negative for parking.
16. Not enough to support growth.
17. Referring to diagram, shows challenges from parking and transportation stand point. Parking inexpensive, cheap, convenient, want it to be where they need it.
18. Remote lot with shuttle transportation.
19. Preventing students (freshman) for bringing cars and using those lots as remote parking with shuttles.
20. Parking garage, \$20,000 per space about \$2,000 per year of its life.
21. Other options that seemed expensive before now looking pretty good.
22. Keeping surface lots inexpensive but there isn't going to be parking for everyone; someone has to give it up.
23. Going to provide help to those people (apartments) and have it be high quality.
24. As a community decisions need to be made to manage growth moving forward.
25. Need strong student representation in student advisory group.

- Emily: Heather should be on that committee;
- Casey: Rewards for people who walk or bike. Cool to do that.
- Jonathon Maurer: Pay to not bring car. We don't charge people to park. Charging people makes them think about other options. Rewarding
- Phil: Path to PP?
- Jonathon Maurer: During initial plans there was a plan. Department of Conservation changed them, wetlands couldn't be developed.
- Heather: Had PP known that they would have done something else.
- Senator: 8:10 waiting for bus not home to 9:30.
- Paula: Call them and tell them about problems. Been riding themselves, trying to fix everything. Need to know in order to fix. Don't want people to go through that. Want to correct service response.
- Emily: Riding the bus, what was your experience?
- Paula: Crowded, good to see validates it.
 1. Jumped bus to bus.
 2. Other three relatively fine, off by a minute or so here and there.
 3. Had complaints about drivers leaving the bus, monitoring that.
 4. Union drivers started driving Sept 1st.
 5. Been watching, working together to make it perfect. Didn't happen last week, this week still iffy.
 6. Looking for improvements into the quarter.
- Org Rec: Students don't know who to call/e-mail in order to send feedback. Added two buses, with all the changes that might not be enough. Work out the kinks and maybe add a few buses.
- Paula: Not aware of PP being added. Didn't know buses were driving by stops full, need to know this. Doing a temporary shadow bus in order to monitor that situation. In a month if we have more information and we feel we need more, coming into winter quarter and everything parking will make other changes. Need info now to make decisions.
- Emily: Two buses funded by Wilmoreite?
- Jon: Not the majority of the fund.
- Emily: So RIT was going to pay before PP was in and then PP came in?
- Jonathon: No, final decision for buses not done until PP was not to park on campus.
- GCCIS: Last year, we had to vote on something that would hurt constituency. Approve something that would frustrate people. Rushed, kinks.
- Matt: Communication. This wasn't brought to students well enough. Communicate with students for solutions. Routes, no need for buses doing the same route all the time. Orange and brown line. When can we see changes? When will we know?
- Jonathon: Parking Advisory Group. Two staff council, two academic senate, public safety. Purpose of group is to work through issues. Group the administration looks to when we ask for resources. Administration

- looks for parking advisory group to approve those (more covered spots, etc.). Suggest participants in this group. SG decide who and how many.
- Heather: SG people living in RIT Inn? Why PP can't drive, why can RIT Inn? Make parking cost money, PP will pay for their spots. Why can freshman park in spots PP could use.
- Emily: Be on the advisory board.
- Jonathon: SG should decide who should represent that.
- Emily: Meetings closed?
- Jon: No, but should be notified due to having to pass a desk to get to the meeting.
- VP: No promises about parking but SG will rectify shuttle. Solutions for clubs, art students. Need to move on.
