Wednesday, 6/25/03 -- 2:00 PM

Location: LBJ [060] Panara Theatre

Strand: Using Technology to Support Learning

Type: Formal **Audience:** All

Summary:

Reading word problems can be a significant barrier to success for deaf students. Interactive Physics software allows teachers to create computer models of systems that can be used in labs, homework problems, and exams. The teacher controls parameters, and can automatically present students with digital or graphed data.
