Wednesday, 6/25/03 -- 11:00 AM

Location: LBJ [060] Panara Theatre

Strand: Using Technology to Support Learning

Type: Formal **Audience:** All

Summary:

The authors found Digital Video Conferencing (DVC) using inexpensive, Logitech cameras, and Microsoft's Netmeeting software to be an easily available, low cost, practical technology that can be used in both synchronous and asynchronous online teaching and tutoring sessions with deaf and hard of hearing students. Students embrace the use of this technology.
