6 October 2008

Graduate students in Professor Diane Hope's "Visual Communication" course attended the Visible Memories Conference at Syracuse University this past weekend. The conference explored "the intersections between visual culture and memory studies with particular focus on the ways in which memories are manifested and experienced in visible, material, or spatial form."

Two CMT students, Charae Kopp and Alyx Vanderweel, chaired panels at the conference. The trip was sponsored by the William A. Kern Endowment for Research in Communications.
